STATE OF WASHINGTON

OFFICE OF FINANCIAL MANAGEMENT

Insurance Building, PO Box 43113 • Olympia, Washington 98504-3113 • (360) 902-0555

October 31, 2014

The Honorable Jay Inslee, Governor Honorable Members of the Legislature Citizens of the State State of Washington Olympia, Washington 98504

In accordance with Revised Code of Washington 43.88.027, the Office of Financial Management has prepared this Comprehensive Annual Financial Report (CAFR) of the state of Washington for the fiscal year ended June 30, 2014. Full responsibility for the completeness and reliability of the information contained in this report, based upon a comprehensive framework of internal control established for this purpose, rests with the state. Because the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements.

The State Auditor has issued an unmodified ("clean") opinion on the Washington state financial statements for the fiscal year ended June 30, 2014. The independent auditor's report is located at the front of the financial section of this report.

Management's Discussion and Analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview, and analysis of the basic financial statements. The MD&A complements this letter of transmittal and should be read in conjunction with it.

Following the MD&A are the basic financial statements, including the government-wide financial statements, the fund financial statements, and the notes to the financial statements. The required supplementary information, combining financial statements, individual fund schedules, and the statistical section complete the CAFR.

Profile of Washington State

Washington state was created in 1889 by an enabling act of Congress. The state is located on the Pacific Coast, in the northwestern corner of the continental United States, and comprises 71,303 square miles. Its current population is 7.0 million. Washington is famous for its breathtakingly beautiful scenery and sharp contrasts. On the west side of the state, high mountains rise above coastal waters. The forests of the Olympic Peninsula are among the world's rainiest places. The state's coastline has hundreds of bays and inlets that make excellent harbors, while in the eastern part, flat semi-desert land stretches for long distances without a single tree.

Washington's location makes it a gateway for land, sea, and air travel to Alaska and Pacific Rim countries. Ships from all parts of the world dock at Washington ports. Costco Wholesale Corporation, headquartered in Issaquah, operates an international chain of membership warehouses. Microsoft, a global leader in the computer software industry, makes its home in Redmond. Major internet retailer, Amazon.com, and worldwide renowned coffee company, Starbucks, are both headquartered in Seattle. The Weyerhaeuser Company, a major producer of wood and related products, is headquartered in Federal Way.

East of the Cascade Mountain range, farmers raise livestock and grow a variety of crops such as wheat, potatoes, and tree fruits. Washington leads the nation in apple and hops production, makes world-class wine, and produces large amounts of lumber, pulp, paper, and other wood products. Western Washington's mild, moist climate makes that region excellent for dairy farming and the production of flower bulbs.

GOVERNMENTAL STRUCTURE

As established in the State Constitution, Washington state has Executive, Legislative, and Judicial branches of government. The Executive Branch has nine elected officials: the Governor, Lieutenant Governor, Secretary of State, State Treasurer, State Auditor, Attorney General, Superintendent of Public Instruction, Insurance Commissioner, and Commissioner of Public Lands. Thirty-nine agency heads are appointed by, and report to, the Governor. Seventy-eight agency heads report to boards appointed, in whole or in part, by the Governor. The Legislative Branch consists of the Senate (with forty-nine members) and the House of Representatives (with ninety-eight members). The Judicial Branch consists of the State Supreme Court, the highest court in the state, which has nine Justices. Every two years, three Justices are elected for six-year terms. A Chief Justice is chosen from among the most senior Justices. The Judicial Branch also includes the state's superior courts, justices of the peace, and such inferior courts as the Legislature may provide.

TYPES OF SERVICES PROVIDED AND REPORTING ENTITY

The state provides a wide range of services that include education, transportation, environment and natural resource protection, and social and health services.

The accompanying report includes all funds and subsidiary accounts of the primary government, Washington state as legally defined, as well as its component units. Component units are legally separate entities for which the primary government is financially accountable or ones that have relationships with the state such that exclusion would cause the state's financial statements to be misleading or incomplete. The determination of "financial accountability" is based on criteria established in Governmental Accounting Standards Board Statements No. 14 and No. 61. Note 1.A to the financial statements explains more fully component units which are included in the reporting entity.

THE BUDGET CYCLE

Washington enacts budgets for a two-year cycle, beginning on July 1 of each odd-numbered year. By law, the Governor must propose a biennial budget in December, the month before the Legislature convenes in regular session. The biennial budget enacted by the Legislature can be modified in any legislative session through changes to the original appropriations. Since the inception of annual legislative sessions in 1979, it has become common for the Legislature to enact annual revisions to the state's biennial budget. These revisions are referred to as supplemental budgets.

Operating appropriations are generally made at the fund/account and agency level; however, in a few cases, appropriations are made at the fund/account and agency/program level. Operating appropriations cover either the entire biennium or a single fiscal year within the biennium. Capital appropriations are biennial and are generally made at the fund/account, agency and project level. The legal level of budgetary control is at the fund/account, agency and appropriation level, with administrative controls established at lower levels of detail in certain instances.

Washington State's Economy and Revenue Outlook

SUMMARY

From the time the nation's recession began, in December 2007, to its lowest point in February 2010, Washington State lost almost 206,000 jobs, or about 6.9 percent of total nonfarm payroll employment. While the state lagged the nation into this slowdown, local losses accelerated in late 2008 and, for the most part, began to match national trends. By June 2009, the nation was officially out of recession and national economic indicators were signaling a recovery in economic output. However, employment was noticeably restrained as employers sought to increase output through productivity gains rather than by hiring additional workers. Employment patterns were inconsistent throughout 2010 as the use of temporary Census workers in the late spring and summer masked the below-average hiring trends in the remainder of the economy. Employment growth turned positive in the last quarter of 2010 and has remained on a positive track since though at a growth rate less than half the historic norm. Job growth advanced at a 2.5 percent annual pace in 2014, a marked improvement on the 1.4 percent rate in 2012 and 2.1 percent pace in 2013. Mid fiscal year 2014 marked an economic milestone as nonfarm employment, after a duration of 69 months, finally exceeded its pre-recession peak. Because of Washington's export-dependent economy, and the cautiously optimistic Asian outlook, Washington is still expected to outpace the nation over the next several years in terms of job and income growth.

It is expected that Washington's economic expansion will build upon the diversity of the state's industrial and environmental foundations, whose elements include a vital export base; the presence of knowledge-based industries such as information services, professional and business services, health services, and financial services; and attractive natural attributes. All these elements should continue to support population growth.

Washington's nonfarm payroll employment grew by 2.5 percent in fiscal year 2014, 2.1 percent in fiscal year 2013, 1.4 percent in fiscal year 2012, 0.6 percent in fiscal year 2011, and -3.9 percent in fiscal year 2010. Throughout this span the aerospace industry was able to perform better than average despite weakness in the global airline industry, thanks primarily to a long backlog of orders. Adding workers to address the production difficulties with the 787, and increasing the delivery pace for the large backlog of orders in fiscal year 2013 helped keep employment on the upswing. Total manufacturing employment grew 3.7 percent in fiscal year 2013 as production schedules ramped up and a favorable dollar gave Washington products an advantage in the international markets. With 787 production difficulties solved in late fiscal year 2013, and the realignment of production and engineering operations across the country, the ramping down of aerospace employment in fiscal year 2014 and further easing of payrolls are projected for the future.

Washington's unemployment rate fell by 1 percentage point in fiscal year 2014, as a growing national economy, rebounding housing markets, and moderating energy costs helped support the labor markets. As the 2014 annual unemployment rate eased down to 6.5 percent from 7.5 percent in fiscal year 2013, Washington's jobless rate consistently tracked below the national average throughout this period.

Personal income grew 4 percent in fiscal year 2014, despite the below-average pace of hiring. Real personal income – after factoring out inflation – grew by 2.7 percent in fiscal year 2014 after gaining 2.6 percent in fiscal year 2013 and 2.7 percent in fiscal year 2012. In comparison, real personal income fell 3.1 percent in fiscal year 2010.

Washington's outlook for fiscal year 2015 is for moderate gains in economic growth. Nonfarm payroll employment in Washington is forecasted to increase by 2.3 percent in fiscal year 2015. Personal income in fiscal year 2015 is predicted to grow by 4.6 percent in current terms, and by 3.2 percent in real terms.

General Fund-State revenues are forecasted to grow at an 8.2 percent rate in the 2015-17 biennium compared to the 8.7 percent gain in the 2013-15 biennium. The expanding economy, moderate gains in hiring, and recovering housing markets have had a positive effect on revenue growth though at a pace below overall income growth. Further economic growth and a continued rebound in the housing market will keep revenues growing at a moderate pace.

ECONOMIC CONDITION IN FISCAL YEAR 2014

Washington's nonfarm payroll employment grew by 2.5 percent in fiscal year 2014, compared to the 1.7 percent growth in U.S. nonfarm payroll employment. The absolute increase in Washington's nonfarm payroll employment was 73,900 during fiscal year 2014. Personal income in Washington grew 4 percent, leading the U.S. gain of 2.7 percent. Because Washington's personal income had not fallen to the same degree as the nation during the great recession, the rebound effect in Washington was somewhat lessened during the subsequent recovery and expansion (i.e., the state did not have near as deep a hole from which to extract itself). Real per capita income grew by 1.6 percent in Washington during fiscal year 2014, again leading the nation which experienced a 0.7 percent gain.

Aerospace employment has long been an anchor for Washington's manufacturing sector, so changes in aerospace have an outsized impact. Even though aerospace employment did ratchet down a modest amount in fiscal year 2010, employment growth from that point through the middle of fiscal year 2013 totaled 17,000 workers, or 21.2 percent. This was accomplished by ramping up of production schedules and adding an additional assembly line to help boost aircraft deliveries. With more complete resolution to the 787 production difficulties in late fiscal year 2013 aerospace employment fell 1.5 percent in fiscal year 2014.

Manufacturing employment, other than aerospace grew by 2 percent in fiscal year 2014. Durable manufacturing industries, which had experienced pullbacks in employment in fiscal year 2010, turned up in fiscal year 2011 as the national economy and export market began to strengthen, and carried that momentum into 2014 growing at a 2.2 percent annual clip. Nondurable manufacturing employment, which had declined 4.6 percent in fiscal year 2010, eased upward by 0.9 percent in fiscal year 2011, and also carried momentum as demand for processed food and paper products solidified. Durable goods employment continued to grow in fiscal year 2014 at a moderate 1.7 percent pace.

In comparative terms, employment in durable manufacturing in Washington grew by 0.5 percent in fiscal year 2014, while employment in durable manufacturing nationwide increased by a very similar 0.6 percent. Manufacturing was formerly one of the few bright spots in the nation's labor market. Employment in most durable manufacturing industries, outside of aerospace, posted gains in Washington during fiscal year 2014. Even employment in lumber and wood products, which had been very hard hit by the recession and housing bust, posted solid gains thanks to the ongoing rebound in the housing markets.

Washington's lumber industry is dependent upon local and national home building trends. The housing market in Washington had begun to soften in fiscal year 2008, and the national markets had been weak since the end of fiscal year 2007. The rebound in home building resulted in a 3.2 percent gain in wood products employment in fiscal year 2014.

Employment in transportation equipment other than aerospace fell by 3.8 percent as demand for heavy trucks, ships and boats softened. As aerospace employment eased, employment in primary and fabricated metal products —major suppliers to aerospace — continued to grow by 1.3 percent in fiscal year 2014, despite the more intense use of composite materials in newer aircraft. Machinery manufacturing employment also increased 6.5 percent in fiscal year 2014 thanks to steady domestic and international demand. Computers and electronic products jobs fell by 0.3 percent, while employment in other durable manufacturing was up by 3.1 percent.

Nondurable manufacturing employment in Washington increased by 1.6 percent in fiscal year 2014, a gain of about 1,200 jobs. Nationally, nondurable manufacturing employment was unchanged over the same period. In Washington, employment in food manufacturing grew 1.1 percent in fiscal year 2014 as a result of continued growing demand in the export markets. Printing and paper products employment was essentially unchanged in fiscal year 2014 as a result of soft national demand for magazines and newspapers and the growing use of on-line information sources.

Washington's non-manufacturing employment advanced 2.7 percent in fiscal year 2014. All major nonfarm services sectors, including government, posted payroll gains for fiscal year 2014 with construction employment outpacing the field with a growth of 6.9 percent.

The construction industry's healthy gain in fiscal year 2014 was a result of continued strengthening in the housing market as median house prices rose throughout most of the year and as the number of building permits eased upwards. The housing market was bolstered by continued low mortgage interest rates which were likely a major factor that helped spur demand for housing. The excess inventory of homes from the housing bubble had been whittled down which helped return new home sales to a more historical norm while existing home sales continued to post moderate gains.

For many years, employment growth in the information sector has relied almost exclusively on the strength of software publishing. However in fiscal year 2010, after a run of 27 years, software employment fell 2.6 percent because of restructuring at Microsoft. The sector's employment stabilized in the last half of fiscal year 2010 and began a slow up-turn in fiscal year 2011, growing 0.8 percent. Job gains in subsequent fiscal years were 1.7 percent, 1.6 percent, and 4 percent in fiscal year 2014.

Wholesale trade grew by 3 percent in fiscal year 2014, and retail trade employment increased by 3.5 percent, a characteristic job gain for this point in the economic recovery. There is a concern that this economic expansion is creating an inordinate share of low paid and part-time work—retail trade being the center of that concern.

Professional and business service jobs advanced by 2.5 percent in fiscal year 2014, as the great majority of activities within the sector gained strength over the year. The only weak element in this sector was legal services where many firms have reduced employment in operations and support functions in order to improve efficiency.

Education and health services reported an increase of 2.7 percent during fiscal year 2014. There still remains some uncertainty surrounding the Affordable Care Act which has likely cause some caution in this sector. Leisure and hospitality services recorded a 4 percent increase as demand for food and beverage services strengthened and as hotels and motels experienced higher occupancy rates. Even the public sector posted a 0.6 percent gain thanks primarily to growth in education payrolls.

ECONOMIC OUTLOOK

The forecast for Washington state for fiscal year 2015 reflects the continuation of slow but steady employment growth at both the state and national levels. According to the September 18, 2014, forecast by the state Economic and Revenue Forecast Council, Washington's nonfarm payroll employment is predicted to increase by 2.3 percent in fiscal year 2015, four-tenths of a point quicker than that of the nation. Up until the middle of fiscal year 2010, the economic recovery was characterized by an expansion of existing workers' hours rather than new hiring. In addition, an aggressive cycle of productivity gains through the early period of economic recovery also kept hiring at bay. With the end of the productivity surge in early 2011, employers began to expand their payrolls to increase output in 2012. This pattern held through fiscal year 2014 and should do so again in fiscal year 2015.

Manufacturing employment in Washington is projected to continue its upward course in fiscal year 2015 though at a slow pace. The aerospace industry, which began paring jobs in 2014, is expected to continue doing so in 2015. Even though the output of the 737 production lines has been accelerated, the realignment and relocation of engineering and support activities has resulted in overall declining payrolls. An average of 2,000 fewer workers are expected to be employed in aerospace in fiscal year 2015. Durable manufacturing, aside from the aerospace sector, is expected to grow by 4,000 jobs as business investment and exports boost demand. As a result, primary and fabricated metals, and machinery and electrical equipment, are expected to solidify their employment bases.

The wood products industry was hard hit by both the housing bubble and the slowdown in international trade. But after five years of downward trending employment, the wood products sector began to hold its own in fiscal year 2012 and expand through fiscal year 2014 as the nation's multi-family market and increased residential remodeling helped shore up demand for wood products. With the continued rebound in the housing market, payroll gains of 4.9 percent are expected in fiscal year 2015 as demand for new apartments and single-family homes strengthens. This will also carry into the construction sector.

Nondurable manufacturing gains should be modest in fiscal year 2015. Employment in food manufacturing is expected to ease down by 2 percent. Employment in paper and paper products manufacturing is expected to remain unchanged, while other nondurable manufacturing should increase by 3.9 percent.

In the other non-manufacturing sectors, the strongest employment growth in fiscal year 2015 is predicted in professional and business services which is expected to expand 4.1 percent as business-to-business related activity increases, particularly computer systems design and employment services. Wholesale trade and retail trade jobs are expected to grow 2.8 percent and 2.4 percent respectively. The leisure and hospitality sector should add 2.5 percent more jobs. Transportation, warehousing, and utilities jobs should gain 2.1 percent thanks to the continued strength of international trade through Washington's ports. Software publishing should increase a modest 0.4 percent.

Education and health service jobs should also post a moderate 2.5 percent gain in fiscal year 2015. Health care services have proven to be much less susceptible to economic downturns than other sectors of the economy, although in this recovery employment gains have been below average. The coverage provided by public and private insurers provides the economic buffer for this sector. The impact of the Affordable Care Act is still an uncertainty in regards to employment trends.

Leisure and hospitality jobs are projected to grow 2.5 percent in fiscal year 2015. Travel and dining-out activities were put on hold during the recession. Recent gains have been modest because of the slow growth in overall employment and incomes. Because both overall income and employment are expected to post moderate gains in 2015, so too should the leisure and hospitality sector.

Construction declined by almost 70,000 jobs between fiscal year 2008 and fiscal year 2012. After these four consecutive years of decline the construction sector finally experienced modest rebounds in fiscal years 2013 and 2014 thanks to the emerging recovery in the housing markets. Payrolls are expected to increase by 6.4 percent in fiscal year 2015 because of the growing demand for rental apartments and moderate increases in single family construction and remodeling.

Employment in financial activities will remain slow because of continued difficulties among state chartered banks; many of whom were over-exposed in commercial building loans when the market weakened. Those banks that survived the shake-out have been directed by the Federal Deposit Insurance Corporation to strengthen their balance sheets, which in some ways has been detrimental to small business lending activity. Payrolls are expected to post a 1 percent gain in fiscal year 2015.

Federal government payrolls will likely remain unchanged in fiscal year 2015. Federal employment has been mixed because of the easing of defense-related federal expenditures and budget conflicts. State and local government employment should increase by 1.3 percent, primarily in local government and state education, as the rebound in the labor markets and increases in consumer spending result in moderate gains in revenue collections.

Washington's personal income is expected to grow by 4.6 percent in fiscal year 2015, a bit quicker than the 4.4 percent growth in U.S. personal income for the same period. Employment is expected to maintain its current rate of growth in fiscal year 2015, and as a result, the wage component of personal income should grow at a 4.7 percent pace. Because of the declines in unemployment, slow though they may have been, the use of unemployment compensation, an important component of personal income, is expected to decline by over 32.1 percent in fiscal year 2015. Proprietors' income is projected to grow at a 4.2 percent clip in fiscal year 2015 as entrepreneurs capture gains as the economy grows. Dividends, interest, and rents will grow at a 3.7 percent pace as financial markets moderate from their extended recovery.

Major Initiatives

As Washington's economy continues its slow recovery from the Great Recession, state revenue collections are also rebounding. But revenue collections are growing at a much slower pace than after previous recessions — and certainly not fast enough to meet growing demands for state services, let alone a Washington Supreme Court mandate to increase funding for K-12 education.

Given these realities, the state faces significant fiscal challenges heading into its 2015–17 budget cycle. As of September 2014, the Office of Financial Management was projecting a potential budget shortfall of \$3 billion or more for the 2015–17 biennium.

Washington, with its heavy reliance on sales taxes, was particularly hard hit by the Great Recession and the toll it took on consumer confidence. And now, as the economy recovers, state revenue collections are not keeping pace with the growth of the economy. This phenomenon has become more evident in recent years and is the result of a variety of factors, such as the shift in consumer spending to untaxed services and online purchases as well as tax cuts the state has enacted.

Washington Gov. Jay Inslee and the Legislature will face a number of unique budget challenges for the 2015–17 biennium and beyond.

Under legislation approved in 2012, Washington became the only state in the nation required to pass a budget that balances spending against anticipated revenue over a four-year period. To this end, the Legislature created a State Budget Outlook Work Group to develop longer-term revenue and expenditure outlooks. The work group is composed of members from the Office of Financial Management, Legislative Evaluation and Accountability Program, Office of the State Treasurer, Economic and Revenue Forecast Council, Caseload Forecast Council, and legislative budget committees.

Meanwhile, the state continues to struggle with meeting the requirements of the state Supreme Court's 2012 McCleary ruling that for years the state has failed to meet its constitutional "paramount duty" to amply fund basic education. Under that ruling, the state will need to increase K-12 spending by more than \$3 billion over the next four years.

The state made progress in the 2013–15 budget toward meeting its basic education funding obligation, but not enough progress to satisfy the court. In September 2014, the court found the state in contempt for failing to produce a long-term basic education funding plan and threatened sanctions if such a plan is not in place by the end of the 2015 legislative session.

In the face of these fiscal challenges, Gov. Inslee has emphasized that the state's number one priority is revitalizing Washington's economy and building a 21st century workforce. "To do that," he says, "we must start with a strong commitment to education — and we must ensure that our investments get results."

In developing his recommendations for the 2015–17 budget, Gov. Inslee's priorities are to meet the requirements of the McCleary decision, protect the most vulnerable, ensure public safety and address a backlog of public employee compensation issues.

BETTER MANAGEMENT OF STATE GOVERNMENT

Washington is building on its history as a leader in adapting proven private-sector principles to state government. Gov. Inslee's Results Washington initiative, launched in 2013, is a groundbreaking, cross-agency effort to focus on key goals in education, the economy, environment, health, safety and government efficiency. By setting clear objectives and continually tracking results, the state will be better equipped to engage its employees, partners and the public in building a healthier, better-educated and more prosperous Washington.

A key tenet of this effort is transparency and accountability. Gov. Inslee meets monthly with state agency directors to discuss progress, challenges and next steps. The meetings, called <u>Results Reviews</u>, are streamed live over the Internet and broadcast statewide on cable TV. Goals, improvement strategies and data sets are frequently updated online at https://data.results.wa.gov.

Underlying much of this improvement work is Lean, a management philosophy that has proven highly effective at improving efficiency and customer focus in the health care, aerospace, retail and other industry sectors. Lean is increasingly being put to use in government, from the city to federal levels. It encourages employee problem-solving. Lean efforts have already helped the state and its customers avoid millions of dollars in costs and significantly improved customer service. A few examples:

- By sharply cutting wait time for reconsideration of audit findings, the Department of Labor and Industries saved employers an estimated \$1.7 million in interest costs.
- The Department of Social and Health Services streamlined a widely used personnel form and various processes, eliminating the need for 8,000 approval signatures and saving 2,133 hours of staff time each month.
- Consolidated Technology Services automated a monthly report about service desk workload so a manual process that used to take 24 to 30 hours of staff time every month takes minutes. The saved staff time is now used on other work, including direct customer service.
- The Department of Transportation eliminated an 8.5-month backlog of collision data reports. Fully analyzed collision records used by insurers and road engineers, and for law enforcement emphasis patrols are now processed in five days.

Results Washington has also recruited more than 200 Lean partners, including dozens from some of the state's largest corporations and nonprofits. At no cost to taxpayers, these partners have provided valuable training, advice and guidance to thousands of state employees, helping them learn and use Lean. Results Washington has leveraged this help by pairing partners with state employees who take part in a revolving, one-year Lean fellowship program.

EDUCATION

To meet the state's obligations under McCleary, the Governor and the Legislature adopted a number of reforms in the 2013–15 budget, providing \$1 billion of new funding for the state's schools. The state's two-year budget:

- Increased funding to school districts for materials, supplies and operating costs by \$432 million.
- Put an additional \$132 million toward pupil transportation to fully fund the state's obligation.
- Added \$143 million to the state's Learning Assistance Program to increase the number of instructional hours provided from 1.5 hours to 2.4 hours per week per funded student.
- Provided \$104 million to reduce kindergarten and first-grade class sizes for high-poverty schools and \$90 million to expand full-day kindergarten in high-poverty schools.

The 2013–15 budget also provided additional funding to increase instructional hours and graduation requirements for students in grades 9 to 12, improve bilingual instruction, and extend new teacher mentoring.

In addition, the 2013–15 budget was passed with no tuition increases in the public higher education sector, bringing relief to thousands of students and families across the state. The state continued to fund a robust student financial aid program for low-income students through the State Need Grant and College Bound Scholarship programs. The state also expanded enrollments for computer science, engineering and aerospace training.

HEALTH CARE

Access to health care has increased dramatically in Washington since the 2010 passage of the federal Patient Protection and Affordable Care Act, which gave individuals and small businesses a means to choose affordable, high-quality health insurance coverage. About 150,000 people have been enrolled for private insurance through the state's health insurance exchange — Washington Healthplanfinder. Washington also opted to expand its Medicaid program under the Affordable Care Act, providing coverage to 400,000 newly eligible adults. As a result, during a six-month span the percentage of Washington residents without health insurance fell from 16 percent to 11 percent.

Besides improving access to health care, the state has undertaken a number of initiatives to drive down costs and improve people's health.

For example, the state is working to integrate mental health and substance abuse treatment in primary medical care. And, under legislation passed in 2014, the state will begin implementing an all-payer claims database that will dramatically improve the transparency of health care costs.

The Governor also launched his <u>Healthiest Next Generation</u> initiative, a public-private partnership that will develop strategies to reduce obesity in children through such avenues as promoting breastfeeding, supporting schools in providing more nutritious meal and drink options, and encouraging children to be more active.

The Governor's Aging Summit was convened to help the state prepare for the needs of an aging population. The summit generated numerous policy recommendations, such as the need for key investments in long-term care and nursing homes. The summit also resulted in legislation to implement the Community First Choice Option and develop an Alzheimer's state plan.

ECONOMIC DEVELOPMENT

Gov. Inslee, through his "Washington Competes" agenda, continues to revitalize the state's economy, create jobs and ensure we have workers with the skills to fill those jobs. In pursuit of that agenda, he secured funding for the Department of Commerce to hire specialists dedicated to growing specific areas of our state's economy, including the life sciences and global health, information and communications technology, clean technology, maritime and military sectors. The state created a new Work Start program to match education and workforce training with employer needs, a key business recruitment and retention tool. The state is also continuing work on a one-stop Web portal for businesses to simplify their interactions with state government. The Governor championed and signed legislation ensuring the next generation of airplanes will be built in Washington.

ENVIRONMENT AND ENERGY

Gov. Inslee continues to engage lawmakers in a bipartisan discussion on how to tackle the issue of carbon pollution, a cornerstone of his agenda. In April, the Governor signed Executive Order 14-04 "Washington Carbon Pollution Reduction and Clean Energy Action."

The executive order created the Carbon Emission Reduction Taskforce to provide recommendations on the design and implementation of a carbon emission limits and market mechanisms program for Washington. It also directs:

- The Department of Transportation to develop an action plan to advance the development and use of
 electric vehicles; identify and implement opportunities to increase statewide investment in
 multimodal transportation; and develop a long-range statewide transportation plan to boost
 efficiency and cut both costs and greenhouse gas emissions.
- The Department of Commerce to develop recommendations for a new state program to support
 research institutions, utilities and businesses to develop, demonstrate and deploy new renewable
 energy and energy efficiency programs. In addition, the agency is to develop a new state program to
 improve the energy performance of public and private buildings.
- The Office of Financial Management to analyze the technical feasibility and economic impact of adopting a clean transportation fuel standard that reduces fuels carbon intensity over time.
- All state agencies to develop recommendations for improving efficiencies and reducing emissions from state government operations.

Washington is experiencing rapid changes in how crude oil is moving through rail corridors and over Washington waters, which creates new safety and environmental risks. As petroleum shipments from Alaska decline, transport of crude oil from the Bakken region via rail is increasing. The Legislature directed state agencies to assess the risk and develop recommendations to increase public safety and improve oil spill prevention and response readiness. Gov. Inslee issued a directive requiring state agencies to provide initial findings and recommendations by October 1, 2014.

Awards and Acknowledgements

The Government Finance Officers Association (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to Washington state for its CAFR for the fiscal year ended June 30, 2013. The Certificate of Achievement is a prestigious national award, recognizing conformance with the highest standards for preparation of state and local government financial reports.

State of Washington

To be awarded a Certificate of Achievement, a governmental unit must publish an easily readable and efficiently organized CAFR, with contents conforming to program standards. Such reports must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. Washington state has received a Certificate of Achievement for the past 27 years. The Office of Financial Management considers this report to be in conformity with the Certificate of Achievement Program requirements, and will submit it to the GFOA.

The preparation of this report could not have been accomplished without the professionalism and dedication demonstrated by the financial and management personnel of each state agency and institution of higher education and the Office of Financial Management. This CAFR reflects the Governor's commitment to the Legislature, the citizens of Washington state, and the financial community to maintain financial statements in conformance with the highest standards of financial accountability.

Sincerely,

/s/

Washington State Auditor Troy Kelley

INDEPENDENT AUDITOR'S REPORT

October 31, 2014

The Honorable Jay Inslee Governor, State of Washington

REPORT ON FINANCIAL STATEMENTS

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund and the aggregate discretely presented component units and remaining fund information of the State of Washington, as of and for the year ended June 30, 2014, and the related notes to the financial statements, which collectively comprise the State's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of the Department of Retirement Systems, Local Government Investment Pool, University of Washington, and the funds managed by the State Investment Board. Those financial statements represent part or all of the total assets, net position, and revenues or additions of the governmental activities, the business-type activities, each major fund, and the aggregate discretely presented component units and remaining fund information as follows:

| | | | Percent of |
|---|--------------|-----------------|------------------|
| | | Percent of | Total |
| | Percent of | Net | Revenues/ |
| Opinion Unit | Total Assets | Position | Additions |
| Governmental Activities | 13.6% | 23.6% | 9.0% |
| Business-Type Activities | 75.3% | 100% | 36.7% |
| Higher Education Special Revenue Fund | 53.1% | 53.4% | 50.3% |
| Higher Education Endowment Fund | 96.4% | 96.4% | 100.0% |
| Higher Education Student Services Fund | 68.9% | 72.1% | 82.1% |
| Workers' Compensation Fund | 95.5% | 100% | 33.1% |
| Guaranteed Education Tuition Program Fund | 88.1% | 100% | 72.8% |
| Aggregate Discretely Presented Component | | | |
| Units and Remaining Fund Information | 92.0% | 93.9% | 71.4% |

Those financial statements were audited by other auditors whose reports thereon have been furnished to us, and our opinion, insofar as it relates to the amounts included for the above mentioned entities and funds, are based solely on the reports of other auditors.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement. The financial statements of the Department of Retirement Systems, Local Government Investment Pool, University of Washington, and the funds managed by the State Investment Board were not audited in accordance with Government Auditing Standards.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the State's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the State's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinion

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund and the aggregate discretely presented component units and remaining fund information of the State of Washington, as of June 30, 2014, and the respective changes in financial position and, where

applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Matters of Emphasis

As explained in Note 1.D.1, the financial statements include pension trust fund investments valued at \$29.6 billion which comprise 26.9% of total assets and 28.9% of net position of the aggregate discretely presented component units and remaining fund information. The fair values of these investments have been estimated by management in the absence of readily determinable fair values. Management's estimates are based on information provided by the fund managers or, in the case of investments in partnerships, the general partners. Our opinion was not modified with respect to this matter.

As described in Note 2, during the year ended June 30, 2014, the State has implemented the Governmental Accounting Standards Board Statement No. 67, Financial Reporting for Pension Plans – an amendment of GASB Statement No. 25 and Statement No. 70, Nonexchange Financial Guarantees. Our opinion is not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis on pages 25 through 37, budgetary comparison information on pages 165 through 170, information on postemployment benefits other than pensions on page 182, infrastructure modified approach information on pages 183 through 186 and pension trust fund information on pages 171 through 182 be presented to supplement the Such information, although not a part of the basic financial basic financial statements. statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic or historical context. We and the other auditors have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary and Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State's basic financial statements. The accompanying information listed as combining financial statements and individual fund schedules on pages 189 through 241 is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. This information has been subjected to auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to

prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America by us and other auditors. In our opinion, based on our audit, the procedures performed as described above, and the reports of the other auditors, the information is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

The information identified in the table of contents as the introductory and statistical sections is presented for purposes of additional analysis and is not a required part of the basic financial statements of the State. Such information has not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on it.

OTHER REPORTING REQUIRED BY GOVERNMENT AUDITING STANDARDS

In accordance with *Government Auditing Standards*, we will also issue our report dated October 31, 2014, on our consideration of the State's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. That report will be issued under separate cover in the State's Single Audit Report. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the State's internal control over financial reporting and compliance.

Sincerely,

TROY KELLEY STATE AUDITOR

Twy X Kelley

OLYMPIA, WA

MD&A Management's Discussion and Analysis

This page intentionally left blank.

MD&A

Management's Discussion & Analysis

As managers of the state of Washington, we offer this narrative overview and analysis of the financial activities for the fiscal year ended June 30, 2014. We present this information in conjunction with the information included in our letter of transmittal, which can be found preceding this narrative, and with the state's financial statements, which follow. All amounts, unless otherwise indicated, are expressed in thousands of dollars.

Financial Highlights

- Total assets and deferred outflows of the state of Washington exceeded its liabilities and deferred inflows by \$22.93 billion (reported as net position). Of this amount, \$(7.92) billion was reported as "unrestricted net position." A negative balance indicates that no funds were available for discretionary purposes.
- The state of Washington's governmental funds reported a combined ending fund balance of \$13.41 billion, an increase of 7.9 percent compared with the prior year as restated.
- While the state's capital assets increased by \$1.03 billion and total bond debt increased by \$1.12 billion during the current fiscal year, the state's net investment in capital assets is \$20.44 billion.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the state of Washington's basic financial statements, which include three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. The focus is on both the state as a whole (government-wide) and the major individual funds. The dual perspectives allow the reader to address relevant questions, broaden a basis for comparison (year-to-year or government-to-government), and enhance the state's accountability.

GOVERNMENT-WIDE FINANCIAL STATEMENTS

The government-wide financial statements are designed to provide readers with a broad overview of the state of Washington's finances, in a manner similar to a private sector business.

Statement of Net Position. The Statement of Net Position presents information on all of the state of Washington's assets, deferred outflows of resources, liabilities, and deferred inflows of resources with the difference reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the state of Washington is improving or deteriorating.

Statement of Activities. The Statement of Activities presents information showing how the state's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused vacation leave). The Statement of Activities is focused on both the gross and net cost of various activities (including governmental, business-type, and component unit). This is intended to summarize and simplify the reader's analysis of the revenues and costs of various state activities and the degree to which activities are subsidized by general revenues.

Both of these government-wide financial statements distinguish functions of the state of Washington that are principally supported by taxes and intergovernmental revenues (governmental activities) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (business-type activities).

The governmental activities of the state of Washington include education, human services, transportation, natural resources, adult corrections, and general government.

The business-type activities of the state of Washington include the workers' compensation and unemployment compensation programs, as well as Washington's lottery, the Guaranteed Education Tuition Program (GET), and various higher education student services such as housing and dining.

The government-wide financial statements can be found on pages 40-43 of this report.

FUND FINANCIAL STATEMENTS

A fund is a group of related accounts used to maintain control over resources that are segregated for specific activities or objectives. The state of Washington, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the state can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

Governmental Funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on fund balances at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements. In particular, unassigned fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for three major funds and an aggregate total for all nonmajor funds. The state's major governmental funds are the General Fund, Higher Education Special Revenue Fund, and the Higher Education Endowment Fund. Individual fund data for the state's nonmajor governmental funds are provided in the form of combining statements elsewhere in this report. The governmental fund financial statements can be found on pages 46-49 of this report.

Proprietary Funds. The state of Washington maintains two different types of proprietary funds. Enterprise funds are used to report the same functions presented as business-type activities in the government-wide financial statements. Internal service funds represent an accounting device used to accumulate and allocate costs internally among the state of Washington's various functions. The

state of Washington uses internal service funds to account for general services such as motor pool, central stores, data processing services, risk management, employee health insurance, and printing services. Because internal service funds predominately benefit governmental rather than business-type functions, they have been included within governmental activities in the government-wide financial statements.

Proprietary fund financial statements provide the same type of information as the government-wide financial statements, but in greater detail. The proprietary fund financial statements provide separate information for the Workers' Compensation Fund, Unemployment Compensation Fund, the Higher Education Student Services Fund, and the Guaranteed Education Tuition Program Fund, which are considered to be major funds, as well as an aggregated total for all nonmajor enterprise funds.

The internal service funds are combined for presentation purposes. Individual fund data for the state's nonmajor proprietary funds are provided in the form of combining statements elsewhere in this report. The proprietary fund financial statements can be found on pages 50-59 of this report.

Fiduciary Funds. Fiduciary funds are used to account for resources held for the benefit of parties outside the government. Fiduciary funds are not reflected in the government-wide financial statements because the resources of those funds are not available to support the state of Washington's own programs. Washington's fiduciary funds include state administered pension plans. The accounting used for fiduciary funds is much like that used for proprietary funds. Individual fund data for the state's fiduciary funds are provided in the form of combining statements elsewhere in this report. The fiduciary fund financial statements can be found on pages 60-61 of this report.

Component Units. Component units that are legally separate from the state and primarily serve or benefit those outside the state are discretely presented. They are either financially accountable to the state, or have relationships with the state such that exclusion would cause the state's financial statements to be misleading or incomplete. The state discretely reports four major component units, the Valley Medical Center, Northwest Hospital, the Washington State Public Stadium Authority and the Health Benefit Exchange, as well as four nonmajor component units. Refer to Note 1 on pages 69-70 for more detailed information. Individual fund data for the state's nonmajor component units are provided in the form of combining statements elsewhere in this report. The component unit financial statements can be found on pages 62-65 of this report.

NOTES TO THE FINANCIAL STATEMENTS

The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages 67-161 of this report.

OTHER INFORMATION

In addition to this discussion and analysis, this report also presents required supplementary information on budgetary comparisons, pension plans and other postemployment benefits information, and infrastructure assets reported using the modified approach.

Required supplementary information can be found on pages 165-186 of this report.

The combining statements referred to earlier are presented immediately following the required supplementary information. Combining financial statements and individual fund schedules can be found on pages 189-241 of this report.

Government-wide Financial Analysis

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. For the state of Washington, total assets and deferred outflows of resources exceed liabilities and deferred inflows of resources by \$22.93 billion at June 30, 2014, as compared to \$21.48 billion as reported at June 30, 2013.

The largest portion of the state's net position (89.2 percent for fiscal year 2014 as compared to 95.2 percent for fiscal year 2013) reflects its net investment in capital assets (e.g., land, buildings, equipment, and intangible assets), less any related debt used to acquire those assets that is still outstanding. The state of Washington uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending.

Although the state of Washington's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be

provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

A portion of the state of Washington's net position (45.4 percent for fiscal year 2014 as compared to 46.5 percent for fiscal year 2013) represents resources that are subject to external restrictions on how they may be used. The remaining balance of \$(7.92) billion represents unrestricted net position. The state's overall negative balance in unrestricted net position is caused by deficits in business-type activities.

In governmental activities, net position increased from \$26.34 billion in fiscal year 2013 to \$26.80 billion in fiscal year 2014. The increase reflects increases in grants and tax revenues that outpaced the increases in expenses.

In business-type activities, the majority of the deficit is caused by the workers' compensation program that

provides time-loss, medical, disability, and pension payments to qualifying individuals who sustain workrelated injuries or develop occupational diseases as a result of their required work activities.

The main benefit plans of the workers' compensation program are funded on rates that will keep the plans solvent in accordance with recognized actuarial principles. The supplemental pension cost-of-living adjustments (COLAs) granted for time-loss and disability payments, however, are funded on a pay-as-you-go basis. By statute, the state is only allowed to collect enough revenue to fund the current COLA payments.

As previously mentioned, the state's activities are divided between governmental and business-type. The majority of support for governmental activities comes from taxes and intergovernmental grants, while business-type activities are supported primarily through user charges.

STATE OF WASHINGTON

Governmental Activities. Governmental activities resulted in an increase in the state of Washington's net position of \$916.8 million. A number of factors contributed to the increase:

- Tax revenues increased by \$777.0 million in fiscal year 2014 as compared to fiscal year 2013 reflecting positive growth in the economy. Sales and use taxes reported an increase of \$654.8 million. Sales and use taxes are the main tax revenue for governmental activities. Real estate excise tax revenue increased by \$71.7 million. Real estate excise taxes are levied on the sale of real estate. These tax revenue increases reflect the slowly rebounding economy, recovering housing markets, and improving employment picture in Washington.
- Charges for services increased by \$100.4 million in fiscal year 2014 compared to fiscal year 2013. Increases in fiscal year 2014 as compared with fiscal year 2013 included \$104.1 million in the state's federally approved hospital safety net assessment, \$43.2 million in timber sales, \$36.7 million in motor vehicle license and operator license revenues, and \$14.9 million in tolling revenues.

These increases were offset by a decrease of \$104.4 million in fiscal year 2014 related to liquor distributor license fees which were assessed in fiscal year 2013 as a one-time charge when the state privatized liquor retail sales and distribution. Tuition and fee revenues at higher education institutions held steady in fiscal year 2014 compared with fiscal year 2013.

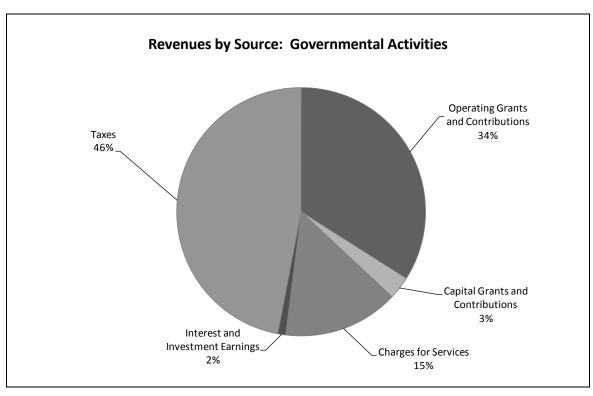

- Operating grants and contributions grew by \$1.21 billion in fiscal year 2014 compared with 2013 and was matched with an increase in human services expenses. The increases in both grant revenue and human services expenditures are largely due to the state expansion of its Medicaid program under the Affordable Care Act providing coverage to 400,000 newly eligible adults.
- Expenses grew by \$676.0 million for K-12 education in 2014 as compared to fiscal year 2013. The state is working to meet the requirements of the state Supreme Court's 2012 McCleary ruling to meet its constitutional duty to fund basic education.

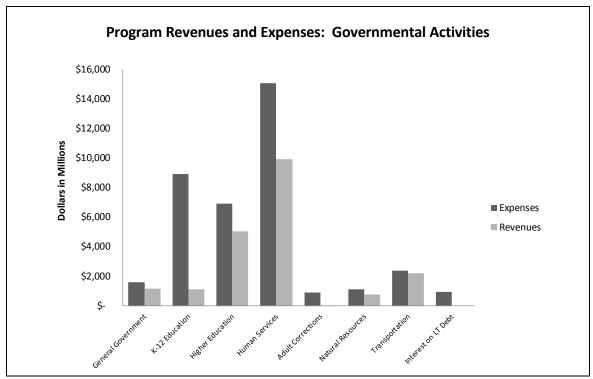

Business-Type Activities. Business-type activities increased the state of Washington's net position by \$905.6 million. Workers' compensation, unemployment compensation, and guaranteed education tuition activities contributed to the increase. Key factors contributing to the operating results of business-type activities are:

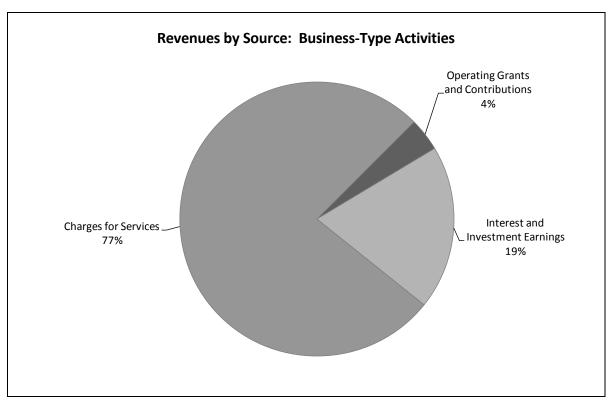

- The workers' compensation activity increase in net position in fiscal year 2014 was \$240.4 million compared to a decrease of \$925.9 million in fiscal year 2013. Premium revenue increased by \$76.9 million as a result of an increase in the number of hours reported by employers, a mid-year premium rate increase, and an increase in the number of hours reported by businesses in higher rate classes. Claim costs decreased by \$204.1 million in fiscal year 2014 compared with fiscal year 2013 reflecting a reduction in the number of time-loss claims. Nonoperating investment income increased by \$896.7 million due predominately to a net increase in realized and unrealized gains on debt securities. The workers' compensation portfolio is 84.9 percent debt securities.
- The unemployment compensation activity reported an operating income in fiscal year 2014 of \$272.6 million, compared to \$174.3 in fiscal year 2013. Washington's unemployment insurance program is an experiencebased system with the largest part of an individual employer's tax rate being based on the employer's layoff experience over the past four years. The economic recovery in the state has stabilized employment and resulted in a decline in unemployment insurance benefits of \$602.9 million in fiscal year 2014 over fiscal year 2013. The decrease in benefit costs was the result of a decline in both the number of claims and the duration of the claims. The unemployment rate for the state for June 2014 was 5.4 percent, down from 7.0 percent in June 2013, and the insured rate declined to 1.8 percent in fiscal year 2014 from 2.2 percent in fiscal year 2013. While the state's unemployment insurance premiums are experienced based and the unemployment rate is declining, premium revenue increased by 3.1 percent reflecting a growing workforce and higher taxable wage base. The \$545.5 million decline in federal aid also reflects the decrease in the unemployment rate.
- The Guaranteed Education Tuition (GET) program reported an increase in net position of \$322.1 million in spite of the fact that the number of tuition units sold dropped for the third straight year. Two factors contributed to the increase in net position and simultaneously made other long-term investment options more attractive to customers resulting in the decline in the number of tuition units sold. First, investment returns were 16.4 percent in fiscal year 2014 compared with 9.6 percent in fiscal year 2013. Secondly, tuition did not increase at state universities for the second year in a row. Since the pay-out value of a tuition unit is based on in-state undergraduate resident tuition and fees at the state's highest priced public university, the GET payout value remained unchanged.

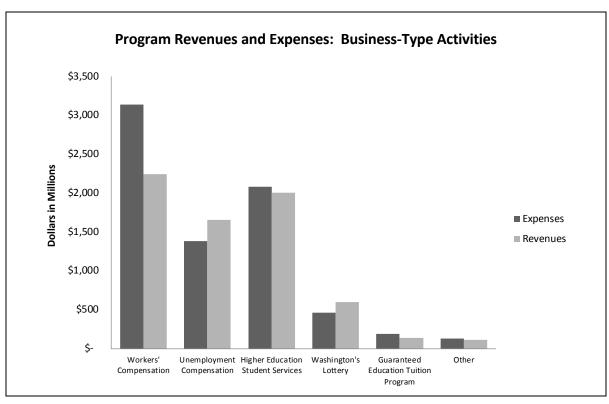

The slow tuition growth over the past two years combined with positive investment results improved GET's funded status to 106 percent at June 30, 2014.

 The remaining business-type activities reported relatively proportional increases in both operating revenues and expenses when compared to the prior year.

Financial Analysis of the State's Funds

As noted earlier, the state of Washington uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental Funds. As previously discussed, the focus of the state of Washington's governmental funds is to provide information on near-term inflows, outflows, and fund balances. Such information is useful in assessing the state of Washington's financing requirements.

Adjustments to Beginning Fund Balances. As described in Note 2 to the financial statements on pages 80 and 81, beginning fund balances of governmental funds were adjusted to correct prior period activity.

Fund Balances. At June 30, 2014, the state's governmental funds reported combined ending fund balances of \$13.41 billion. Of this amount, \$2.49 billion or 18.6 percent is nonspendable, either due to its form or

legal constraints, and \$4.42 billion or 33.0 percent is restricted for specific programs by external constraints, constitutional provisions or contractual obligations. An additional \$5.28 billion or 39.4 percent of total fund balance has been committed to specific purposes. Committed amounts cannot be used for any other purpose unless approved by the Legislature. An additional \$880.0 million or 6.6 percent of total fund balance has been assigned to specific purposes by management.

The General Fund is the chief operating fund of the state of Washington. As noted in the table below, fund balance improved as a result of operations by \$443.5 million in fiscal year 2014, as compared to a \$375.0 million gain in fiscal year 2013. Increased revenues from taxes and federal grants-in-aid and concerted effort to hold the line on spending were the key contributing factors. Assigned fund balance of \$880.0 million is reported for fiscal year 2014 and relates to certain accrued and non-cash revenues which are not considered by management to be available for budgetary purposes.

| STATE OF WASHINGTON General Fund (in millions of dollars) | | | | | | | | | | | |

| Net increase (decrease) in fund balance | \$ 444 | \$ 375 | \$ 69 | | | | | | | | |

General Fund expenditures continue to be concentrated in services and programs most vital to citizens – primarily human services and public education.

In addition to the General Fund, the state reports the Higher Education Special Revenue and the Higher Education Endowment Funds as major governmental funds. Significant changes are as follows:

- The change in net position of the Higher Education Special Revenue Fund in fiscal year 2014 was \$140.6 million compared to \$347.5 million in fiscal year 2013.
 The decline in fiscal year 2014 was largely due to a decline in revenue from charges for services of 4.0 percent combined with a 2.8 percent increase in expenditures.
- The fund balance for the Higher Education Endowment Fund increased by \$6.8 million in fiscal year 2014. An overall net increase in fund balance of \$407.8 million from current year activity was offset by a correction of a prior period accounting error which decreased fund balance by \$401.1 million. Fiscal year 2014 reported an increase of \$148.7 million in investment earnings.

Proprietary Funds. The state of Washington's proprietary funds provides the same type of information found in the government-wide financial statements, but in more detail. Significant changes are as follows:

- The Workers' Compensation Fund reported an increase in net position of \$240.4 million in fiscal year 2014. Operating revenues increased by \$83.0 million and operating expenses decreased by \$187.1 million as compared to fiscal year 2013. As previously reported, operating revenues increased due to an increase in reported hours in higher rate classes and claims expense decreased due to a reduction in the number of time-loss claims. Investment income increased \$896.7 million over fiscal year 2013 due to an increase in net realized and unrealized capital gains.
- Washington's Unemployment Compensation Fund reported an increase in net position of \$345.3 million. As reported previously, premium revenue increased reflecting a growing workforce and higher taxable wage base. Unemployment benefit claims expense decreased by \$602.9 million in fiscal year 2014 as compared to 2013 and federal aid decreased by \$545.5 million over the same period. The decreases in both benefit claims and federal aid are consistent with the decline in the state's unemployment rate.

- The Guaranteed Education Tuition (GET) Program Fund reported an increase in net position of \$322.1 million in fiscal year 2014. As previously reported, the increase is due primarily to strong investment returns and the fact that tuition did not increase at the state's universities for the second straight year.
- The Higher Education Student Services Fund and the nonmajor enterprise funds reported activity fairly consistent with the prior year.

General Fund Budgetary Highlights

Differences between the original budget of the General Fund and the final amended budget reflect increases in mandatory costs driven by rising caseloads and school enrollment as well as other high priority needs. Changes to estimates are summarized as follows:

- Estimated biennial resources increased by \$1.18 billion over the course of the first year of the biennium. The major increase in estimated resources is reported in federal grants-in-aid reflecting additional funding available to cover state programs.
- Appropriated expenditure authority increased by \$894.2 million over the first fiscal year of the biennium to address increases in mandatory and high priority programs. The major increases in appropriation authority were in human services and education. The availability of additional federal funding, rising caseloads, and high priority needs were the main drivers of the increases.

The state did not overspend its legal spending authority for the 2013-2015 biennium. Actual General Fund revenues and expenditures were 49.1 and 48.2 percent of final budgeted resources and appropriations, respectively, for the first fiscal year of the 2013-2015 biennium.

Capital Assets, Infrastructure, and Bond Debt Administration

Capital Assets. The state of Washington's investment in capital assets for its governmental and business-type activities as of June 30, 2014, totaled \$39.23 billion (net of accumulated depreciation). This investment in capital assets includes land, infrastructure, museum and historical collections, buildings and other improvements, furnishings, equipment, and intangible assets, as well as construction in progress.

Washington's fiscal year 2014 investment in capital assets, net of current year depreciation, increased \$1.03 billion over fiscal year 2013, including increases to the state's transportation infrastructure of \$777.4 million. The state's construction in progress includes both new construction and major improvements to state capital facilities and infrastructure. Remaining commitments on these construction projects total \$2.72 billion.

Additional information on the state of Washington's capital assets can be found in Note 6 beginning on page 110 of this report.

Infrastructure. The state uses the modified approach for reporting selected infrastructure assets. The modified approach requires that the state meet certain requirements regarding the inventory and maintenance of eligible capital assets, including condition assessments. Under the modified approach, assets are not depreciated and certain maintenance and preservation costs associated with those assets are expensed. Assets accounted for under this approach include approximately 20,692 lane miles of pavement, 3,286 bridges, and 48 highway safety rest areas. Infrastructure asset categories are assessed on a two year cycle, either on a calendar year or fiscal year basis.

| Total | \$ | 36,375 | \$ | 35,435 | \$ | 2,850 | \$ | 2,761 | \$ 39,225 | \$ | 38,196 |

The state's goal is to maintain 90 percent of pavements, 95 percent of bridges, and 95 percent of safety rest areas at a condition level of fair or better. The condition of these assets, along with the rating scales for pavements, bridges, rest areas, and additional detail comparing planned to actual preservation and maintenance spending are available in the required supplementary information beginning on page 183.

The most recent pavements condition assessment indicates that 92.8 percent of pavements were in fair or better condition. The condition of pavements has remained steady in the last three assessment periods, averaging 92.2 percent in fair or better condition. For fiscal year 2014, actual maintenance and preservation expenditures were

16.9 percent higher than planned, and over the past five fiscal years, the actual expenditures were 3.1 percent lower than planned.

The most recent bridge condition assessment indicates that 91.4 percent of bridges were in good or fair condition. The condition of bridges has declined over the last three assessment periods, averaging 94.8 percent in good or fair condition. For fiscal year 2014, the actual maintenance and preservation expenditures were 5.3 percent lower than planned, and over the past five fiscal years, the actual expenditures were 9.7 percent lower than planned.

Bond Debt. At the end of fiscal year 2014, the state of Washington had general obligation bond debt outstanding of \$18.96 billion, an increase of 4.1 percent from fiscal year 2013. This debt is secured by a pledge of the full faith and credit of the state. Additionally, the state had authorized \$6.48 billion general obligation debt that remains unissued.

General obligation debt is subject to the limitation prescribed by the State Constitution. The aggregate debt contracted by the state as of June 30, 2014, does not exceed that amount for which payments of principal and interest in any fiscal year would require the state to expend more than 9 percent of the arithmetic mean of its general state revenues for the three immediately preceding fiscal years. The arithmetic mean of its general state revenues for fiscal years 2012, 2013, and 2014 is \$13.25 billion. The debt service limitation, 9 percent of this mean, is \$1.19 billion. The state's maximum annual debt service as of June 30, 2014, subject to the constitutional debt limitation is \$1.13 billion, or \$66.7 million less than the debt service limitation.

For further information on the debt limit, refer to the statistical section on page 266 of this report or the Certification of the Debt Limitation of the State of Washington, available from the Office of the State Treasurer at:

http://www.tre.wa.gov/documents/debt_cdl2014.pdf.

By statutory provision, the State Finance Committee (SFC) is authorized to supervise and control the issuance of all state bonds, notes, or other evidences of indebtedness. The SFC is composed of the Governor, Lieutenant Governor, and State Treasurer, the latter serving as chairman.

As of June 30, 2014, the state of Washington's general obligation debt was rated Aa1 by Moody's Investor Service, AA+ by Standard & Poor's Rating Group (S & P), and AA+ by Fitch Ratings.

| | | STATE OF WAS Bond D (in millions o | ebt | | | |
|--|-----------|--|----------|----------|-----------|-----------|
| | | nmental vities | Tot | al. | | |
| | 2014 | 2013* | Activ | 2013* | 2014 | 2013 |
| General obligation (GO) bonds Accreted interest on zero | \$ 18,954 | \$ 18,200 | \$ 8 | \$ 11 | \$ 18,962 | \$ 18,211 |
| interest rate GO bonds | 416 | 439 | - | - | 416 | 439 |
| Revenue bonds | 1,894 | 1,638 | 2,236 | 2,098 | 4,130 | 3,736 |
| Total | \$ 21,264 | \$ 20,277 | \$ 2,244 | \$ 2,109 | \$ 23,508 | \$ 22,386 |

The state had revenue debt outstanding at June 30, 2014, of \$4.13 billion, an increase of \$394.3 million over fiscal year 2013. This increase is primarily related to grant anticipation revenue bonds issued by the Washington State Department of Transportation and revenue bonds issued by state colleges and universities. This debt is not supported or intended to be supported by the full faith and credit of the state. Revenue bond debt is generally secured by specific sources of revenue. The exception is the University of Washington which issues general revenue bonds that are payable from general revenues of the university.

General obligation and revenue bonds totaling \$697.2 million were refunded during the year. Washington's refunding activity produced \$136.4 million in gross debt service savings.

Additional information on the state's bond debt obligations is presented in Note 7 beginning on page 114 of this report.

Conditions with Expected Future Impact

Economic Outlook. Washington is well positioned for economic and population expansion. The state has a diverse industrial and environmental base that supports trade with Pacific Rim countries as well as knowledge-based industries including information, health, business, and financial services.

That said, in the coming year, legislative leaders and management will be facing a number of challenges including:

- Weak growth in Europe and slowing Asian growth remain significant threats to the U.S. economy.
- Federal fiscal policy remains a drag on economic growth through contractionary spending and tax policies. Monetary policy remains accommodative, but rate increases are expected next year.
- Washington's economy continues to grow at a moderate pace.
- As Washington's economy continues its slow recovery, state revenue collections are rebounding, but at a much slower pace than following previous recessions. Washington's heavy reliance on sales taxes is feeling the impact of the lingering effect of the recession on consumer confidence and tax cuts previously enacted as well as a shift in consumer spending to untaxed services and online purchases.
- Under legislation approved in 2012, and beginning with the 2013-2015 biennium, Washington became the only state in the nation required to pass a budget that balances spending against anticipated revenue over a four year period.
- Washington continues to face the requirements of the state Supreme Court 2012 McCleary ruling that found that the state has failed to meet its constitutional requirement to amply fund basic education. Although funding progress is being made through the 2013-2015 biennial budget, it was insufficient to satisfy the court. In September 2014, the court found the state in contempt and threatened sanctions if an acceptable funding plan is not in place by the end of the 2015 legislative session.

General Election. There is a measure on the state's November 4, 2014, general election ballot that addresses K-12 education. This measure, if passed, could impact the state fiscally.

Election results are not final or official until certified. By law December 4, 2014, is the last day for the Office of the Secretary of State to certify General Election returns.

Information is posted as available on the Secretary of State's website at: http://www.sos.wa.gov.

Rainy Day Account. In November 2007, Washington state voters ratified Engrossed Substitute Senate Joint Resolution 8206, amending the state's Constitution and establishing the Budget Stabilization Account (BSA). The Constitution details a limited number of circumstances under which funds can be appropriated from the BSA, one of which is a favorable vote of at least three-fifths of the members of each House of the Legislature.

On June 30, 2014, \$144.5 million was transferred to the BSA from the General Fund in accordance with the provisions of the Constitution. The BSA has a fund balance of \$414.6 million as of June 30, 2014.

New Pension Reporting Standards. For fiscal year 2015 financial reporting, the state will be implementing Statement No. 68 of the Governmental Accounting Standards Board Accounting and Financial Reporting for Pensions. Current pension reporting standards focus on plan funding requirements. Plan level information on the pension plans administered by the state is presented in Note 11 and in the required supplementary information section of this report.

Statement 68 requires each governmental employer to report its proportionate share of the net pension liability. While decision making authority related to pension funding is not impacted, Statement 68 will have an impact on the state's government—wide and proprietary fund financial statements beginning in fiscal year 2015.

Requests for Information

This financial report is designed to provide a general overview of the state of Washington's finances for all those with an interest in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Office of Financial Management, Accounting Division, P.O. Box 43113, Olympia, WA 98504-3113.

Reconciliation of the Statement of Revenues, Expenditures and Changes in Fund Balances to the Statement of Activities GOVERNMENTAL FUNDS

For the Fiscal Year Ended June 30, 2014 (expressed in thousands)

| Net Change in Fund Balances - Total Governmental Funds | | \$ 1,262,096 |
|--|-------------------|-----------------|
| Amounts reported for governmental activities in the Statement of Activities are different because: | | |
| Capital outlays are reported as expenditures in governmental funds. | | |
| However, in the Statement of Activities, the cost of capital assets is | | |
| allocated over their estimated useful lives as depreciation expense. | | |
| In the current period, these amounts are: | | |
| Capital outlays | \$ 1,591,600 | |
| Less: Depreciation expense | (650,426) | 941,174 |
| Some revenues in the Statement of Activities do not provide current | | |
| financial resources, and therefore, are unavailable in governmental funds. | | |
| Also, revenues related to prior periods that became available during the | | |
| current period are reported in governmental funds but are eliminated in | | |
| the Statement of Activities. This amount is the net adjustment. | | 43,120 |
| Pension trust funding in excess of annual required contributions | | |
| uses current financial resources, but does not qualify as an expense. | | (1,600) |
| Internal service funds are used by management to charge the costs | | |
| of certain activities to individual funds. The change in net position | | |
| of the internal service funds is reported with governmental activities. | | (2,636) |
| Bond proceeds and other financing contracts provide current financial resources | | |
| to governmental funds, while the repayment of the related debt principal | | |
| consumes those financial resources. These transactions, however, have no effect | | |
| on net position. In the current period, these amounts consist of: | | |
| Bonds and other financing contracts issued | \$ (2,467,776) | |
| Principal payments on bonds and other financing contracts | 1,476,117 | |
| Accreted interest on bonds | 22,851 | (968,808) |
| Some expenses/revenue reductions reported in the Statement of Activities do not | | |
| require the use of current financial resources and, therefore, are not recognized | | |
| in governmental funds. Also payments of certain obligations related to prior periods | | |
| are recognized in governmental funds but are eliminated in the Statement of Activities. | | |
| In the current period, the net adjustments consist of: | | |
| Compensated absences | \$ 16,044 | |
| Other postemployment benefits obligations | (242,795) | |
| Unfunded pension obligations | (58,456) | |
| Pollution remediation obligations | 6,977 | |
| Claims and judgments | 1,240 | |
| Accrued interest | (22,368) | |
| Unclaimed property | 5,877 | |
| Other obligations | (63,022) | (356,503) |
| Change in Net Position of Governmental Activities | | \$ 916,843 |

Note 1

Summary of Significant Accounting Policies

The accompanying financial statements of the state of Washington have been prepared in conformity with generally accepted accounting principles (GAAP). The Office of Financial Management (OFM) is the primary authority for the state's accounting and reporting requirements. OFM has adopted the pronouncements of the Governmental Accounting Standards Board (GASB), which is nationally accepted as the standard-setting body for establishing governmental accounting and financial reporting principles. Following is a summary of the significant accounting policies:

A. REPORTING ENTITY

In defining the state of Washington for financial reporting purposes, management considers: all funds, organizations, institutions, agencies, departments, and offices that are legally part of the state (the primary government) and organizations that are financially accountable to the state. Additionally, other organizations that do not meet the financial accountability criteria may be included in the reporting entity if the nature and significance of their relationship with the state are such that exclusion would cause the state's financial statements to be misleading.

Financial accountability exists when the primary government appoints a voting majority of an organization's governing body and is either (1) able to impose its will on that organization or (2) there is a potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the primary government. The primary government is also financially accountable if an organization is fiscally dependent on and there is a potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the primary government regardless of whether the organization has (1) a separately elected governing board, (2) a governing board appointed by a higher level of government, or (3) a jointly appointed board. An organization is fiscally dependent if it is unable to determine its budget without another government having the substantive authority to approve or modify that budget, to levy taxes or set rates or charges without substantive approval by another government, or to issue bonded debt without substantive approval by another government. The organization has a financial benefit or burden relationship with the primary government if, for example, any one of these conditions exists: (1) the primary government is legally entitled to or can access the organization's resources; (2) the primary government is legally obligated or has otherwise assumed the obligation to finance or provide financial support to the organization;

(3) the primary government is obligated in some manner for the debt of the organization.

Based on these criteria, the following are included in the financial statements of the primary government:

State Agencies. Except as otherwise described herein, all state elected offices, departments, agencies, commissions, boards, committees, authorities, councils (agencies), and all funds and subsidiary accounts of the state are included in the primary government. Executives of these agencies are either elected, directly appointed by the Governor, appointed by a board which is appointed by the Governor, or appointed by a board which is in part appointed by the Governor. Additionally, a small number of board positions are established by statute or independently elected.

The Legislature creates these agencies, assigns their programs, approves operational funding, and requires financial accountability. The Legislature also authorizes all bond issuances for capital construction projects for the benefit of state agencies. The legal liability for these bonds and the ownership of agency assets resides with the state.

Colleges and Universities. The governing boards of the five state universities, the state college, and the 34 state community and technical colleges are appointed by the Governor. The governing board of each college and university appoints a president to function as chief administrator. The Legislature approves budgets and budget amendments for the appropriated funds of each college and university, which include the state's General Fund as well as certain capital projects funds. The State Treasurer issues general obligation debt for major campus construction projects. However, the colleges and universities are authorized to issue revenue bonds.

The University of Washington (UW) issues general revenue bonds that are payable from general revenues, including student tuition and fees, grant indirect cost recovery, sales and services revenue, and investment income. All other revenue bonds issued by colleges and universities pledge the income derived from acquired or constructed assets such as housing, dining, and parking facilities. These revenue bonds are payable solely from, and secured by, fees and revenues derived from the operation of constructed facilities; the legal liability for the bonds and the ownership of the college and university assets reside with the state.

Colleges and universities do not have separate corporate powers and sue and are sued as part of the state with legal representation provided through the state Attorney General's Office. Since the colleges and universities are legally part of the state, their financial operations, including their blended component units, are reported in the state's financial statements using the fund structure prescribed by GASB.

Retirement Systems. The state of Washington, through the Department of Retirement Systems, administers eight retirement systems for public employees of the state and political subdivisions: the Public Employees' Retirement System, the Teachers' Retirement System, the School Employees' Retirement System, the Law Enforcement Officers' and Fire Fighters' Retirement System, the Washington State Patrol Retirement System, the Public Safety Employees' Retirement System, the Judicial Retirement System, and the Judges' Retirement Fund. The director of the Department of Retirement Systems is appointed by the Governor.

There are three additional retirement systems administered outside of the Department of Retirement Systems. The Volunteer Fire Fighters' and Reserve Officers' Relief and Pension Fund is administered through the State Board for Volunteer Fire Fighters and Reserve Officers, which is appointed by the Governor. The Judicial Retirement Account is administered through the Administrative Office of the Courts under the direction of the Board for Judicial Administration. The Higher Education Retirement Plan Supplemental Defined Benefit Plans are administered by the state's colleges and universities.

The Legislature establishes laws pertaining to the creation and administration of all public retirement systems. The participants of the public retirement systems, together with the state, provide funding for all costs of the systems based upon actuarial valuations. The state establishes benefit levels and approves the actuarial assumptions used in determining contribution levels.

All of the aforementioned retirement systems are included in the primary government's financial statements.

Blended Component Units

Blended component units, although legally separate entities, are part of the state's operations in substance. Accordingly, they are reported as part of the state and blended into the appropriate funds. Financial information for the state's blended component units may be obtained from Office of Financial Management, Accounting Division, P.O. Box 43113, Olympia, WA, 98504-3113. The following entities are blended in the state's financial statements:

Tobacco Settlement Authority. The Tobacco Settlement Authority (TSA) was created by the Legislature in March 2002 as a public instrumentality separate and distinct from the state. It is governed by a five-member board appointed by the Governor. It was created solely for the purpose of issuing bonds to securitize a portion of the state's future tobacco settlement revenue. Proceeds of the debt instrument were transferred to the state to help fund health care,

long-term care, and other programs of the state. Refer to Note 7.A for additional information.

Association of University Physicians. The University of Washington Physicians (UWP) was established for the exclusive benefit of the University of Washington School of Medicine (UWSOM). UWP employs UWSOM faculty and bills and collects for their clinical services as an agent for UWSOM.

UW Medicine Neighborhood Clinics. The UW Medicine Neighborhood Clinics (Neighborhood Clinics) were established for the exclusive benefit of the University's School of Medicine, UWP and its affiliated medical centers, Harborview Medical Center, and the University of Washington Medical Center. The Neighborhood Clinics were organized to coordinate and develop patient care in a community clinical setting. They enhance the academic environment of UWSOM by providing additional sites of primary care practice and training for faculty, residents, and students.

TSB Properties, Washington Biomedical Research Properties I and II, and Washington Biomedical Research Facilities 3 were formed to acquire, construct, or renovate certain real properties for the benefit of the University of Washington in fulfilling its educational, medical, or scientific research missions.

Tumwater Office Properties and FYI Properties were formed to design and construct office facilities to house state employees. The facilities were financed with tax-exempt obligations that meet the requirements of Revenue Ruling 63-20 and Revenue Procedure 82-26 issued by the Internal Revenue Service.

Discrete Component Units

Discretely presented component units are reported in a separate column in the government-wide financial statements. Discretely presented component units are legally separate from the state and primarily serve or benefit those outside of the state. They are financially accountable to the state, or have relationships with the state such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete. These entities are reported as discrete component units because state officials either serve on or appoint the members of the governing bodies of the authorities. The state also has the ability to influence the operations of the authorities through legislation.

The state's component units each have a year-end of June 30 with the exception of the Washington Economic Development Finance Authority and the Washington Health Benefit Exchange which have a December 31 year-end.

The following entities are discretely presented in the financial statements of the state in the component unit's column:

The Washington State Housing Finance Commission, Washington Higher Education Facilities Authority, the Washington Health Care Facilities Authority, the Washington and **Economic Development Finance Authority** (financing authorities) were created by the Legislature in a way that specifically prevents them from causing the state to be liable or responsible for their acts and obligations, including, but not limited to, any obligation to pay principal and interest on financing authority bonds. The financing authorities cannot obligate the state, either legally or morally, and the state has not assumed any obligation of, or with respect to, the financing authorities.

Financial reports of these financing authorities may be obtained from each authority at the following addresses:

Washington Health Care Facilities Authority 410 11th Avenue SE, Suite 201 PO Box 40935 Olympia, WA 98504-0935

Washington State Housing Finance Commission Washington Higher Education Facilities Authority Washington Economic Development Finance Authority 1000 Second Avenue, Suite 2700 Seattle, WA 98104-1046

The Washington State Public Stadium Authority (PSA) was created by the Legislature to acquire, construct, own, and operate a football/soccer stadium, exhibition center, and parking garage. Construction was completed in 2002. PSA capital assets, net of accumulated depreciation, total \$311.7 million. The state issued general obligation bonds for a portion of the cost of the stadium construction. The total public share of the stadium and exhibition center cost did not exceed \$300 million from all state and local government funding sources, as required in statute.

Project costs in excess of \$300 million were the responsibility of the project's private partner, First & Goal, Inc. The bonds are being repaid through new state lottery games, a state sales tax credit, extension of the local hotel/motel tax, and parking and admissions taxes at the new facility.

Financial reports of the PSA may be obtained at the following address:

Washington State Public Stadium Authority CenturyLink Field & Event Center 800 Occidental Avenue South, #700 Seattle, WA 98134 The Washington Health Benefit Exchange (Exchange) was created by the Legislature to implement a central marketplace for individuals, families, and small employers to shop for health insurance and access federal tax credits pursuant to the Patient Protection and Affordable Care Act of 2010. Federal grant funding is financing the Exchange design, development, and implementation phases as well as the first full year of operation during 2014. Beginning in 2015, the Exchange must be self-sustaining through state appropriations, premium tax assessments, administrative fees.

Financial reports of the Exchange may be obtained at the following address:

Washington Health Benefit Exchange 810 Jefferson Street SE Olympia, WA 98501

Northwest Hospital was created January 1, 2010, under an affiliation agreement between UW Medicine and Northwest Hospital and Medical Center (Northwest Hospital). UW Medicine is an academic medical center comprised of UW School of Medicine, UW Neighborhood Clinics, UW Medical Center, Harborview Medical Center, Association of University Physicians, as well as the University's membership in the Seattle Cancer Care Alliance and the Children's University Medical Group.

Northwest Hospital is a 281-bed full service acute care hospital. The University is the sole corporate member of Northwest Hospital. Financial reports of Northwest Hospital may be obtained at the following address:

Northwest Hospital 1550 N. 115th Street Seattle, WA 98133-9733

Valley Medical Center was created July 1, 2011, through a strategic alliance between UW Medicine and Public Hospital District No. 1 of King County. Valley Medical Center owns and operates a 321-bed full service acute care hospital and 45 clinics located throughout southeast King County. Financial reports of Valley Medical Center may be obtained at the following address:

Valley Medical Center 400 S. 43rd Street Renton, WA 98055

Joint Ventures

In 1998, the University of Washington Medical Center (Medical Center) entered into an agreement with Seattle Children's Hospital and Fred Hutchinson Cancer Research Center to establish the Seattle Cancer Care Alliance

(SCCA). Each member of the SCCA has a one-third interest. The mission of the SCCA is to eliminate cancer as a cause of human suffering and death and to become recognized as the premier cancer research and treatment center in the Pacific Northwest. The SCCA integrates the cancer research, teaching, and clinical cancer programs of all three institutions to provide state-of-the-art cancer care. Under the agreement, the Medical Center provides the patient care to all adult inpatients of the SCCA.

Inpatient Services – The SCCA operates a 20-bed unit located within the Medical Center in which its adult inpatients receive care. The fiscal intermediary has determined that the 20-bed unit qualifies as a hospital within a hospital for Medicare reimbursement purposes. The SCCA provides medical oversight and management of the inpatient unit. Under agreements, the Medical Center provides inpatient care services to the SCCA including necessary personnel, equipment, and ancillary services.

Outpatient Services – The SCCA operates an ambulatory cancer care service facility in Seattle. The Medical Center provides various services to the SCCA's outpatient facility including certain pharmacy, laboratory, and pathology services as well as billing, purchasing, and other administrative services.

The state accounts for the Medical Center's interest in SCCA under the equity method of accounting. Income of \$13.6 million was recorded in fiscal year 2014, bringing the total equity investment to \$102.7 million which is recognized in the state's financial statements in the Higher Education Student Services Fund.

Separate financial statements for SCCA may be obtained from:

Seattle Cancer Care Alliance 825 Eastlake Avenue East PO Box 19023 Seattle, WA 98109-1023

The University of Washington and Seattle Children's Hospital established Children's University Medical Group (CUMG) to assist the organizations in carrying out their pediatric patient care, charitable, educational, and scientific missions.

Separate financial statements for CUMG may be obtained from:

Children's University Medical Group 4500 Sand Point Way NE, Suite 100 Seattle, WA 98105

B. GOVERNMENT-WIDE AND FUND FINANCIAL STATEMENTS

Government-wide Financial Statements

The state presents two basic government-wide financial statements: the Statement of Net Position and the Statement of Activities. These government-wide financial statements report information on all non-fiduciary activities of the primary government and its component units. The financial information for the primary government is distinguished between governmental and business-type activities. Governmental activities generally are financed through taxes, intergovernmental revenues, and other non-exchange revenues. Business-type activities are financed in whole or in part by fees charged to external parties for goods and services.

Statement of Net Position. The Statement of Net Position presents the state's non-fiduciary assets, deferred outflows of resources, liabilities, deferred inflows of resources, and net position. As a general rule, balances between governmental and business-type activities are eliminated.

Statement of Activities. The Statement of Activities reports the extent to which each major state program is supported by general state revenues or is self-financed through fees and intergovernmental aid. For governmental activities, a major program is defined as a function. For business-type activities, a major program is an identifiable activity.

Program revenues offset the direct expenses of major programs. Direct expenses are those that are clearly identifiable within a specific function or activity. Program revenues are identified using the following criteria:

- Charges to customers for goods and services of the program. A customer is one who directly benefits from the goods or services or is otherwise directly affected by the program, such as a state citizen or taxpayer, or other governments or nongovernmental entities.
- Amounts received from outside entities that are restricted to one or more specific programs. These amounts can be operating or capital in nature.
- Earnings on investments that are restricted to a specific program are also considered program revenues.

General revenues consist of taxes and other items not meeting the definition of program revenues.

Generally, the effect of internal activities is eliminated. Exceptions to this rule include charges between the workers' compensation insurance programs and various other state programs and functions. Elimination of these charges would distort the direct costs and revenues reported for the various activities involved.

Fund Financial Statements

The state uses 642 accounts that are combined into 52 rollup funds. The state presents separate financial statements for governmental funds, proprietary funds, and fiduciary funds. Major individual governmental funds and major individual proprietary funds are reported in separate columns in the fund financial statements, with nonmajor funds being combined into a single column regardless of fund type. Internal service and fiduciary funds are reported by fund type. Major funds include:

Major Governmental Funds:

- General Fund is the state's primary operating fund.
 This fund accounts for all financial resources and transactions not accounted for in other funds.
- Higher Education Special Revenue Fund primarily accounts for tuition, student fees, and grants and contracts received for educational and research purposes.
- Higher Education Endowment Permanent Fund accounts for gifts and bequests that the donors have specified must remain intact. Each gift is governed by various restrictions on the investment and use of the income earned on investments.

Major Enterprise Funds:

- Workers' Compensation Fund accounts for the workers' compensation program that provides medical, time-loss, and disability benefit payments to qualifying individuals sustaining work-related injuries.
- Unemployment Compensation Fund accounts for the unemployment compensation program. It accounts for the deposit of funds, requisitioned from the Federal Unemployment Trust Fund, to provide services to eligible participants within the state and to pay unemployment benefits.
- Higher Education Student Services Fund is used by colleges and universities principally for bookstore, cafeteria, parking, student housing, food service, and hospital business enterprise activities.

 Guaranteed Education Tuition Program Fund accounts for Washington's Guaranteed Education Tuition (GET) Program. GET is a qualified tuition program under Section 529 of the Internal Revenue Code.

The state includes the following governmental and proprietary fund types within nonmajor funds:

Nonmajor Governmental Funds:

- Special Revenue Funds account for the proceeds of specific revenue sources (other than trusts for private organizations, or individuals, governments, or for major capital projects) that are restricted or committed to expenditures for specific purposes. These include a variety of state programs including public safety and health assistance programs; natural resource and wildlife protection and management programs; the state's transportation programs which include the operation of the state's ferry system, and maintenance and preservation of interstate and non-interstate highway systems; driver licensing, highway and non-highway operations, and capital improvements; K-12 school construction; and construction and loan programs for local public works projects.
- **Debt Service Funds** account for the accumulation of resources that are restricted or committed to expenditures for, and the payment of, principal and interest on the state's bonds issued in support of governmental activities.
- Capital Projects Funds account for financial resources that are restricted or committed to expenditures for the acquisition, construction, or improvement of major state-owned capital facilities (other than highway infrastructure or those financed by proprietary funds).
- Common School Permanent Fund accounts for the principal derived from the sale of timber. Interest earned is used for the benefit of common schools.

Nonmajor Proprietary Funds:

• Enterprise Funds account for the state's business type operations for which a fee is charged to external users for goods or services including: the state lottery; vocational/education programs at correctional institutions, and other activities.

• Internal Service Funds account for the provision of legal, motor pool, data processing, risk management, health insurance, and other services by one department or agency to other departments or agencies of the state on a cost-reimbursement basis.

The state reports the following fiduciary funds:

- Pension (and other employee benefit) Trust Funds
 are used to report resources that are required to be held
 in trust by the state for the members and beneficiaries
 of defined benefit pension plans, defined contribution
 pension plans, and other employee benefit plans.
- Investment Trust Fund accounts for the external portion of the Local Government Investment Pool, which is reported by the state as the sponsoring government.
- Private-Purpose Trust Fund is used to report trust arrangements, other than pension and investment trusts, under which principal and income benefit individuals, private organizations, or other governments such as the administration of unclaimed property.
- Agency Funds account for resources held by the state in a custodial capacity for other governments, private organizations, or individuals.

and Nonoperating Operating Revenues Expenses. The state's proprietary funds make a distinction between operating and nonoperating revenues and expenses. Operating revenues and expenses generally result from providing goods and services directly related to the principal operations of the funds. For example, operating revenues for the state's workers' compensation and health insurance funds consist of premiums and assessments collected. Operating expenses consist of claims paid to covered individuals, claims adjustment expenses, costs of commercial insurance coverage, and administrative expenses. All revenues and expenses not meeting this definition are reported as nonoperating, including interest expense and investment gains and losses.

C. MEASUREMENT FOCUS AND BASIS OF ACCOUNTING

For government-wide reporting purposes, the state uses the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of the related cash flows. Property taxes are recognized as revenue in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

For fund statement reporting purposes, the state uses the current financial resources measurement focus and modified accrual basis of accounting for governmental funds. With the current financial resources measurement focus, generally only current assets and current liabilities and deferred outflows of resources and deferred inflows of resources are included on the governmental funds balance sheet. Operating statements for these funds present inflows (i.e., revenues and other financing sources) and outflows (i.e., expenditures and other financing uses) of expendable financial resources.

Under the modified accrual basis of accounting, revenues are recognized when susceptible to accrual (i.e., when they become both measurable and available). "Measurable" means the amount of the transaction can be reasonably estimated. "Available" means collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period. Primary revenues that are determined to be susceptible to accrual include sales taxes, business and occupation taxes, motor fuel taxes, federal grants-in-aid, and charges for services.

Revenues from property taxes are determined to be available if collectible within 60 days. Taxes imposed on exchange transactions are accrued when the underlying exchange transaction occurs if collectible within one year. Revenue for timber cutting contracts is accrued when the timber is harvested. Revenues from licenses, permits, and fees are recognized when received in cash. Revenues related to expenditure-driven grant agreements are recognized when the qualifying expenditures are made, provided that the availability criteria are met. Expendituredriven grant revenue is considered available if it can be collected by the state at the same time cash is disbursed to cover the associated grant expenditure. Pledges are accrued when the eligibility requirements are met and resources are available. All other accrued revenue sources are determined to be available if collectible within 12 months.

Property taxes are levied in December for the following calendar year. The first half-year collections are due by April 30, and the second half-year collections are due by October 31. Since the state is on a fiscal year ending June 30, the first half-year collections are recognized as revenue, if collectible within 60 days of the fiscal year end. The second half-year collections are recognized as receivables offset by unavailable revenue. The lien date on property taxes is January 1 of the tax levy year.

Under modified accrual accounting, expenditures are generally recognized when the related liability is incurred. However, unmatured interest on general long-term obligations is recognized when due and certain liabilities including compensated absences, other postemployment benefits, and claims and judgments are recognized when the obligations are expected to be liquidated with available spendable financial resources.

The state reports both unavailable and unearned revenues on its governmental fund balance sheet. Unavailable revenues arise when a potential revenue does not meet both the "measurable" and the "available" criteria for revenue recognition in the current period. Unearned revenues arise when resources are received by the state before it has a legal claim to them, such as when grant monies are received prior to incurring qualifying expenditures/expenses.

All proprietary and trust funds are accounted for using the economic resources measurement focus. With this measurement focus, all assets, liabilities, deferred outflows of resources, and deferred inflows of resources associated with the operations of these funds are included on their respective statements of net position. Operating statements present increases (i.e., revenues) and decreases (i.e., expenses) in total net position.

All proprietary and trust funds are reported using the accrual basis of accounting. Under the accrual basis of accounting, revenues are recognized when earned and expenses are recognized when incurred.

D. ASSETS, LIABILITIES, DEFERRED OUTFLOWS/INFLOWS OF RESOURCES AND NET POSITION/FUND BALANCE

1. Cash and Investments

Investments of surplus or pooled cash balances are reported on the accompanying Statements of Net Position, Balance Sheets, and Statements of Cash Flows as "Cash and Pooled Investments." The Office of the State Treasurer invests state treasury cash surpluses where funds can be disbursed at any time without prior notice or penalty. For reporting purposes, pooled investments are stated at fair value or amortized cost, which approximates fair value. For purposes of reporting cash flows, the state considers cash and pooled investments to be cash equivalents. Pooled investments include short-term, highly-liquid investments that are both readily convertible to cash and are so near their maturity dates that they present insignificant risk of changes in value because of changes in interest rates.

The method of accounting for noncurrent investments varies depending upon the fund classification. Investments in the state's Local Government Investment Pool (LGIP), an external investment pool operated in a manner consistent with the Securities and Exchange Commission's Rule 2a-7 of the Investment Company Act of 1940, are reported at amortized cost which approximates fair value. The Office of the State Treasurer prepares a stand-alone LGIP financial report. A copy of the report is available from the Office of the State Treasurer, PO Box 40200, Olympia, Washington 98504-0200, or phone number (360)

902-9000. TTY users dial 711 to be connected to the state TTY operator.

Certain pension trust fund investments, including real estate and private equity, are reported at fair value based on appraisals or estimates in the absence of readily ascertainable fair values. At June 30, 2014, these alternative investments are valued at \$29.64 billion. Because of the inherent uncertainties in the estimation of fair value, it is possible that the estimates will change.

All other noncurrent investments are reported at fair value. Fair values are based on published market prices, quotations from national security exchanges and security pricing services, or by the respective fund managers for securities that are not actively traded. Privately held mortgages are valued at cost, which approximates fair value. Additional disclosure describing investments is provided in Note 3.

2. Receivables and Payables

Receivables in the state's governmental fund type accounts consist primarily of taxes and federal revenues. Receivables in all other funds have arisen in the ordinary course of business. Receivables are recorded when either the asset or revenue recognition criteria (refer to Note 1.C) have been met. All receivables are reported net of an allowance for accounts estimated to be uncollectible.

For government-wide reporting purposes, amounts recorded as interfund/interagency receivables and payables are eliminated in the governmental and business-type activities columns on the Statement of Net Position, except for the net residual balances due between the governmental and business-type activities, which are reported as internal balances. Amounts recorded in governmental and business-type activities as due to or from fiduciary funds have been reported as due to or from other governments.

3. Inventories and Prepaids

Consumable inventories, consisting of expendable materials and supplies held for consumption, are valued and reported in the state's financial statements if the fiscal year-end balance on hand at an inventory control point is estimated to be \$50,000 or more. Consumable inventories are generally valued at cost using the first-in, first-out method. Donated consumable inventories are recorded at fair market value.

All merchandise inventories are considered reportable for financial statement purposes. Merchandise inventories are generally valued at cost using the first-in, first-out method.

Inventories of governmental funds are valued at cost and recorded using the consumption method. Proprietary

funds expense inventories when used or sold.

For governmental fund financial reporting, inventory balances are also recorded as a reservation of fund balance indicating that they do not constitute "available spendable resources" except for \$8.1 million in federally donated consumable inventories, which are offset by unearned revenue because they are not earned until they are distributed to clients.

Prepaid items are those certain types of supplies and/or services (not inventory) that are acquired or purchased during an accounting period but not used or consumed during that accounting period.

In governmental fund type accounts, prepaid items are generally accounted for using the purchases method. Under the purchases method, prepaid items are treated as expenditures when purchased and residual balances, if any, at year-end are not accounted for as assets.

In proprietary and trust fund type accounts, prepaid items are accounted for using the consumption method. The portion of supplies or services consumed or used during a period is recorded as an expense. The balance that remains is reported as an asset until consumed or used.

4. Restricted Assets

Certain cash, investments, and other assets are classified as restricted assets on the Statement of Net Position and Balance Sheet because their use is limited by debt covenants, escrow arrangements, or other regulations.

5. Capital Assets

Capital assets are tangible and intangible assets held and used in state operations, which have a service life of more than one year and meet the state's capitalization policy.

It is the state's policy to capitalize:

- All land, including land use rights with indefinite lives acquired with the purchase of the underlying land, and ancillary costs;
- The state highway system operated by the Department of Transportation;
- Infrastructure, other than the state highway system, with a cost of \$100,000 or more;
- Buildings, building improvements, improvements other than buildings, and leasehold improvements with a cost of \$100,000 or more;

- Intangible assets, either purchased or internally developed, with a cost of \$1 million or more that are identifiable by meeting one of the following conditions:
 - The asset is capable of being separated or divided and sold, transferred, licensed, rented, exchanged;
 - The asset arises from contractual or other legal rights, regardless of whether those rights are transferable or separable;
- All capital assets acquired with Certificates of Participation, a debt financing program administered by the Office of the State Treasurer; and
- All other capital assets with a unit cost (including ancillary costs) of \$5,000 or greater, or collections with a total cost of \$5,000 or greater except for assets held by the University of Washington (UW). The capitalization threshold for all other capital assets held by the UW is \$2,000.

Assets acquired by capital leases are capitalized if the assets' fair market value meets the state's capitalization thresholds described above.

Purchased capital assets are valued at cost where historical records are available and at estimated historical cost where no historical records exist. Capital asset costs include the purchase price plus those costs necessary to place the asset in its intended location and condition for use (ancillary costs). Normal maintenance and repair costs that do not materially add to the value or extend the life of the state's capital assets are not capitalized.

Donated capital assets are valued at their estimated fair market value on the date of donation, plus all appropriate ancillary costs. When the fair market value is not practically determinable due to lack of sufficient records, estimated cost is used. Where necessary, estimates of original cost and fair market value are derived by factoring price levels from the current period to the time of acquisition.

The value of assets constructed by agencies for their own use includes all direct construction costs and indirect costs that are related to the construction. In enterprise and trust funds, net interest costs (if material) incurred during the period of construction are capitalized. In fiscal year 2014, \$103.3 million interest costs were incurred, and \$11.7 million net interest costs were capitalized.

State agencies are not required to capitalize art collections, library reserve collections, and museum and historical collections that are considered inexhaustible, in that their value does not diminish over time, if all of the following conditions are met:

- The collection is held for public exhibition, education, or research in furtherance of public service, rather than financial gain.
- The collection is protected, kept unencumbered, cared for, and preserved.
- The collection is subject to policy requirements that the proceeds from sales of collection items be used to acquire other items for the collection.

Depreciation/amortization is calculated using the straightline method over the estimated useful lives of the assets.

Generally, estimated useful lives are as follows:

| Buildings & building components | 5-50 years |
|--------------------------------------|-------------|
| Furnishings, equipment & collections | 3-50 years |
| Other improvements | 3-50 years |
| Intangibles | 3-50 years |
| Infrastructure | 20-50 years |

The cost and related accumulated depreciation/ amortization of disposed capital assets are removed from the accounting records.

The state capitalizes the state highway system as a network but does not depreciate it since the system is being preserved approximately at or above a condition level established by the state. That condition level is documented and disclosed. Additionally, the highway system is managed using an asset management system that includes:

- Maintenance of an up-to-date inventory of system assets;
- Performance of condition assessments of the assets at least every three years with summarization of the results using a measurement scale; and
- Annual estimation of the amount to maintain and preserve the assets at the condition level established and disclosed.

All state highway system expenditures that preserve the useful life of the system are expensed in the period incurred. Additions and improvements that increase the capacity or efficiency of the system are capitalized. This approach of reporting condition instead of depreciating the highway system is called the modified approach.

For government-wide financial reporting purposes, capital assets of the state are reported as assets in the applicable governmental or business-type activities column on the Statement of Net Position. Depreciation/amortization

expense related to capital assets is reported in the Statement of Activities.

Capital assets and the related depreciation/amortization expense are also reported in the proprietary fund financial statements.

In governmental funds, capital assets are not capitalized in the accounts that acquire or construct them. Instead, capital acquisitions and construction are reflected as expenditures in the year assets are acquired or construction costs are incurred. No depreciation/amortization is reported.

6. Deferred Outflows/Inflows of Resources

In addition to assets, the Balance Sheet and Statement of Net Position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element represents a consumption of fund equity that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. The state only has one item that qualifies for reporting in this category. It is the deferred outflow of resources reported in the government-wide and proprietary fund statements of net position related to debt refunding. A deferred outflow on refunding results when the carrying value of refunded debt exceeds its reacquisition price. This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt.

In addition to liabilities, the Balance Sheet and Statement of Net Position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element represents an acquisition of fund equity that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The state is reporting two types of deferred inflows: unavailable revenue and debt refunding.

Unavailable revenue arises only under the modified accrual basis of accounting, and so is reported only on the governmental funds balance sheet. Governmental funds report deferred inflows for unavailable revenues primarily from two sources: taxes and long-term receivables. These amounts are recognized as inflows of resources in the periods that the amounts become available.

A deferred inflow on refunding results when the reacquisition price of the refunding debt exceeds the net carrying value of the refunded debt. This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt.

7. Compensated Absences

State employees accrue vested vacation leave at a variable rate based on years of service. In general, accrued vacation leave cannot exceed 240 hours at the employee's anniversary date.

Employees accrue sick leave at the rate of one day per month without limitation on the amount that can be accumulated. Sick leave is not vested, i.e., the state does not pay employees for unused sick leave upon termination except upon employee death or retirement. At death or retirement, the state is liable for 25 percent of the employee's accumulated sick leave. In addition, the state has a sick leave buyout option in which, each January, employees who accumulate sick leave in excess of 480 hours may redeem sick leave earned but not taken during the previous year at the rate of one day's pay in exchange for each four days of sick leave.

It is the state's policy to liquidate its compensated absences obligation with future resources rather than advance funding it with available spendable financial resources.

For government-wide reporting purposes, the state reports compensated absences obligations as liabilities in the applicable governmental or business-type activities columns on the Statement of Net Position.

For fund statement reporting purposes, governmental funds recognize an expenditure for annual and sick leave when it is payable, i.e., upon employee's use, resignation, or retirement. Proprietary and trust funds recognize the expense and accrue a liability for annual leave and estimated sick leave buyout, including related payroll taxes and benefits, as applicable, as the leave is earned.

8. Long-Term Liabilities

In the government-wide and proprietary fund financial statements, long-term obligations of the state are reported as liabilities on the Statement of Net Position. Bonds payable are reported net of applicable original issuance premium or discount. When material, bond premiums and discounts are deferred and amortized over the life of the bonds.

For governmental fund financial reporting, the face (par) amount of debt issued is reported as other financing sources. Premiums and discounts on original debt issuance are also reported as other financing sources and uses, respectively. Issue costs are reported as debt service expenditures.

9. Fund Equity

In governmental fund type accounts, fund equity is called "fund balance." Fund balance is reported in classifications which reflect the extent to which the state is bound to

honor constraints on the purposes for which the amounts can be spent. Classifications include:

- Nonspendable fund balance represents amounts that are either not in a spendable form or are legally or contractually required to remain intact.
- Restricted fund balance represents amounts for which
 constraints are placed on their use by the state
 constitution, enabling legislation, or external resource
 providers such as creditors, grantors, or laws or
 regulations of other governments.
- Committed fund balance represents amounts that can only be used for specific purposes pursuant to constraints imposed by state law as adopted by the state Legislature. The commitment remains in place until the Legislature changes or eliminates the state law.
- Assigned fund balance represents amounts that are intended for a specific purpose by management, but are neither restricted nor committed. Generally, assignment is expressed by joint legislative and executive staff action.
- Unassigned fund balance represents the residual amount for the General Fund that is not contained in the other classifications. Additionally, any deficit fund balance within the other governmental fund types is reported as unassigned.

When resources meeting more than one of the classifications (excluding nonspendable) are comingled in an account, assuming that the expenditure meets the constraints of the classification, the assumed order of spending is restricted first, committed second, and finally assigned.

For government-wide reporting as well as in proprietary funds, fund equity is called net position. Net position is comprised of three components: net investment in capital assets; restricted; and unrestricted.

- Net investment in capital assets consists of capital
 assets, net of accumulated depreciation and reduced by
 outstanding balances of bonds, notes, and other debt
 that are attributed to the acquisition, construction, or
 improvement of those assets. Deferred outflows of
 resources and deferred inflows of resources that are
 attributable to the acquisition, construction, or
 improvement of those assets or related debt are
 included in this component of net position.
- Restricted net position consists of restricted assets reduced by liabilities and deferred inflows of resources related to those assets. Assets are reported as restricted when constraints are placed on asset use either by

external parties or by law through constitutional provision or enabling legislation.

 Unrestricted net position is the net amount of the assets, deferred outflows of resources, liabilities, and deferred inflows of resources that does not meet the definition of the two preceding categories.

When both restricted and unrestricted resources are available for use, it is the state's policy to use restricted resources first and then use unrestricted resources as they are needed.

In fiduciary funds, net assets are held in trust for individuals and external organizations.

E. OTHER INFORMATION

1. Insurance Activities

Workers' Compensation. Title 51 RCW establishes the state of Washington's workers' compensation program. The statute requires all employers to secure coverage for job-related injuries and diseases, with few exceptions, through the Workers' Compensation Fund or through self-insurance.

Direct private insurance is not authorized, although selfinsurers are permitted to reinsure up to 80 percent of their obligations through private insurers.

The Workers' Compensation Fund, an enterprise fund, is used to account for the workers' compensation program which provides time-loss, medical, vocational, disability, and pension benefits to qualifying individuals sustaining work-related injuries or illnesses. The main benefit plans of the workers' compensation program are funded based on rates that will keep these plans solvent in accordance with recognized actuarial principles. The supplemental pension plan supports cost-of-living adjustments (COLA) granted for time-loss and disability payments; however, these are funded on a pay-as-you-go basis. By statute, the state is only allowed to collect enough revenue to fund the current COLA payments.

Premiums are based on individual employers' reported payroll hours and insurance rates based on each employer's risk classification(s) and past experience, except for the Supplemental Pension Fund premiums which are based on a flat rate per hours worked independent of risk class or past experience. In addition to its regular premium plan which is required for all employers, the Workers' Compensation Fund offers a voluntary retrospective premium-rating plan under which premiums are subject to three annual adjustments based on group and individual employers' loss experience. Initial adjustments to the standard premiums are paid to or collected from the

groups and individual employers approximately ten months after the end of each plan year.

The Department of Labor and Industries, as administrator of the workers' compensation program, establishes claims liabilities based on estimates of the ultimate cost of claims (including future claims adjustment expenses) that have already occurred. The length of time for which such costs must be estimated varies depending on the benefit involved. Because actual claims costs depend on such complex factors as inflation, changes in doctrines of legal liabilities, claims adjudication, and judgments, the process used in computing claims liabilities does not necessarily result in an exact amount.

Claims payable are recomputed quarterly using a variety of actuarial and statistical techniques. These techniques are used to produce current estimates that reflect recent settlements, claim frequency, expected inflation, and other economic, legal, and social factors. Adjustments to claims payable are charged or credited to claims expense in the periods in which they are made.

The Department of Labor and Industries prepares a standalone financial report for its Workers' Compensation Program. Copies of the report that include financial statements and required supplementary information may be obtained by writing to Washington State Department of Labor and Industries, PO Box 44833, Olympia, Washington 98504-4833 or by visiting their website at: http://www.lni.wa.gov/ClaimsIns/Insurance/Learn/State-Fund/Reports/Default.asp.

Risk Management. The state of Washington operates a self-insurance liability program pursuant to RCW 4.92.130. The state manages its tort claims as an insurance business activity rather than a general governmental activity. The state's policy is generally not to purchase commercial insurance for the risk of losses to which it is exposed. Instead, the state's management believes it is more economical to manage its risks internally and set aside assets for claims settlement in the Risk Management Fund, an internal service fund. A limited amount of commercial insurance is purchased for liabilities arising from the operations of the Washington state ferries, employee bonds, and to limit the exposure to catastrophic losses. Settled claims resulting from these risks have not exceeded commercial insurance coverage in any of the past ten fiscal years. Otherwise, the self-insurance liability program services all claims against the state for injuries and property damage to third parties. The majority of state funds and agencies participate in the self-insurance liability program in proportion to their anticipated exposure to liability losses.

Health Insurance. The state of Washington administers and provides medical, dental, basic life, and basic long-term disability insurance coverage for eligible state

employees. In addition, the state offers coverage to K-12 school districts, educational service districts, tribal governments, political subdivisions, and employee organizations representing state civil service workers. The state establishes eligibility requirements and approves plan benefits of all participating health care organizations. Because the state and its employees are the predominant participants in the employee health insurance program, it is accounted for in an internal service fund, the Employee Insurance Fund.

The state's share of the cost of coverage for state employees is based on a per capita amount determined annually by the Legislature and allocated to state agencies.

The Health Care Authority, as administrator of the health care benefits program, collects this monthly "premium" from agencies for each active employee enrolled in the program. State employees self pay for coverage beyond the state's contribution. Cost of coverage for non-state employees is paid by their respective employers. Most coverage is available on a self-paid basis to former employees and employees who are temporarily not in pay status.

Most coverage is also available on a self-paid basis to eligible retirees. In accordance with the provisions of GASB Statement No. 43, an agency fund, the Retiree Health Insurance Fund, is used to account for the retiree health insurance program. For additional information, refer to Note 12.

The state secures commercial insurance for certain coverage offered, but self-insures the risk of loss for the Uniform Medical Plan. The Uniform Medical Plan enrolled 64 percent of the eligible subscribers in fiscal year 2014. Claims are paid from premiums collected, and claims adjudication is contracted through a third-party administrator.

Considerations in calculating liabilities include frequency of claims, administrative costs, industry inflation trends, advances in medical technology, and other social and economic factors. Liabilities include an amount for claims incurred but not reported.

2. Postemployment Benefits

COBRA. In compliance with federal law, the Consolidated Omnibus Budget Reconciliation Act of 1985

(COBRA), the state offers health and dental benefits on a temporary basis to qualified beneficiaries whose benefit coverage would otherwise end because of a qualifying event such as loss of employment. COBRA coverage is available on a self-paid basis and is the same medical and dental coverage available to state employees.

Medical Expense Plan. As disclosed in Note 1.D, at the time of separation from state service due to retirement or death, the state offers a 25 percent buyout of an employee's accumulated sick leave. Individual state agencies may offer eligible employees a medical expense plan (MEP) that meets the requirements of the Internal Revenue Code. Agencies offering an MEP deposit the retiring employee's sick leave buyout in the MEP for reimbursement of medical expenses.

Retirement Benefits. Refer to Note 11 Retirement Plans and Note 12 Other Postemployment Benefits.

3. Interfund/Interagency Activities

The state engages in two major categories of interfund/interagency activity: reciprocal and nonreciprocal. Reciprocal interfund/interagency activity is the internal counterpart to exchange and exchange-like transactions and includes both interfund loans and services provided and used. Nonreciprocal activity is nonexchange in nature and includes both transfers and reimbursements.

4. Donor-restricted Endowments

The state of Washington reports endowments in higher education endowment permanent accounts. These accounts are established outside of the state treasury for use by the higher education institutions. There is no state law that governs endowment spending; rather, the policies of individual university and college boards govern the spending of net appreciation on investments.

Under the current spending policy, distributions to programs approximate an annual percentage rate of 4 percent of a five-year rolling average of the endowment's market valuation.

The net appreciation available for authorization for expenditure by governing boards totaled \$546.5 million. This amount is reported as restricted for expendable endowment funds on the government-wide Statement of Net Position.

Note 2

Accounting, Reporting, and Entity Changes

Reporting Changes. Effective for fiscal year 2014 reporting, the state adopted the following new standards issued by the Governmental Accounting Standards Board (GASB):

Statement No. 67 Financial Reporting for Pension Plans, amending GASB 25. GASB Statement No. 67 relates to pension plans that are administered through trusts or equivalent arrangements that meet certain criteria. This statement addresses accounting and financial reporting for the activities of pension plans.

The Department of Retirement Systems (DRS) is the administrator for all but one of the state administered pension plans that are subject to Statement No. 67. The DRS Statement No. 67 compliant stand-alone financial report may be obtained by contacting the Washington State Department of Retirement Systems, PO Box 48380, Olympia, WA 98504-8380 or online at: http://www.drs.wa.gov.

Implementation of Statement No. 67 reporting requirements for the Volunteer Fire Fighters' and Reserve Officers' Relief and Pension Fund is reflected in Note 11 Retirement Plans.

Statement No. 69 Government Combinations and Disposals of Government Operations. GASB Statement No. 69 addresses mergers, acquisitions, and transfers of operations. This statement did not have an impact on the financial statements.

Statement No. 70 Accounting and Financial Reporting for Nonexchange Financial Guarantees. GASB Statement No. 70 requires recognition of a liability when certain factors indicate that it is more likely than not that the state will be required to make a payment on a nonexchange financial guarantee. The statement also specifies information to be disclosed by the state when it extends nonexchange financial guarantees. The state has extended a nonexchange financial guarantee on certain debt issued by state school districts. Statement No. 70 required disclosure is reflected in Note 13 Commitments and Contingencies.

Fund Reclassification. During fiscal year 2014, it was determined that one special revenue fund no longer had a dedicated revenue source so beginning fund balances were restated by a reduction of \$7 thousand in Nonmajor Governmental Funds and an increase of \$7 thousand in the Administrative Accounts in the General Fund.

Prior Period Adjustment. The University of Washington (UW) recorded a prior period adjustment to properly report balances related to their Internal Lending Program which is reported within the Higher Education Student Services Fund. The adjustment impacted the Higher Education Special Revenue Fund, a major governmental fund, with a decrease of \$276.1 million, and the Higher Education Student Services, a major enterprise fund, with an increase of \$74.2 million. The adjustment also increased pooled cash in an agency fund by \$134.6 million.

The UW also posted a beginning balance adjustment to correct for prior errors in recording of the investment of the UW non-endowed monies. The adjustment increased fund balance in the Higher Education Special Revenue Fund, a major governmental fund, by \$401.1 million. The adjustment decreased fund balance of the Higher Education Endowment Fund, also a major governmental fund.

The Department of Corrections recorded a prior period adjustment to record unearned revenue associated with donations. The adjustment decreased fund balance in Nonmajor Governmental Funds by \$44 thousand.

The state is also reporting for the first time two discrete component units of the University of Washington: Northwest Hospital and Valley Medical Center.

Governmental Capital Assets and Long-term Obligations. The UW recorded a prior period \$67.3 million adjustment to governmental long-term obligations to properly report their Internal Lending Program.

The Department of Transportation recorded a prior period adjustment of \$244.4 million to governmental long-term obligations to record a land bank agreement with Sound Transit. Activities associated with the land bank agreement are exchange-like transactions where Sound Transit provides funding for highway improvements in exchange for future lease credits or conveyance of land of approximately equal value.

Fund equity at July 1, 2013, has been restated as follows (expressed in thousands):

| | Fund | equity (deficit) at | | | | | Fund | equity (deficit) |
|---|------|---------------------|--------|------------|------|---------|------|------------------|
| | | June 30, 2013, as | | Fund | Prio | Period | | as restated, |

Note 3

Deposits and Investments

A. DEPOSITS

Custodial Credit Risk. Custodial credit risk is the risk associated with the failure of a depository financial institution. In the event of a depository financial institution's failure, it is the risk that the state would not be able to recover its deposits or collateralized securities that are in the possession of the outside parties.

The state minimizes custodial credit risk by restrictions set forth in state law. Statutes require state agencies to deposit funds in financial institutions that are physically located in Washington unless otherwise expressly permitted by statute and authorized by the Washington Public Deposit Protection Commission (PDPC). The PDPC, established under chapter 39.58 of the Revised Code of Washington (RCW), makes and enforces regulations and administers a collateral pool program to ensure public funds are protected if a financial institution becomes insolvent. Securities pledged are held by a trustee agent for the benefit of the collateral pool.

At June 30, 2014, \$1.17 billion of the state's deposits with financial institutions were insured or collateralized, with the remaining \$11.3 million uninsured/uncollateralized.

B. INVESTMENTS - PENSION AND OTHER EMPLOYEE BENEFIT TRUST FUNDS (PENSION TRUST FUNDS)

1. Summary of Investment Policies

Under RCW 43.33A.030, trusteeship of the pension trust funds is vested within the voting members of the Washington State Investment Board (WSIB). The Legislature has established a standard of care for investment of these funds in RCW 43.33A.140. Additionally, the WSIB and its staff must comply with other state laws, such as the Ethics in Public Service Act, chapter 42.52 RCW, in making investment decisions and seeking to meet investment objectives.

The pension trust funds consist of retirement contributions from employer and employee participants in the Washington State Retirement System and related earnings on those contributions. The Retirement System is administered by the Department of Retirement Systems. The WSIB has exclusive control of the investment of all money invested in the pension trust funds.

In accordance with RCW 43.33A.110, the WSIB manages the pension fund portfolio to achieve maximum return at a prudent level of risk. The WSIB establishes asset allocation targets that must be considered at all times when making investment decisions. The asset mix may deviate from the target. Deviations greater than predetermined acceptable levels require rebalancing back to the target. When an asset class exceeds its range, the goal of rebalancing is to meet the target allocation within consideration of the other remaining asset classes.

Eligible Investments. The WSIB is authorized by statute as having investment management responsibility for pension funds. The WSIB is authorized to invest as provided by statute (chapter 43.33A RCW) and WSIB policy in the following: U.S. treasury bills; discount notes; repurchase agreements; reverse repurchase agreements; banker's acceptances; commercial paper; guaranteed investment contracts; U.S. government and agency (government sponsored corporations eligible for collateral purposes at the Federal Reserve) securities; non-U.S. dollar bonds; investment grade corporate bonds; non-investment grade corporate bonds; publicly traded mortgage-backed securities; privately placed mortgages; private placements of corporate debt; U.S. and foreign common stock; U.S. preferred stock; convertible securities; private equity including but not limited to investment corporations, partnerships, and limited liability companies for venture capital, leveraged buy-outs, real estate, and other tangible assets, or other forms of private equity; asset-backed securities; and derivative securities including futures, options, options on futures, forward contracts, and swap transactions. There were no violations of these investment restrictions during fiscal year 2014.

Commingled Trust Fund. Pension trust funds are invested in the Commingled Trust Fund (CTF). The CTF is a diversified pool of investments used as an investment vehicle for 14 separate retirement plans and one supplemental pension funding account. These plans hold shares in the CTF which represent a percentage ownership in the pool of investments. Plans are allowed to purchase or sell shares in the CTF, based on the fair value of the underlying assets, on the first business day of each month.

In addition to share ownership in the CTF, each retirement plan holds short-term investments that are used to manage each plan's cash needs.

The CTF consists of the Public Employees' Retirement System (PERS) Plans 1 and 2/3, Teachers' Retirement System (TRS) Plans 1 and 2/3, School Employees' Retirement System (SERS) Plans 2/3, Law Enforcement Officers' and Fire Fighters' Retirement Plans 1 and 2, Washington State Patrol Retirement System Plans 1 and 2, Public Safety Employees' Retirement System Plan 2, Volunteer Fire Fighters' and Reserve Officers' Relief and Pension Fund, and the Higher Education Retirement Supplemental Benefit Fund. PERS Plan 3, TRS Plan 3, and SERS Plan 3 are hybrid defined benefit/defined contribution plans. The participants of those plans have

the option to direct their contributions to the CTF or invest their defined contributions in other external options not managed by the WSIB.

CTF Investment Policies and Restrictions. The CTF is comprised of public markets equities, fixed income securities, private equity investments, tangible assets, real estate, and an innovation portfolio. The CTF's performance objective is to exceed the return of two custom benchmarks, each consisting of public indices weighted according to asset allocation targets.

The asset allocation for the CTF is formally reviewed at least every four years. The allocation policy is reviewed more frequently if there has been a fundamental change in the structure of the capital markets or in the underlying cash flow or liability structure of the pension trust funds.

When market values fall outside policy ranges, assets are rebalanced first by using normal cash flows and then through reallocations of assets across asset classes. In cases of a major rebalancing, the pension trust funds can utilize futures, forward contracts, and options in order to maintain exposure within each asset class and reduce transaction costs. Major rebalancing can occur to bring asset classes within their target ranges or when the pension trust funds are transitioning managers.

To achieve the performance and diversification objectives of the pension trust funds, the public markets equity program seeks to achieve the highest return possible consistent with prudent risk management and the desire for downside protection, with passive equity strategies as the default whenever strategies with better risk/return profiles cannot be identified; provide diversification to the pension trust funds' overall investment program; maintain liquidity in public equity; and maintain transparency into all public equity strategies to the extent possible.

The public markets equity portion of the pension trust funds invests in publicly traded equities globally, including equity securities in the U.S., developed non-U.S., and emerging markets. The program has a global benchmark, currently the Morgan Stanley Capital International All Country World Investable Market Index. A mix of external managers approved by the WSIB is used to manage the program. Passive management delivers broad diversified equity market exposure at low cost and is used when active managers cannot be identified and monitored appropriately. Passive management is also used when it is considered an appropriate alternative to active management, typically in more efficient markets. Active management is used when the pension trust funds can identify, access, and monitor successful managers in markets that are less efficient. Active management seeks to enhance the risk/return profile of the program.

The fixed income segment is managed to achieve the highest return possible consistent with the desire to control asset volatility, emphasize high yield to maturity opportunities to add value through active management, provide diversification to the overall investment program, and to meet or exceed the return of the Barclays Capital Universal Bond Index, with volatility similar to or less than the index.

RCW 43.33A.140 prohibits a corporate fixed income issue cost from exceeding 3 percent of the CTF's market value at the time of purchase, and 6 percent of its market value thereafter. However, the WSIB manages with a more restrictive concentration constraint, limiting exposure to any corporate issuer to 3 percent of the CTF fixed income portfolio's market value at all times.

The fixed income portfolio is constrained by policy from investing more than 1 percent of the portfolio's par holdings in any single issuer with a quality rating below investment grade (as defined by Barclays Capital Global Family of Fixed Income Indices). Total market value of below investment grade credit bonds (as defined by Barclays Capital Global Family of Fixed Income Indices) shall not exceed 15 percent of the market value of the fixed income portfolio. Although below investment grade mortgage-backed, asset-backed, or commercial mortgagebacked securities may not be purchased, portfolio holdings that are downgraded to those levels or are no longer rated may continue to be held. The total market value of below investment grade mortgage-backed, asset-backed, and commercial mortgage-backed securities shall not exceed 5 percent of the market value of the fixed income portfolio. The duration of the portfolio (the sensitivity of the portfolio's fair value to changes in the level of interest rates) is targeted to be within plus or minus 20 percent of the duration of the Barclays Capital Universal Index.

The major sector allocations of the fixed income portfolio are limited to the following ranges: U.S. treasuries and government agencies – 10 percent to 45 percent, credit bonds – 10 percent to 80 percent, asset-backed securities – 0 percent to 10 percent, commercial mortgage-backed securities – 0 percent to 10 percent, and mortgage-backed securities – 5 percent to 45 percent.

Pension trust funds can be invested in any appropriate private equity investment opportunity that has the potential for returns superior to traditional investment opportunities and which is not prohibited by the WSIB's policies or by law. These investment types are generally divided into venture capital, corporate finance, growth equity, special situations, distressed, mezzanine, and other investments. Private equity investments are made through limited partnership or direct investment vehicles.

The private equity investment portfolio is managed to meet or exceed the returns of the Russell 3000 by 300 basis points in the long term. To meet the return and plan objectives, the private equity portfolio has diversified investments in companies in a variety of growth stages. The portfolio also includes a broad cross-section of opportunities in different industries and geographic regions.

The primary goal of the tangible asset portfolio is to generate a long-term, high quality, stable income stream. The secondary goal is to generate appreciation approximately commensurate with inflation. The structure of the investments is primarily targeted to those funds, separate accounts, or tangible asset operating companies providing the WSIB with the most robust governance provisions related to acquisitions, dispositions, debt levels, and ongoing operational decisions for annual capital expenditures. The tangible asset portfolio invests in a number of sectors, but the primary focus is infrastructure, timber, and natural resource rights (oil and natural gas).

The WSIB's current return objective for tangible assets calls for a target benchmark of 4 percent above the U.S. Consumer Price Index over a long-term investment horizon defined as at least five years.

The WSIB's real estate program is an externally managed pool of selected partnership investments, intended to provide alternative portfolio characteristics when compared to traditional stock and bond investments. The majority of the WSIB's partnerships invest in institutional-quality real estate assets that are leased to third parties. The income generated from bond-like lease payments coupled with the hard asset qualities of commercial real estate combine to generate returns that are expected to fall between the return expectations for fixed income and equities over the long term. The real estate portfolio is managed to deliver risk-adjusted returns that are consistent with the WSIB's long-term return expectations for the asset class.

The WSIB's real estate partnerships typically invest in private real estate assets that are held for long-term income and appreciation. Many of the WSIB's investment partnerships do not involve co-investment with other financial entities, thereby providing the WSIB with control provisions, related transactions, and ongoing operational decisions for annual capital expenditures.

Volatility in the real estate portfolio is minimized through a combination of factors. First, the majority of the WSIB's partners own real estate assets in a private investment form which are not subject to public market volatility. Second, real estate capital is diversified among a host of partners with varying investment styles. Third, partnership assets are invested in numerous economic regions, including foreign markets, and in various property types. Finally, the

WSIB's partners invest at different points within the properties' capital structure and life cycle.

The WSIB's real estate portfolio current benchmark seeks to earn an 8 percent annual investment return over a rolling 10-year period.

The innovation portfolio investment strategy is to provide the WSIB with the ability to invest in assets that fall outside of traditional asset classes and to provide the WSIB with comfort and demonstrated success before committing large dollar amounts to the strategy. The overall benchmark for the innovation portfolio is the weighted average of the underlying benchmark for each asset in the portfolio.

Currently, there are three investment strategies in the innovation portfolio, two involving private partnerships and one investing in public equities.

2. Unfunded Commitments

The WSIB has entered into a number of agreements that commit the pension trust funds, upon request, to make additional investment purchases up to predetermined amounts. As of June 30, 2014, the pension trust funds had unfunded commitments of \$10.40 billion, \$8.43 billion, \$1.12 billion, and \$26.8 million in private equity, real estate, tangible assets, and the innovation portfolio, respectively.

3. Securities Lending

State law and board policy permit the pension trust funds to participate in securities lending programs to augment investment income. The WSIB has entered into an agreement with State Street Corporation to act as agent for the pension trust funds in securities lending transactions. As State Street Corporation is the custodian bank for the pension trust funds, it is counterparty to securities lending transactions.

The fair value of the securities on loan at June 30, 2014, was approximately \$3.64 billion. The pension trust funds report securities on loan in their respective categories in the Statement of Net Position. At June 30, 2014, cash collateral received totaling \$1.09 billion is reported as securities lending obligation, and the fair value of the reinvested cash collateral totaling \$1.09 billion is reported as security lending collateral in the Statement of Net Position. Securities received as collateral for which the pension trust funds do not have the ability to pledge or sell unless the borrower defaults are not reported as assets and liabilities in the Statement of Net Position. Total securities received as collateral at June 30, 2014, was \$2.63 billion.

During the fiscal year, debt and equity securities were loaned and collateralized by the pension trust funds' agent with cash, U.S. government or U.S. agency securities

including U.S. agency mortgage-backed securities (exclusive of letters of credit). When the loaned securities had collateral denominated in the same currency, the collateral requirement was 102 percent of the fair value, including accrued interest, of the securities loaned. All other securities were required to be collateralized at 105 percent of the fair value, including accrued interest, of the loaned securities.

The following table summarizes the securities held by the pension trust funds from reinvestment of cash collateral and securities received as collateral at June 30, 2014 (in thousands):

| Mortgage-backed | \$2,407,871 |
|----------------------------|-------------|
| Cash equivalents and other | 557,900 |
| Repurchase agreements | 555,295 |
| Yankee CD | 201,197 |
| Total collateral held | \$3,722,263 |

During fiscal year 2014, securities lending transactions could be terminated on demand by either the pension trust funds or the borrower. As of June 30, 2014, the cash collateral held had an average duration of 22.5 days and an average weighted final maturity of 82.2 days.

Because the securities lending agreements were terminable at will, their duration did not generally match the duration of the investments made with the cash collateral. Non-cash collateral could not be pledged or sold absent borrower default. No more than 20 percent of the total on loan value could be held by a specific borrower. Collateral investment guidelines specifically prohibit European domiciled holdings. There are no restrictions on the amount of securities that can be lent.

Securities were lent with the agreement that they would be returned in the future for exchange of the collateral. State Street Corporation indemnified the pension trust funds by agreeing to purchase replacement securities or return the cash collateral in the event a borrower failed to return the loaned securities or pay distributions thereon. State Street Corporation's responsibilities included performing

appropriate borrower and collateral investment credit analyses, demanding adequate types and levels of collateral, and complying with applicable federal regulations concerning securities lending.

During fiscal year 2014, there were no significant violations of legal or contractual provisions and no failures by any borrowers to return loaned securities or to pay distributions thereon. Further, the pension trust funds incurred no losses during fiscal year 2014 resulting from a default by either the borrowers or the securities lending agents.

4. Interest Rate Risk

Interest rate risk is the risk that changes in interest rates over time will adversely affect the fair value of an investment. The risk is managed within the portfolios using effective duration, which is the measure of a debt investment's exposure to fair value changes arising from changes in interest rates. Increases in prevailing interest rates generally translate into decreases in fair values of those investments.

While the pension trust funds do not have a formal policy relating to interest rate risk, the pension trust funds' fixed income investments are actively managed to meet or exceed the return of the Barclays Capital Universal Index, with a duration target within plus or minus 20 percent of the duration of the portfolio's performance benchmark. As of June 30, 2014, the duration of the pension trust funds' fixed income investments was within the duration target of this index.

The two schedules below provide information about the interest rate risks associated with the pension trust funds' investments as of June 30, 2014. The schedules display various asset classes held by maturity in years, effective duration, and credit ratings. All debt securities are reported using the average life within the portfolio. The average life is a calculated estimate of the average time (in years) until maturity for these securities taking into account possible prepayments of principal.

Pension Trust Funds
Schedule of Maturities and Effective Duration
June 30, 2014

| Total | \$ 1,623,712 | \$ 8,397,009 | \$ 7,103,700 | \$ 1,279,590 | \$ 18,404,011 | | |

5. Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The pension trust funds' investment policies limit the fixed income securities to investment grade or higher at the time of purchase. Investment grade securities are those fixed income securities with a Moody's rating of Aaa to Baa or a Standard and Poor's rating of AAA to BBB. The rated debt investments of the pension trust funds as of June 30, 2014, were rated by Moody's and/or an equivalent national rating organization.

Concentration of Credit Risk. Concentration of credit risk is the risk of loss attributed to the magnitude of an investment in a single issuer. The policy of the pension trust funds states no corporate fixed income issue cost shall exceed 3 percent of cost at the time of purchase or 6 percent of fair value thereafter of the fund, and no high yield issues shall exceed 1 percent of cost or 2 percent of fair value of the fund. There was no concentration of credit risk exceeding these policy guidelines as of June 30, 2014.

Custodial Credit Risk. Custodial credit risk is the risk that, in the event a depository institution or counterparty fails, the pension trust funds would not be able to recover the value of their deposits, investments, or collateral securities that are in the possession of an outside party.

The pension trust funds do not have a policy relating to custodial credit risk. The WSIB mitigates custodial credit risk by having its investment securities (excluding cash, cash equivalents, and repurchase agreements held as securities lending collateral) registered and held in the name of the WSIB for the benefit of the pension trust funds.

6. Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. The pension trust funds do not have a formal policy to limit foreign currency risk. The WSIB manages their exposure to fair value loss by requiring their international securities investment managers to maintain diversified portfolios by sector and by issuer to limit foreign currency and security risk.

The following schedule presents the exposure of pension fund investments to foreign currency risk. The schedule provides information on deposits and investments held in various foreign currencies. Private equity and real estate are presented according to the financial reporting currency of the individual funds. This is not a presentation of currency exposure relating to the underlying holdings. The schedule is stated in U.S. dollars.

Pension Trust Funds Foreign Currency Exposure by Country June 30, 2014

7. Derivatives

Pension trust funds are authorized to utilize various derivative financial instruments, including financial futures, forward contracts, interest rate swaps, credit default swaps, equity swaps, and options. Derivative transactions involve, to varying degrees, market and credit risk. At June 30, 2014, the pension trust funds held investments in financial futures and forward currency contracts that are recorded at fair value with changes in value recognized in investment income in the Statement of Changes in Net Position in the period of change. The derivative instruments are considered investment derivatives and not hedging derivatives.

Derivatives are generally used to achieve the desired market exposure of a security, index, or currency; adjust portfolio duration; or rebalance the total portfolio to the target asset allocation. Derivative contracts are instruments that derive their value from underlying assets, indices, reference interest rates, or a combination of these factors.

A derivative instrument could be a contract negotiated on behalf of the pension trust funds and a specific counterparty. This would typically be referred to as an "over the counter (OTC) contract," such as forward contracts. Alternatively, a derivative instrument, such as futures, could be listed and traded on an exchange and referred to as "exchange traded."

Inherent in the use of OTC derivatives, the pension trust funds are exposed to counterparty credit risk on all open OTC positions. Counterparty credit risk is the risk that a derivative counterparty may fail to meet its payment obligation under the derivative contract. As of June 30, 2014, the pension trust funds counterparty risk was not deemed to be significant.

Futures contracts are standardized, exchange-traded contracts to purchase or sell a specific financial instrument at a predetermined price. Gains and losses on futures contracts are settled daily based on a notional (underlying) principal value and do not involve an actual transfer of the specific instrument. The exchange assumes the risk that the counterparty will not pay and requires margin payments to minimize such risk. Futures are generally used to achieve the desired market exposure of a security or index or to rebalance the total portfolio.

Forward currency contracts are agreements to exchange the currency of one country for the currency of another country at an agreed-upon price and settlement date. These forward commitments are not standardized and carry counterparty credit risk due to the possible nonperformance by one of the counterparties. The maximum potential loss is the aggregate face value in U.S.

dollars at the time the contract was opened; however, the likelihood of such loss is remote.

At June 30, 2014, the pension trust funds had outstanding forward currency contracts with a net unrealized gain of \$14.8 million. The aggregate forward currency exchange contracts receivable and payable were \$1.05 billion and \$1.04 billion, respectively. The contracts have varying maturity dates ranging from July 31, 2014, to September 17, 2014.

At June 30, 2014, the pension trust funds' fixed income portfolio held derivative securities consisting of collateralized mortgage obligations with a fair value of \$163.3 million. Domestic and foreign passive equity index fund managers may also utilize various derivative securities to manage exposure to risk and increase portfolio returns. Information on the extent of use and holdings of derivative securities by passive equity index fund managers is unavailable.

Derivatives which are exchange traded are not subject to credit risk. The counterparty credit ratings for forward currency contracts that are subject to credit risk outstanding at June 30, 2014, had a credit rating of no less than Baa1 using Moody's rating scale.

The following schedule presents the significant terms for derivatives held as investments by the pension trust funds:

8. Reverse Repurchase Agreements – None.

C. INVESTMENTS – WORKERS' COMPENSATION FUND

1. Summary of Investment Policies

Under RCW 43.33A.030, trusteeship of the Workers' Compensation Fund investments is vested in the voting members of the Washington State Investment Board (WSIB). The Legislature established a standard of care for investment of these funds in RCW 43.33A.140. Additionally, the WSIB and its staff must comply with other state laws, such as the Ethics in Public Service Act, chapter 42.52 RCW, in making investment decisions and seeking to meet investment objectives.

The Workers' Compensation Fund consists of contributions from employers and their employees participating in the state workers' compensation program, and related earnings on those contributions. The workers' compensation program provides medical, time-loss, and disability benefit payments to qualifying individuals sustaining work-related injuries.

In accordance with state laws, the Workers' Compensation Fund investments are managed to limit fluctuations in the industrial insurance premiums and, subject to this purpose, achieve a maximum return at a prudent level of risk. Based on this requirement, the order of the objectives is:

- Maintain the solvency of the funds.
- Maintain premium rate stability.
- Ensure sufficient assets are available to fund the expected liability payments.
- Subject to the objectives above, achieve a maximum return at a prudent level of risk.

Eligible Investments. Eligible investments are securities and deposits that are in accordance with the WSIB's investment policy and chapter 43.33A RCW. Eligible investments include:

- U.S. equities.
- International equities.
- U.S. treasuries and government agencies.
- Credit bonds.
- Mortgage-backed securities rated investment grade, as defined by Barclays Capital Global Family of Fixed Income Indices.

- Asset-backed securities rated investment grade, as defined by Barclays Capital Global Family of Fixed Income Indices.
- Commercial mortgage-backed securities rated investment grade, as defined by Barclays Capital Global Family of Fixed Income Indices.
- Investment grade non-U.S. dollar bonds.

Investment Restrictions. To meet stated objectives, investments of the Workers' Compensation Fund are subject to the following constraints:

- All assets under the management of the WSIB are to be invested to maximize return at a prudent level of risk in accordance with RCW 43.33A.110 and RCW 43.33A.140.
- No corporate fixed income issue cost shall exceed 3
 percent of the fund's fair value at the time of purchase,
 nor shall its fair value exceed 6 percent of the fund's
 fair value at any time.
- Asset allocations are to be reviewed every three to four years or sooner if there are significant changes in funding levels or the liability durations.
- Assets are to be rebalanced across asset classes when the fair value of the assets falls outside the policy ranges. The timing of any rebalancing will be based on market opportunities, cash flows, and the consideration of transaction costs; therefore, they need not occur immediately.
- Sector allocation for U.S. equities should be within a range of 55 percent to 65 percent. Allocation for international equities should be within a range of 35 percent to 45 percent.
- The benchmark and structure for U.S. equities will be the broad U.S. stock market as defined by the Morgan Stanley Capital International (MSCI) U.S. Investable Market Index. The benchmark and structure for international equities will be the MSCI All Country World Ex U.S. Investable Market Index. Both portfolios will be 100 percent passively managed in commingled index funds. The commingled funds may use futures for hedging or establishing a long position.
- Sector allocation of fixed income investments must be managed within the following prescribed ranges: U.S. treasuries and government agencies 5 percent to 25 percent, credit bonds 20 percent to 80 percent, assetbacked securities 0 percent to 10 percent, commercial mortgage-backed securities 0 percent to 10 percent, and mortgage-backed securities 0 percent to 25

percent. These targets are long-term in nature. Deviations may occur in the short term as a result of interim market conditions. However, if a range is exceeded, the portfolios must be rebalanced to the target allocations as soon as it is practical.

• Total market value of below investment grade credit bonds (as defined by Barclays Capital Global Family of Fixed Income Indices) shall not exceed 5 percent of the total market value of the funds. Although below investment grade mortgage-backed, asset-backed, and commercial mortgage-backed securities may not be purchased, portfolio holdings that are downgraded to those levels or are no longer rated may continue to be held. Total market value of below investment grade mortgage-backed, asset-backed, and commercial mortgage-backed securities shall not exceed 5 percent of total market value of the funds.

2. Securities Lending

State law and WSIB policy permit the Workers' Compensation Fund to participate in securities lending programs to augment investment income. The WSIB has entered into an agreement with State Street Corporation to act as agent for the Workers' Compensation Fund in securities lending transactions. As State Street Corporation is the custodian bank for the Workers' Compensation Fund, it is counterparty to securities lending transactions.

The fair value of the securities on loan at June 30, 2014, was approximately \$69.4 million. The Workers' Compensation Fund reports securities on loan in the Statement of Net Position in their respective categories. At June 30, 2014, cash collateral received totaling \$4.1 million is reported as a securities lending obligation, and the fair value of the reinvested cash collateral totaling \$4.1 million is reported as security lending collateral in the Statement of Net Position. Securities received as collateral for which the Workers' Compensation Fund does not have the ability to pledge or sell unless the borrower defaults are not reported as assets and liabilities in the Statement of Net Position. Total securities received as collateral at June 30, 2014, was \$66.9 million.

During fiscal year 2014, debt securities were loaned and collateralized by the Workers' Compensation Fund's agent with cash and U.S. government or U.S. agency securities including U.S. agency mortgage-backed securities (exclusive of letters of credit). When the loaned securities had collateral denominated in the same currency, the collateral requirement was 102 percent of the fair value, including accrued interest, of the securities loaned. All other securities were required to be collateralized at 105 percent of the fair value, including accrued interest, of the loaned securities.

The following table summarizes the securities held from reinvestment of cash collateral and securities received as collateral at June 30, 2014 (in thousands):

| \$66,867 |
|----------|
| 2,093 |
| 1,264 |
| 758 |
| \$70,982 |
| |

During fiscal year 2014, securities lending transactions could be terminated on demand by either the Workers' Compensation Fund or the borrower. As of June 30, 2014, the cash collateral held had an average duration of 22.5 days and an average weighted final maturity of 82.2 days. Because the securities lending agreements were terminable at will, their duration did not generally match the duration of the investments made with the cash collateral. Non-cash collateral could not be pledged or sold absent borrower default. No more than 20 percent of the total on loan value can be held by a specific borrower. Collateral investment guidelines specifically prohibit European domiciled holdings. There are no restrictions on the amount of securities that can be lent.

Securities were lent with the agreement that they would be returned in the future for exchange of the collateral. State Street Corporation indemnified the Workers' Compensation Fund by agreeing to purchase replacement securities or return the cash collateral in the event a borrower failed to return the loaned securities or pay distributions thereon. State Street Corporation's responsibilities included performing appropriate borrower and collateral investment credit analyses, demanding adequate types and levels of collateral, and complying with applicable federal regulations concerning securities lending.

During fiscal year 2014, there were no significant violations of legal or contractual provisions, no failures by any borrowers to return loaned securities or to pay distributions thereon. Further, the Workers' Compensation Fund incurred no losses during fiscal year 2014 resulting from a default by either the borrowers or the securities lending agents.

3. Interest Rate Risk

Interest rate risk is the risk that changes in interest rates over time will adversely affect the fair value of an investment. While the Workers' Compensation Fund does not have a formal policy relating to interest rate risk, the risk is managed within the Workers' Compensation Fund portfolio using effective duration which is the measure of a debt investment's exposure to fair value changes arising from changes in interest rates. Increases in prevailing interest rates generally translate into decreases in fair values of those investments. As of June 30, 2014, the Workers'

Compensation Fund portfolio durations were within the prescribed duration targets.

The two schedules below provide information about the interest rate risks associated with the Workers' Compensation Fund investments as of June 30, 2014. The

schedules display various asset classes held by maturity in years, effective duration, and credit ratings. All debt securities are reported using the average life within the portfolio. The average life is a calculated estimate of the average time (in years) until maturity for these securities taking into account possible prepayments of principal.

4. Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The Workers' Compensation Fund investment policies limit the fixed income securities to investment grade or higher at the time of purchase. Investment grade securities are those fixed income securities with a Moody's rating of Aaa to Baa or a Standard and Poor's rating of AAA to BBB.

The rated debt investments of the Workers' Compensation Fund as of June 30, 2014, were rated by Moody's and/or an equivalent national rating organization.

Concentration of Credit Risk. Concentration of credit risk is the risk of loss attributed to the magnitude of an investment in a single issuer. The Workers' Compensation Fund policy states that no corporate fixed income issue cost shall exceed 3 percent of the fund's fair value at the time of purchase, nor shall its fair value exceed 6 percent of the fund's fair value at any time. There was no concentration of credit risk as of June 30, 2014.

Custodial Credit Risk. Custodial credit risk is the risk that, in the event a depository institution or counterparty fails, the Workers' Compensation Fund would not be able to recover the value of its deposits, investments, or collateral securities. The Workers' Compensation Fund does not have a policy relating to custodial credit risk. The WSIB mitigates custodial credit risk by having its investment securities (excluding cash, cash equivalents, and repurchase agreements held as securities lending collateral) registered and held in the name of the WSIB for the benefit of the Workers' Compensation Fund.

5. Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. The Workers' Compensation Fund does not have a formal policy to limit foreign currency risk. At June 30, 2014, the only securities held by the Workers' Compensation Fund with potential foreign currency exposure were \$682.4 million invested in an international commingled equity index fund.

6. Derivatives

To manage its exposure to fluctuations in interest and currency rates while increasing portfolio returns, the Workers' Compensation Fund is authorized to utilize various derivative financial instruments including collateralized mortgage obligations, financial futures, forward contracts, interest rate and equity swaps, and options. Derivative transactions involve, to varying degrees, market and credit risk. The Workers' Compensation Fund mitigates market risks arising from derivative transactions by requiring collateral in cash and

investments to be maintained equal to the securities positions outstanding, and thereby prohibiting the use of leverage or speculation. Credit risks arising from derivative transactions are mitigated by selecting and monitoring creditworthy counterparties and collateral issuers.

Domestic and foreign passive equity index fund managers may also utilize various derivative securities to manage exposure to risk and increase portfolio returns. Information on the extent of use and holdings of derivative securities by passive equity index fund managers is unavailable.

At June 30, 2014, the only derivative securities held directly by the Workers' Compensation Fund were collateralized mortgage obligations of \$1.47 billion.

7. Reverse Repurchase Agreements - None.

D. INVESTMENTS – LOCAL GOVERNMENT INVESTMENT POOL

1. Summary of Investment Policies

The Local Government Investment Pool (LGIP) is managed and operated by the Office of the State Treasurer (OST). The State Finance Committee is the administrator of the statute that created the pool and adopts appropriate rules. The state treasurer is responsible for establishing the investment policy for the pool and reviews the policy annually. Any proposed changes are reviewed by the LGIP Advisory Committee. The terms of the policy are designed to ensure the safety and liquidity of the funds deposited in the LGIP.

The state treasurer and designated investment officers shall adhere to all restrictions on the investment of funds established by law and by policy.

The LGIP portfolio is invested in a manner generally consistent with Rule 2a-7 money market funds, as currently recognized by the Securities and Exchange Commission (17CFR.270.2a-7). Rule 2a-7 funds are limited to high quality obligations with limited maximum and average maturities, the effect of which is to minimize both market and credit risk.

Investments, other than bank deposits, are valued at amortized cost. The bank deposits are valued at historical cost. Both valuation methods approximate fair value. Security transactions are reported on a trade date basis in accordance with generally accepted accounting principles.

Investment Objectives. The objectives of the LGIP investment policy, in priority order, are safety, liquidity, and return on investment.

Safety of principal is the primary objective. Investments shall be undertaken in a manner that seeks to ensure preservation of capital in the overall portfolio.

The investment portfolio will remain liquid to enable the state treasurer to meet all cash requirements that might reasonably be anticipated.

The LGIP will be structured with the objective of attaining a market rate of return throughout budgetary and economic cycles, commensurate with the investment risk parameters and the cash flow characteristics of the pool.

Eligible Investments. Eligible investments are only those securities and deposits authorized by statute (chapters 39.58, 39.59, and 43.84.080 RCW). Eligible investments include:

- Obligations of the U.S. government.
- Obligations of U.S. government agencies or of corporations wholly owned by the U.S. government.
- Obligations of government-sponsored corporations that are or may become eligible as collateral for advances to member banks as determined by the board of governors of the Federal Reserve.
- Banker's acceptances purchased on the secondary market rated with the highest short-term credit rating of any two Nationally Recognized Statistical Rating Organizations (NRSROs) at the time of purchase. If the banker's acceptance is rated by more than two NRSROs, it must have the highest rating from all of the organizations.
- Commercial paper provided that the OST adheres with policies and procedures of the Washington State Investment Board regarding commercial paper (RCW 43.84.080(7)).
- Certificates of deposit or demand deposits with financial institutions qualified by the Washington Public Deposit Protection Commission.
- Obligations of the state of Washington or its political subdivisions.

Investment Restrictions. To provide for safety and liquidity of funds, the LGIP policy places the following restrictions on the investment portfolio:

 Investments are restricted to fixed rate securities that mature in 397 days or less, except securities utilized in repurchase agreements and U.S. government floating or variable rate notes which may have a maximum maturity of 762 days, provided they have reset dates within one year and that on any reset date can reasonably be expected to have a fair value that approximates their amortized cost.

- The weighted average maturity of the portfolio will not exceed 60 days.
- The weighted average life of the portfolio will not exceed 120 days.
- The purchase of investments in securities other than those issued by the U.S. government or its agencies will be limited.
- Cash generated through securities lending or reverse repurchase agreement transactions will not increase the dollar amount of specified investment types beyond stated limits.

2. Securities Lending

State statutes permit the LGIP to lend its securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. The LGIP has contracted with Citibank, N.A. as a lending agent and receives a share of income earned from this activity. The lending agent lends securities and receives collateral, which can be in the form of cash or other securities. The collateral, which must be valued at 102 percent of the fair value of the loaned securities, is priced daily and, if necessary, action is taken to maintain the collateralization level at 102 percent. Cash collateral received from the lending of non coupon-bearing securities shall not be valued at less than 102 percent of fair value, not to exceed par.

The cash is invested by the lending agent in accordance with investment guidelines approved by the LGIP. The securities held as collateral and the securities underlying the cash collateral are held by the LGIP's custodian. One option available to the lending agent is to invest cash collateral with the LGIP. Maturities of investments made with cash collateral are generally matched to maturities of securities loaned.

During fiscal year 2014, the LGIP lent U.S. Agency and Treasury securities. Cash collateral was reinvested in repurchase agreements and interest bearing bank deposits. At fiscal year end, there were no securities on loan.

The LGIP investment policy requires that any securities on loan be made available by the lending agent for next day liquidity at the option of the LGIP. During fiscal year 2014, the LGIP had no credit risk exposure to borrowers because the amounts owed to the borrowers exceeded the amounts the borrowers owed the LGIP. Furthermore, contracts require the lending agent to indemnify the LGIP if the borrowers fail to return securities and if collateral is

inadequate to replace the securities lent, or if the borrower fails to pay the LGIP for income distribution by the securities' issuers while the securities are on loan.

The LGIP cannot pledge or sell collateral securities received unless the borrower defaults. The LGIP investment policy limits the amount of reverse repurchase agreements and securities lending to 30 percent of the total portfolio. There were no violations of legal or contractual provisions and no losses resulting from a default of a borrower or lending agent during the fiscal year.

3. Interest Rate Risk

Interest rate risk is the risk that changes in interest rates of debt instruments will adversely affect the fair value of an investment. The LGIP portfolio is invested in a manner generally consistent with the Securities and Exchange Commission's Rule 2a-7 of the Investment Company Act of 1940, as it currently stands, i.e., money market funds. To a great extent, the Rule 2a-7 investment guidelines and LGIP policy restrictions are directed towards limiting interest rate risk in order to maintain a stable net asset value. As of June 30, 2014, the LGIP had a weighted average maturity of 30 days and a weighted average life of 85 days.

The following schedule presents the LGIP investments and related maturities, and provides information about the associated interest rate risks as of June 30, 2014:

| Local Government Investment Pool (LGIP) | | | | | | |
|---|--|--|--|--|--|--|
| June 30, 2014 | | | | | | |
| (expressed in thousands) | | | | | | |

(expressed in thousands)

| | | | Maturity | | | | | | |
|-----------------------------------|------------------|-----|---------------|----|----------|--|--|--|--|
| Investment Type | Fair Value | Les | s than 1 Year | 1 | -5 Years | | | | |
| U.S. agency obligations | \$ 8,286,216 | \$ | 7,667,646 | \$ | 618,570 | | | | |
| U.S. government obligations | 649,887 | | 349,930 | | 299,957 | | | | |
| Repurchase agreements | 1,200,000 | | 1,200,000 | | - | | | | |
| Interest bearing bank accounts | 958,200 | | 958,200 | | - | | | | |
| Certificates of deposit and other | 62,451 | | 62,451 | | - | | | | |
| Total | \$ 11,156,754 | \$ | 10,238,227 | \$ | 918,527 | | | | |
| | | | | | | | | | |

4. Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The LGIP investment policy limits the types of securities available for investment to obligations of the U.S. government or its agencies, obligations of government-sponsored corporations, banker's acceptances, commercial paper, deposits with qualified public depositaries, and obligations of the state of Washington or its political subdivisions.

Banker's acceptances and commercial paper must be rated with the highest short-term credit rating of any two Nationally Recognized Statistical Rating Organizations at the time of purchase. The LGIP currently does not have any banker's acceptances, commercial paper, or municipal bonds in its portfolio.

Custodial Credit Risk. Custodial credit risk is the risk that, in the event a depository institution or counterparty fails, the LGIP will not be able to recover the value of its deposits, investments, or collateral securities that are in the possession of an outside party. The LGIP investment policy requires that securities purchased by the office be

held by the master custodian, acting as an independent third party, in its safekeeping or trust department. Securities utilized in repurchase agreements are subject to additional restrictions. These restrictions are designed to limit the LGIP's exposure to risk and insure the safety of the investment. All securities utilized in repurchase agreements were rated AAA by Moody's and AA+ by Standard & Poor's. The fair value of securities utilized in repurchase agreements must be at least 102 percent of the value of the repurchase agreement.

Concentration of Credit Risk. Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. The LGIP mitigates concentration of credit risk by limiting the purchase of securities of any one issuer, with the exception of U.S. Treasury and U.S. Agency securities, to no more than 5 percent of the portfolio.

Repurchase agreements comprise 10.8 percent of the total portfolio as of June 30, 2014. The LGIP limits the securities utilized in repurchase agreements to U.S. Treasury and U.S. Agency securities. The LGIP requires

delivery of all securities utilized in repurchase agreements and the securities are priced daily.

As of June 30, 2014, U.S. Treasury securities comprised 5.8 percent of the total portfolio. U.S. Agency securities comprised 74.3 percent of the total portfolio, including Federal Home Loan Bank (63.6 percent), Federal Home Loan Mortgage Corporation (0.9 percent), Federal Farm Credit Bank (8.9 percent), and Federal National Mortgage Association (0.9 percent).

5. Foreign Currency Risk - None.

6. Derivatives - None.

7. Repurchase and Reverse Repurchase Agreements

The fair value plus accrued income of mortgage-backed securities utilized in repurchase agreements with more than seven days remaining until maturity will be 105 percent of the value of the repurchase agreement. The fair value plus accrued income of all other securities utilized in repurchase agreements will be 102 percent of the value of the repurchase agreement.

The securities utilized in repurchase agreements are priced daily and held by the LGIP's custodian in the state's name. Collateralized mortgage obligations utilized in repurchase agreements must pass the Federal Financial Institutions Examination Council test, or not exceed a volatility rating of V-5 by Fitch Investor Services, or a similar rating of a nationally recognized rating agency. As of June 30, 2014, repurchase agreements totaled \$1.20 billion.

State law also permits the LGIP to enter into reverse repurchase agreements which are, by contract, sales of securities with a simultaneous agreement to repurchase them in the future at the same price plus a contract rate of interest. The fair value of the securities pledged as collateral by the LGIP underlying the reverse repurchase agreements normally exceeds the cash received, providing the dealers a margin against a decline in the fair value of the securities.

If the dealers default on their obligations to resell these securities to the LGIP or to provide equal value in securities or cash, the LGIP would suffer an economic loss equal to the difference between the fair value plus accrued interest of the underlying securities and the agreement obligation, including accrued interest. During fiscal year 2014, the LGIP did not enter into any reverse repurchase agreements.

E. INVESTMENTS – HIGHER EDUCATION SPECIAL REVENUE, ENDOWMENT, AND STUDENT SERVICES FUNDS

1. Summary of Investment Policies

The investments of the University of Washington represent 71 percent of the total investments in Higher Education Special Revenue, Endowment, and Student Services Funds.

The Board of Regents of the University of Washington is responsible for the management of the University's investments. The board establishes investment policy, which is carried out by the Chief Investment Officer.

The University of Washington Investment Committee, comprised of board members and investment professionals, advises on matters relating to the management of the University's investment portfolios.

The majority of the University's investments are insured, registered, and held by the University's custodial bank as an agent for the University. Investments not held by the custodian include venture capital, private equity, opportunistic investments, marketable alternatives, mortgages, real assets, and miscellaneous investments.

The University combines most short-term cash balances in the Invested Funds Pool. At June 30, 2014, the Invested Funds Pool totaled \$1.61 billion. The fund also owns units in the Consolidated Endowment Fund valued at \$668.9 million on June 30, 2014.

By University policy, departments with qualifying funds in the Invested Funds Pool receive distributions based on their average balances and on the type of balance. Campus depositors received 2 percent in fiscal year 2014. Endowment operating and gift accounts received 3 percent in fiscal year 2014 with the distributions directed to University Advancement. The difference between the actual earnings of the Invested Funds Pool and the calculated distributions is used to support activities benefiting all University departments.

The majority of the endowed funds are invested in a pooled fund called the Consolidated Endowment Fund (CEF). Individual endowments purchase units in the pool on the basis of a per unit valuation of the CEF at fair value on the last business day of the calendar quarter. Income is distributed based on the number of units held. Chapter 24.55 RCW and the Uniform Prudent Management of Institutional Funds Act allow for total return expenditure in the CEF under comprehensive prudent standards.

Under the CEF spending policy approved by the Board of Regents, quarterly distributions to programs are based on an annual percentage rate of 4 percent applied to the five-year rolling average of the CEF's market valuation. Additionally, the policy allows for an administrative fee of 1 percent supporting campus-wide fundraising and stewardship activities and offsetting the internal cost of managing endowment assets.

The University records its permanent endowments at the lower of original gift value or current market value in the Restricted Nonexpendable Net Position category. Of the endowments that are recorded at current market value, the net deficiency from the original gift value is \$4.7 million at June 30, 2014.

Funds in irrevocable trusts managed by trustees other than the University are not reported in the financial statements. The fair value of these funds was \$111.8 million at June 30, 2014. Income received from these trusts, which is included in investment income, was \$2.3 million for the year ended June 30, 2014.

Net appreciation (depreciation) in the fair value of investments includes both realized and unrealized gains and losses on investments. The University realized net gains of \$58.7 million in 2014 from the sale of investments.

The calculation of realized gains and losses is independent of the net appreciation of the fair value of investments. Realized gains and losses on investments that have been held in more than one fiscal year and are sold in the current year include the net appreciation of these investments reported in the prior year(s). The net appreciation in the fair value of investments during the year ended June 30, 2014, was \$397.9 million.

The following schedule presents the fair value of the University's investments by type at June 30, 2014:

| Investment Type Fair Value Cash equivalents \$ 3,394 Fixed income 1,972,553 Equity 1,672,262 Non-marketable alternatives 349,778 Absolute return 509,476 Real assets 219,069 Miscellaneous 4,724 Total \$ 4,731,256 | University of Washington June 30, 2014 | |

| Miscellaneous 4,724 | Absolute return | 509,476 |
| | Real assets | 219,069 |
| Total \$ 4,731,256 | Miscellaneous | 4,724 |
| | Total | \$ 4,731,256 |

2. Funding Commitments

The University enters into contracts with investment managers to fund alternative investments. As of June 30, 2014, the University had outstanding commitments to fund alternative investments in the amount of \$262.2 million.

3. Securities Lending

The University's investment policies permit it to lend its securities to broker dealers and other entities. As of June 30, 2014, the University had no securities on loan.

4. Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of fixed income securities. The University manages interest rate risk through its investment policies and the investment guidelines established with each manager. Each fixed

income manager is assigned a maximum boundary for duration as compared to the manager's relevant benchmark index. The goal is to allow ample freedom for the manager to perform while controlling the interest rate risk in the portfolio.

Effective duration is a commonly used measure of interest rate risk. The longer the duration, the more sensitive the portfolio is to changes in interest rates. The weighted average effective duration of the University's fixed income portfolio was 1.91 years at June 30, 2014.

5. Credit Risk

Fixed income securities are subject to credit risk, which is the risk that the issuer or other counterparty to a financial instrument will not fulfill its obligations, or that negative perceptions of the issuer's ability to make these payments will cause prices to decline. The University's investment policies limit fixed income exposure to investment grade assets. The investment policy for the Invested Funds' cash pool requires each manager to maintain an average quality rating of AA as issued by a nationally recognized rating organization. The investment policy for the Invested Funds' liquidity pool requires each manager to maintain an average quality rating of A and to hold at least 25 percent of their portfolios in government and government agency issues.

The investment policy for the CEF reflects its long-term nature by specifying average quality rating levels by individual manager, but still restricting investments to investment grade credits.

Custodial Credit Risk. Custodial credit risk is the risk that, in the event of a failure of the counterparty to a transaction, the University will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. The University does not have a formal policy regarding custodial credit risk.

However, all University investments in the CEF and the Invested Funds Pool are held in the name of the University and are not subject to custodial credit risk.

Concentration of Credit Risk. Concentration of credit risk is the risk of loss attributed to the magnitude of an investment in a single issuer. The CEF investment policy limits concentration by manager, country (other than U.S.), and market sector. The University further mitigates concentration of credit risk through the due diligence of each manager and careful monitoring of asset concentrations.

The composition of the fixed income securities at June 30, 2014, along with credit quality and effective duration measures is summarized below. The schedule excludes \$35.8 million of fixed income securities held outside the CEF and the Invested Funds Pool, which makes up 1.81 percent of the University's investments.

University of Washington
Invested Funds Pool and Consolidated Endowment Fund

6. Foreign Currency Risk

Foreign currency risk is the risk that investments denominated in foreign currencies may lose value due to adverse fluctuations in the value of the U.S. dollar relative to foreign currencies. The University's investment policies permit investments in international equity and other asset

classes that can include foreign currency exposure. To manage foreign currency exposure, the University also enters into foreign currency forward contracts, futures contracts, and options. The University held non-U.S. denominated securities at June 30, 2014, of \$1.03 billion.

The following schedule details the market value of foreign denominated securities by currency type:

University of Washington
Consolidated Endowment Fund
Foreign Currency Risk
June 30, 2014
(expressed in thousands)

| Foreign Currency | Amount |
|----------------------|-------------|
| E.M.UEuro | \$ 156,509 |

| Indonesia-Rupiah | 14,732 |
| Remaining currencies | 166,883 |
| Total | \$1,029,318 |
| | |

7. Derivatives

The University's investment policies allow investing in various derivative instruments, including futures, swaps, and forwards, to manage exposures within or across the portfolio and to improve the portfolio's risk/return profile. Futures are financial contracts obligating the buyer to purchase an asset at a predetermined future date and price. Total return swaps involve commitments to pay interest in exchange for a market linked return, both based on notional amounts. Derivative instruments are recorded on the contract date and are carried at fair value

using listed price quotations or amounts that approximate fair value.

Credit exposure represents exposure to counterparties relating to financial instruments where gains exceed collateral held by the University or losses are less than the collateral posted by the University. There was no credit exposure as of June 30, 2014. The University had no hedging derivatives, only derivatives for investment purposes.

Details on foreign currency derivatives are disclosed under Foreign Currency Risk.

The following schedule presents the significant terms for derivatives held as investments by the University:

| University of Washington Derivative Investments June 30, 2014 (expressed in thousands) | | | | | | |
|--|---|-----|----|---|----|---------|
| , | Changes in Fair Value - Included in Investment Income (Loss) | | ١ | Fair Value - nvestment Derivative | | |
| Category | Amount | | | Amount | N | otional |
| Futures contracts | \$ | 766 | \$ | 18,815 | \$ | 18,049 |

8. Reverse Repurchase Agreements - None.

F. INVESTMENTS - OFFICE OF THE STATE TREASURER CASH MANAGEMENT ACCOUNT

1. Summary of Investment Policies

The Office of the State Treasurer (OST) operates the state's Cash Management Account for investing Treasury/Trust Funds in excess of daily requirements.

The overall objective of the OST investment policy is to construct, from eligible investments noted below, an investment portfolio that is optimal or efficient. An optimal or efficient portfolio is one that provides the greatest expected return for a given expected level of risk, or the lowest expected risk for a given expected return.

The emphasis on "expected" is to recognize that investment decisions are made under conditions of risk and uncertainty. Neither the actual risk nor return of any investment decision is known with certainty at the time the decision is made.

Eligible Investments. Eligible investments are only those securities and deposits authorized by statute (chapters 39.58, 39.59, 43.250, and 43.84.080 RCW). Eligible investments include:

- Obligations of the U.S. government.
- Obligations of U.S. government agencies or of corporations wholly owned by the U.S. government.
- Obligations of government-sponsored enterprises that are or may become eligible as collateral for advances to member banks as determined by the board of governors of the Federal Reserve.
- Banker's acceptances purchased on the secondary market rated with the highest short-term credit rating of any two Nationally Recognized Statistical Rating Organizations (NRSROs) at the time of purchase. If the banker's acceptance is rated by more than two NRSROs, it must have the highest rating from all of the organizations.
- Commercial paper provided that the OST adheres to policies and procedures of the Washington State Investment Board regarding commercial paper (RCW 43.84.080(7)).
- Certificates of deposit with financial institutions qualified by the Washington Public Deposit Protection Commission.
- Local Government Investment Pool (LGIP).

 Obligations of the state of Washington or its political subdivisions.

Investment Restrictions. To provide for the safety and liquidity of Treasury/Trust Funds, the Cash Management Account investment portfolio is subject to the following restrictions:

- The final maturity of any security will not exceed ten years.
- Purchase of collateralized mortgage obligations is not allowed.
- The allocation to investments subject to high price sensitivity or reduced marketability will not exceed 15 percent of the daily balance of the portfolio.

Additionally, investments in non-government securities, excluding collateral of repurchase agreements, must fall within prescribed limits.

2. Securities Lending

State statutes permit the OST to lend its securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. The OST has contracted with Citibank, N.A. as a lending agent and receives a share of income earned from this activity. The lending agent lends securities and receives collateral, which can be in the form of cash or other securities. The collateral, which must be valued at 102 percent of the fair value of the loaned securities, is priced daily and, if necessary, action is taken to maintain the collateralization level at 102 percent.

The cash is invested by the lending agent in accordance with investment guidelines approved by the OST. The securities held as collateral and the securities underlying the cash collateral are held by the custodian. One option available to the lending agent is to invest cash collateral into an OST account in the LGIP. At June 30, 2014, cash collateral totaled \$152.7 million, all of which was invested in the LGIP.

Contracts require the lending agent to indemnify the OST if the borrowers fail to return securities and if the collateral is inadequate to replace the securities lent, or if the borrower fails to pay the OST for income distribution by the securities' issuers while the securities are on loan. The OST cannot pledge or sell collateral securities received unless the borrower defaults. At June 30, 2014, the fair value of securities on loan totaled \$149.1 million.

The OST investment policy requires that any securities on loan be made available by the lending agent for next day liquidity at the option of the OST. During fiscal year 2014, the OST had no credit risk exposure to borrowers because

the amounts owed to the borrowers exceeded the amounts the borrowers owed the OST.

There were no violations of legal or contractual provisions or any losses resulting from a default of a borrower or lending agent during the fiscal year.

3. Interest Rate Risk

Interest rate risk is the risk that changes in interest rates of debt instruments will adversely affect the fair value of an investment. The Treasury/Trust investments are separated

into portfolios with objectives based primarily on liquidity needs.

The OST's investment policy limits the weighted average maturity of its investments based on cash flow expectations. Policy also directs due diligence to be exercised with timely reporting of material deviation from expectations and actions taken to control adverse developments as may be possible.

The following schedule presents the OST investments and related maturities, and provides information about the associated interest rate risks as of June 30, 2014:

| Office of the State Treasurer (OST) |
|-------------------------------------|
| Cash Management Account |
| June 30, 2014 |
| (expressed in thousands) |

| | | | IVIALU | irity | |
|--------------------------------|-----------------|-----|---------------|-------|-----------|
| Investment Type | Fair Value | Les | s than 1 Year | | 1-5 Years |
| U.S. agency obligations | \$ 2,122,490 | \$ | 421,760 | \$ | 1,700,730 |
| U.S. government obligations | 956,999 | | 55,794 | | 901,205 |
| Certificates of deposit | 165,000 | | 165,000 | | - |
| Investments with LGIP | 2,024,072 | | 2,024,072 | | - |
| Interest bearing bank accounts | 180,929 | | 180,929 | | |
| Total | \$ 5,449,490 | \$ | 2,847,555 | \$ | 2,601,935 |
| | | | | | |

4. Credit Risk

The OST limits credit risk by adhering to the OST investment policy which restricts the types of investments the OST can participate in, such as: U.S. government and agency securities, banker's acceptances, commercial paper, and deposits with qualified public depositaries.

Custodial Credit Risk. The custodial credit risk for investments is the risk that, in the event of a failure of the counterparty, a government will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. The OST investment policy requires that securities purchased by the office be held by the master custodian, acting as an independent third party, in its safekeeping or trust department. Securities utilized in repurchase agreements are subject to additional restrictions. These restrictions are designed to limit the OST's exposure to risk and insure the safety of the investment.

Concentration of Credit Risk. Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. For non-governmental securities, the OST limits its exposure to concentration of credit risk by restricting the amount of

investments to no more than 5 percent of the portfolio to any single issuer. During fiscal year 2014, the OST did not own any non-governmental securities subject to this restriction.

Maturity

5. Foreign Currency Risk - None.

6. Derivatives - None.

7. Repurchase and Reverse Repurchase Agreements

The fair value plus accrued income of mortgage-backed securities utilized in repurchase agreements with more than seven days remaining until maturity will be 105 percent of the value of the repurchase agreement.

Treasury, agency, and money market securities will be priced at 102 percent of fair value plus accrued income, except where the counterparty is the Federal Reserve Bank of New York, in which case they will be priced at 100 percent of market value plus accrued income.

The securities utilized in repurchase agreements with a maturity date longer than seven days are priced at least weekly and are held by the Treasury/Trust custodian in the

state's name. Collateralized mortgage obligations utilized in repurchase agreements must pass the Federal Financial Institutions Examination Council test or not exceed a volatility rating of V-5 by Fitch Investor Services, or a similar rating of a nationally recognized rating agency. There were no repurchase agreements as of June 30, 2014.

State law also permits the OST to enter into reverse repurchase agreements, which are, by contract, sales of securities with a simultaneous agreement to repurchase them in the future at the same price plus a contract rate of interest. The fair value of the securities pledged as collateral by the OST underlying the reverse repurchase agreements normally exceeds the cash received, providing

the dealers a margin against a decline in the fair value of the securities.

If the dealers default on their obligations to resell these securities to the OST or to provide equal value in securities or cash, the OST would suffer an economic loss equal to the differences between the fair value plus accrued interest of the underlying securities and the agreement obligation, including accrued interest. The OST investment policy limits the amount of reverse repurchase agreements to 30 percent of the total portfolio. There were no reverse repurchase agreements during fiscal year 2014.

Note 4

Receivables, Unearned and Unavailable Revenues

A. GOVERNMENTAL FUNDS

Taxes Receivable

Taxes receivable at June 30, 2014, consisted of the following (expressed in thousands):

Notes:

⁽¹⁾ Public assistance receivables mainly represent amounts owed the state as a part of the Support Enforcement Program at the Department of Social and Health Services for the amounts due from persons required to pay support for individuals currently on state assistance, and have a low realization expectation. Accordingly, the receivable is offset by a large allowance for uncollectible receivables.

⁽²⁾ Significant long-term portions of loans receivable include \$97.4 million in the Higher Education Special Revenue Fund for student loans and \$443.8 million in Nonmajor Governmental Funds for low income housing, public works, and economic development/revitalization loans.

⁽³⁾ Long-term contracts in Nonmajor Governmental Funds are for timber sales contracts.

Unearned Revenue

Unearned revenue at June 30, 2014, consisted of the following (expressed in thousands):

C. FIDUCIARY FUNDS

Other Receivables

Other receivables at June 30, 2014, consisted of \$6.2 million for interest and other miscellaneous amounts.

Unearned Revenue

Unearned revenue at June 30, 2014, consisted of \$310 thousand for service credit restorations reported in Pension and Other Employee Benefit Plans.

Note 5

Interfund Balances and Transfers

A. INTERFUND BALANCES

Interfund balances as reported in the financial statements at June 30, 2014, consisted of the following (expressed in thousands):

| | | | | | Dι | ie From | | | |
|--------------------------------------|---------|---------|-----------------------------------|--------|----------------------------------|---------|---------------------------------|--------------------------|-------|
| Due To | General | | Hig Educ Spo General Rev | | Higher Education Endowment | | lonmajor vernmental Funds | Workers' Compensation | |
| General | \$ | - | \$ | 51,715 | \$ | - | \$ 153,703 | \$ | 243 |
| Higher Education Special Revenue | | 50,484 | | - | | - | 320,194 | | 298 |
| Higher Education Endowment | | - | | - | | - | 6 | | - |
| Nonmajor Governmental Funds | | 190,544 | | 758 | | 2,561 | 197,644 | | 52 |
| Workers' Compensation | | 1,289 | | - | | - | 5 | | - |
| Unemployment Compensation | | 1,378 | | 1,951 | | - | 846 | | 81 |
| Higher Education Student Services | | 796 | | 1,050 | | - | 1,216 | | 220 |
| Guaranteed Education Tuition Program | | 1 | | - | | - | - | | - |
| Nonmajor Enterprise Funds | | 6,283 | | 60 | | - | 638 | | 18 |
| Internal Service Funds | | 22,119 | | 1,037 | | - | 21,916 | | 5,386 |
| Fiduciary Funds | | - | | - | | - | - | | - |
| Totals | \$ | 272,894 | \$ | 56,571 | \$ | 2,561 | \$ 696,168 | \$ | 6,298 |

Nearly all interfund balances are expected to be paid within one year from the date of the financial statements. These balances resulted from the time lag between the dates that (1) interfund goods and services were provided and when the payments occurred and (2) interfund transfers were accrued and when the liquidations occurred. Interfund balances include: (1) a \$19.6 million loan from a nonmajor governmental fund to the General Fund which is expected to be paid over the next six years; and (2) a \$7.2 million loan between nonmajor governmental funds which is expected to be paid over the next eight years.

In addition to the interfund balances noted in the schedule above, there are interfund balances of \$7.1 million within the state's Pension Trust Funds.

| \$ 17,063 | \$ | 470,609 | \$ | 139 | \$ | 18,329 | \$ 108,448 | \$ 70 | \$ 1,649,150 |

B. INTERFUND TRANSFERS

Interfund transfers as reported in the financial statements for the year ended June 30, 2014, consisted of the following (expressed in thousands):

| | | | | | Trai | nsferred To | | |
|--------------------------------------|----|---------|----|--|------|-------------------------------|---------------------------------|--------------------------|
| Transferred From | G | General | E | Higher ducation Special Revenue | E | Higher ducation dowment | lonmajor vernmental Funds | orkers' pensation |
| General | \$ | - | \$ | - | \$ | - | \$ 950,452 | \$ _ |
| Higher Education Special Revenue | | 59,588 | | - | | 527,133 | 133,490 | - |
| Higher Education Endowment | | - | | 633,936 | | - | 34,370 | - |
| Nonmajor Governmental Funds | | 323,617 | | 212,587 | | 1,121 | 988,092 | - |
| Workers' Compensation | | - | | - | | - | - | - |
| Unemployment Compensation | | - | | - | | - | - | - |
| Higher Education Student Services | | - | | 322,498 | | - | 3,520 | - |
| Guaranteed Education Tuition Program | | - | | - | | - | - | - |
| Nonmajor Enterprise Funds | | 129,017 | | 10,050 | | - | 11,107 | - |
| Internal Service Funds | | 5,778 | | 9,946 | | - | - | - |
| Totals | \$ | 518,000 | \$ | 1,189,017 | \$ | 528,254 | \$ 2,121,031 | \$ - |

Except as noted below, transfers are used to (1) move revenues from the fund that statute requires to collect them to the fund that statute requires to expend them, (2) move receipts designated for debt service from the funds collecting the receipts to the debt service fund as debt service payments become due, (3) move unrestricted revenues collected in the General Fund to finance various programs accounted for in other funds in accordance with budgetary authorizations, (4) move profits from the Lottery Fund as required by law, and (5) transfer amounts to and from the General Fund as required by law.

On June 30, 2014, \$144.5 million was transferred from the General Fund Basic Account to the Budget Stabilization Account (BSA) in accordance with the provisions of the Constitution. The BSA is reported as an Administrative Account within the General Fund. The Constitution details a limited number of circumstances under which funds can be appropriated from the BSA, one of which is a favorable vote of at least three-fifths of the members of each house of the Legislature.

In addition to the transfers noted in the schedule above, there were transfers of \$4.8 million within the state's Pension Trust Funds.

C. DEPRECIATION

Depreciation expense for the year ended June 30, 2014, was charged by the primary government as follows (expressed in thousands):

| | Amount |
|--|---------------|
| Governmental Activities: | |
| General government | \$ 71,390 |
| Education - elementary and secondary (K-12) | 5,869 |
| Education - higher education | 388,207 |
| Human services | 79,445 |
| Adult corrections | 49,015 |
| Natural resources and recreation | 34,460 |
| Transportation | 108,340 |
| Total Depreciation Expense - Governmental Activities * | \$ 736,726 |
| Business-Type Activities: | |
| Workers' compensation | \$ 7,228 |
| Unemployment compensation | - |
| Higher education student services | 154,094 |
| Guaranteed education tuition program | 1 |
| Other | 1,022 |
| Total Depreciation Expense - Business-Type Activities | \$ 162,345 |

^{*} Includes \$86.3 million internal service fund depreciation that was allocated to governmental activities as a component of net internal service fund activity.

D. CONSTRUCTION IN PROGRESS

Major construction commitments of the state at June 30, 2014, are as follows (expressed in thousands):

| | Construction In Progress | Remaining Project |
|--|-----------------------------|----------------------|
| Agency / Project Commitments | June 30, 2014 | Commitments |
| Department of Commerce: | | |
| Pacific Tower renovations | \$ 539 | \$ 19,240 |
| Consolidated Technology Services: | | |
| State Data Center buildout | 9,497 | 12,324 |

Note 7

Long-Term Liabilities

A. BONDS PAYABLE

Bonds payable at June 30, 2014, are reported by the state of Washington within governmental activities and business-type activities, as applicable.

The State Constitution and enabling statutes authorize the incurrence of state general obligation debt, to which the state's full faith, credit, and taxing power are pledged, either by the Legislature or by a body designated by statute (presently the State Finance Committee).

Legislative authorization arises from:

- An affirmative vote of 60 percent of the members of each house of the Legislature, without voter approval, in which case the amount of such debt is generally subject to the constitutional debt limitation described below;
- When authorized by law for a distinct work or object and approved by a majority of the voters voting thereon at a general election, or a special election called for that purpose, in which case the amount of the debt so approved is not subject to the constitutional debt limitations described below;
- By the State Finance Committee without limitation as to amount, and without approval of the Legislature or approval of the voters.

The State Finance Committee debt authorization does not require voter approval; however, it is limited to providing for: (1) meeting temporary deficiencies of the state treasury if such debt is discharged within 12 months of the date of incurrence and is incurred only to provide for appropriations already made by the Legislature; or (2) refunding of outstanding obligations of the state.

Legal Debt Limitation

The State Constitution limits the amount of state debt that may be incurred by restricting the amount of general state revenues which may be allocated to pay principal and interest on debt subject to these limitations. More specifically, the constitutional debt limitation prohibits the issuance of new debt if it would cause the maximum annual debt service on all thereafter outstanding debt to exceed 9 percent of the arithmetic mean of general state revenues for the preceding three fiscal years. This limitation restricts the incurrence of new debt and not the amount of debt service that may be paid by the state in future years.

The State Constitution and current statutes require the State Treasurer to certify the debt service limitation for each fiscal year. In accordance with these provisions, the debt service limitation for fiscal year 2014 is \$1.19 billion.

This computation excludes specific bond issues and types, which are not secured by general state revenues. Of the \$18.96 billion general obligation bond debt outstanding at June 30, 2014, \$11.21 billion is subject to the limitation.

Based on the debt limitation calculation, the debt service requirements as of June 30, 2014, did not exceed the authorized debt service limitation.

For further information on the debt limit refer to the Certification of the Debt Limitation of the State of Washington available from the Office of the State Treasurer at:

http://www.tre.wa.gov/documents/debt_cdl2014.pdf or to Schedule 11 in the Statistical Section of this report.

Authorized But Unissued

The state had a total of \$6.48 billion in general obligation bonds authorized but unissued as of June 30, 2014, for the purpose of capital construction, higher education, transportation, and various other projects throughout the state.

Interest Rates

Interest rates on fixed rate general obligation bonds ranged from 0.2 to 7.0 percent. Interest rates on revenue bonds range from 1.64 to 7.4 percent.

Debt Service Requirements to Maturity

General Obligations Bonds

General obligation bonds have been authorized and issued primarily to provide funds for:

- Acquisition and construction of state and common school capital facilities;
- Transportation construction and improvement projects;
- Assistance to local governments for public works capital projects; and
- Refunding of general obligation bonds outstanding.

Outstanding general obligation bonds are presented in the Washington State Treasurer's Annual Report for 2014. A copy of the report is available from the Office of the State Treasurer, PO Box 40200, Olympia, Washington 98504-0200, phone number (360) 902-9000 or TTY (360) 902-8963, or by visiting their website at: http://www.tre.wa.gov/aboutUs/publications/annualReports.shtml.

Total debt service requirements to maturity for general obligation bonds as of June 30, 2014, are as follows (expressed in thousands):

| | | Governmen | tal Act | ivities | | Business-Ty | pe Activ | ities | Totals | | | | |

Revenue Bonds

Revenue bonds are authorized under current state statutes, which provide for the issuance of bonds that are not supported, or not intended to be supported, by the full faith and credit of the state.

The University of Washington issues general revenue bonds that are payable from general revenues, including student tuition and fees, grant indirect cost recovery, sales and services revenue, and investment income. General revenue bonds outstanding as of June 30, 2014, include \$162.5 million in governmental activities and \$1.60 billion in business-type activities.

The remainder of the state's revenue bonds pledge income derived from acquired or constructed assets for retirement of the debt and payment of the related interest.

Total debt service requirements for revenue bonds to maturity as of June 30, 2014, are as follows (expressed in thousands):

| | | Governmen | tal Act | ivities | | Business-Ty | pe Act | tivities | Totals | | | |
|---------------------------------|-----------|-----------|---------|----------|----|-------------|--------|-----------|-----------|-----------|----------|-----------|

Governmental activities include revenue bonds outstanding at June 30, 2014, of \$305.9 million issued by the Tobacco Settlement Authority (TSA), which is a blended component unit of the state. In November 2002, the TSA issued \$517.9 million in bonds and transferred \$450.0 million to the state to be used for increased health care, long-term care, and other programs.

These bonds do not constitute either a legal or moral obligation of the state, nor does the state pledge its full faith, credit, or taxing power for payment of these bonds. The bonds are obligations of the TSA and are secured solely by the TSA's right to receive 29.2 percent of the state's tobacco settlement revenues, restricted investments of the TSA, undistributed TSA bond proceeds, and the earnings thereon held under the indenture authorizing the bonds. Total principal and interest remaining on the bonds is \$460.9 million, payable through 2033. For the current year, pledged revenue and debt service were \$49.3 million and \$49.7 million, respectively.

Governmental activities include grant anticipation revenue bonds outstanding at June 30, 2014, of \$786.3 million issued for the Washington State Department of Transportation. The bonds were issued to finance a portion of the costs of constructing the State Route 520 Floating Bridge and Eastside Project.

These bonds do not constitute either a legal or moral obligation of the state, nor does the state pledge its full faith, credit, or taxing power for payment of these bonds. The bonds are payable solely from Federal-Aid Highway Program funds, including federal reimbursements of debt service on the bonds and federal reimbursements to the state for projects or portions of projects not financed with bond proceeds. Total principal and interest remaining on the bonds is \$1.04 billion, payable through 2029. For the current year both pledged revenue and debt service were \$30.8 million.

Governmental activities include the Transportation Infrastructure Finance and Innovation Act Bond (TIFIA Bond). In October 2012, the state issued a bond for the SR 520 Corridor Program which represents a draw-down loan from the Federal Highway Administration. As of June 30, 2014, the state had incurred \$10.0 million in expenditures eligible under the program; however TIFIA Bond funds were not drawn until fiscal year 2015.

The TIFIA Bond is payable solely from toll revenues and does not constitute either a legal or moral obligation of the state, nor does the state pledge its full faith, credit, or taxing power for payment of this bond. Total principal and interest remaining on the bond is \$18.2 million, payable through 2051.

Governmental activities include revenue bonds outstanding at June 30, 2014, of \$257.8 million issued by

Washington State University. The bonds were issued to fund various capital construction projects.

These bonds do not constitute either a legal or moral obligation of the state, nor does the state pledge its full faith, credit, or taxing power for payment of these bonds. Total principal and interest remaining on the bonds is \$413.2 million, payable through 2038. For the current year, pledged revenue and debt service were \$33.1 million and \$15.7 million, respectively.

Governmental activities include revenue bonds outstanding at June 30, 2014, of \$43.4 million issued by the Tumwater Office Properties (TOP), which is a blended component unit of the state. The bonds, issued in 2004, are payable solely from the trust estate pledged under the indenture, including rental payments. The bonds were used to construct an office building in Tumwater, Washington which the state occupied beginning in fiscal year 2006.

The bonds are not a general obligation of the state, nor does the state pledge its full faith, credit, or taxing power for payment of these bonds. Total principal and interest remaining on the bonds is \$60.7 million, payable through 2028. For the current year, both pledged revenue and debt service were \$3.9 million.

Governmental activities include revenue bonds outstanding at June 30, 2014, of \$292.8 million issued by FYI Properties, a blended component unit of the state. The bonds, issued in 2009, are payable solely from the trust estate pledged under the indenture, including rental payments. The bonds were used to construct an office building in Olympia, Washington which the state occupied beginning in fiscal year 2012.

The bonds are not a general obligation of the state, nor does the state pledge its full faith, credit, or taxing power for payment of these bonds. Total principal and interest remaining on the bonds is \$539.1 million, payable through 2039. For the current year, both pledged revenue and debt service were \$21.6 million.

Additionally, governmental activities include revenue bonds outstanding at June 30, 2014, of \$7.3 million issued by the City of Aberdeen. The bonds were used to extend utilities to the state Department of Corrections Stafford Creek Corrections Center (SCCC). The Department of Corrections entered into an agreement with the City of Aberdeen to pay a system development fee sufficient to pay the debt service on the bonds. The bonds were issued in 1998 and 2002, and refunded by the city in 2010, and are payable solely from current operating appropriations.

The bonds are not a general obligation of the state, nor does the state pledge its full faith, credit, or taxing power for payment of these bonds. Total principal and interest remaining on these bonds is \$8.5 million, payable through 2022. For the current year, both pledged revenue and debt service were \$1.5 million.

The state's colleges and universities issue bonds for the purpose of housing, dining, parking, and student facilities construction. These bonds are reported within businesstype activities and are secured by a pledge of specific revenues. These bonds are not a general obligation of the state, nor does the state pledge its full faith, credit, or taxing power for payment of these bonds.

Total pledged specific revenues for the state's colleges and universities to repay the principal and interest of revenue bonds as of June 30, 2014, are as follows (expressed in thousands):

| Source of Revenue Pledged | Housing and Dining Revenues (Net of Operating Expenses) | Student Facilities Fees and Earnings on Invested Fees | Parking Revenues (Net of Operating Expenses) | Bookstore Revenues |
|---|--|---|--|---|
| Current revenue pledged | \$ 45,469 | \$ 37,987 | \$ 2,445 | \$ 214 |
| Current year debt service | 24,472 | 16,255 | 774 | 202 |
| Total future revenues pledged * | 552,022 | 363,034 | 7,762 | 4,044 |
| Description of debt | Housing and dining bonds issued in 1998-2014 | Student facilities bonds issued in 2002-2012 | Parking system revenue bonds issued in 2005 | Student union and recreation center bonds issued in 2004 |
| Purpose of debt | Construction and renovation of student housing and dining projects | Construction, renovation and improvements to student activity facilities and sports stadium | Construction of parking garage and improvements | Construct new bookstore as part of new student union and recreation center building |

^{*} Total future principal and interest payments.

B. CERTIFICATES OF PARTICIPATION

Certificates of participation at June 30, 2014, are reported by the state of Washington within governmental activities and business-type activities, as applicable.

Current state law authorizes the state to enter into longterm financing contracts for the acquisition of real or personal property and for the issuance of certificates of participation in the contracts. These certificates of participation do not fall under the general obligation debt limitations and are generally payable only from annual appropriations by the Legislature.

Other specific provisions could also affect the state's obligation under certain agreements. The certificates of participation are recorded for financial reporting purposes if the possibility of the state not meeting the terms of the agreements is considered remote.

Total debt service requirements for certificates of participation to maturity as of June 30, 2014, are as follows (expressed in thousands):

| | Governmental Activities | | | | Business-Type Activities | | | | To | tals | |
|--|--------------------------------|----|----------|-----|--------------------------|----|----------|----|-----------|------|----------|
| Certificates of Participation | Principal | | Interest | - 1 | Principal | | Interest | | Principal | | Interest |
| By Fiscal Year: | | | | | | | | | | | |
| 2015 | \$ 109,515 | \$ | 32,482 | \$ | 4,493 | \$ | 1,333 | \$ | 114,008 | \$ | 33,815 |
| 2016 | 61,096 | | 18,867 | | 4,092 | | 1,264 | | 65,188 | | 20,131 |

| 2030-2034 | 23,585 | | 1,649 | | 1,581 | | 110 | | 25,166 | | 1,759 |
| Total Debt Service Requirements | \$ 569,885 | \$ | 160,150 | \$ | 35,328 | \$ | 9,884 | \$ | 605,213 | \$ | 170,034 |

C. DEBT REFUNDINGS

When advantageous and permitted by statute and bond covenants, the State Finance Committee authorizes the refunding of outstanding bonds and certificates of participation. Colleges and universities may also refund revenue bonds.

When the state refunds outstanding bonds, the net proceeds of each refunding issue are used to purchase U.S. government securities that are placed in irrevocable trusts with escrow agents to provide for all future debt service payments on the refunded bonds.

As a result, the refunded bonds are considered defeased and the liability is removed from the government-wide statement of net position.

Current Year Defeasances

Bonds

Governmental Activities.

On October 17, 2013, the Tobacco Settlement Authority (TSA) issued \$334.7 million in TSA refunding bonds with an average interest rate of 5.0 percent to refund \$369.9 million of TSA bonds with an average interest rate of 6.56 percent. The refunding resulted in an \$89.3 million gross debt service savings over the next 20 years and an economic gain of \$38.6 million.

On October 24, 2013, the state issued \$106.0 million of motor vehicle fuel tax general obligation refunding bonds with an average interest rate of 4.82 percent to refund \$117.0 million of motor vehicle fuel tax general obligation bonds with an average interest rate of 4.62 percent. The refunding resulted in a \$15.8 million gross debt service savings over the next 8 years and a net present value savings of \$14.5 million.

Also on October 24, 2013, the state issued \$117.9 million of various purpose general obligation refunding bonds with an average interest rate of 4.82 percent to refund \$130.5 million of various purpose general obligation bonds with an average interest rate of 4.74 percent. The refunding resulted in an \$18.0 million gross debt service savings over the next 7 years and a net present value savings of \$16.8 million.

On June 26, 2014, the Tumwater Office Properties (TOP), which is a blended component unit of the state, issued \$43.4 million in lease revenue refunding bonds with an average interest rate of 4.52 percent to refund \$50.2 million of lease revenue bonds with an average interest rate of 5.08 percent. The refunding resulted in a \$9.8 million gross debt service savings over the next 14 years and an economic gain of \$7.9 million.

Business-Type Activities.

On January 9, 2014, the University of Washington, through the Washington Economic Development Finance Authority, issued \$29.0 million in business-type activity lease revenue refunding bonds with an average interest rate of 4.37 percent to refund \$29.6 million of business-type activity lease revenue bonds with an average interest rate of 5.07 percent. The refunding resulted in a \$3.5 million gross debt service savings over the next 21.5 years and an economic gain of \$2.4 million.

Prior Year Defeasances

In prior years, the state defeased certain general obligation bonds, revenue bonds, and certificates of participation by placing the proceeds of new bonds and certificates in an irrevocable trust to provide for all future debt service payments on the prior bonds and certificates.

Accordingly, the trust account assets and the liability for the defeased bonds and certificates are not included in the state's financial statements.

General Obligation Bond Debt

On June 30, 2014, \$2.26 billion of general obligation bonded debt outstanding is considered defeased.

Revenue Bond Debt

On June 30, 2014, \$120.0 million of revenue bonded debt outstanding is considered defeased.

Certificates of Participation Debt

On June 30, 2014, \$52.3 million of certificates of participation debt outstanding is considered defeased.

D. LEASES

Leases at June 30, 2014, are reported by the state of Washington within governmental activities and business-type activities, as applicable.

The state leases land, office facilities, office and computer equipment, and other assets under a variety of agreements. Although lease terms vary, most leases are subject to appropriation from the Legislature to continue the obligation. If the possibility of receiving no funding from the Legislature is remote, leases are considered noncancelable for financial reporting purposes. Leases that represent acquisitions are classified as capital leases, and the related assets and liabilities are recorded in the financial records at the inception of the lease.

Other leases are classified as operating leases with the lease payments recorded as expenditures or expenses during the life of the lease. Certain operating leases are renewable for specified periods. In most cases, management expects that the leases will be renewed or replaced by other leases.

Land, buildings, and equipment under capital leases as of June 30, 2014, include the following (expressed in thousands):

| | Gov A | Business-Type Activities | | | |
|--------------------------------|----------|-----------------------------|----|----------|--|
| Buildings | \$ | 1,705 | \$ | 4,512 | |
| Equipment | | 17,727 | | 15,864 | |
| Less: Accumulated depreciation | | (9,200) | | (10,807) | |
| Totals | \$ | 10,232 | \$ | 9,569 | |

The following schedule presents future minimum payments for capital and operating leases as of June 30, 2014 (expressed in thousands):

| | | Capita | Lease | s | Operating Leases | | | | | |
|--|------|-----------|-------|-----------------------------|------------------|--------------|------------|---------------|--|--|

| 2040-2044 | | - | | - | | 11,380 | | 37,238 | | |
| Total Future Minimum Payments | | 9,061 | | 17,205 | | 618,321 | | 236,814 | | |
| Less: Executory Costs and Interest Costs | | (535) | | (1,870) | | - | | - | | |
| Net Present Value of Future Minimum Lease Payments | \$ | 8,526 | \$ | 15,335 | \$ | 618,321 | \$ | 236,814 | | |

The total operating lease rental expense for fiscal year 2014 for governmental activities was \$294.5 million, of which \$483 thousand was for contingent rentals. The total operating lease rental expense for fiscal year 2014 for business-type activities was \$37.3 million.

E. CLAIMS AND JUDGMENTS

Claims and judgments are materially related to three activities: workers' compensation, risk management, and health insurance. Workers' compensation is a business-type activity, and risk management and health insurance are governmental activities. A description of the risks to which the state is exposed by these activities, and the ways in which the state handles the risks, is presented in Note 1.E.

Workers' Compensation

At June 30, 2014, \$35.32 billion of unpaid claims and claim adjustment expenses are presented at their net present and settlement value of \$24.44 billion. These claims are discounted at assumed interest rates of 1.5 percent (non-pension and cost of living adjustments), 4.5

to 6.5 percent (pensions not yet granted), and 6.5 percent (granted pensions) to arrive at a settlement value.

The claims and claim adjustment liabilities of \$24.44 billion as of June 30, 2014, include \$11.52 billion for supplemental pension cost of living adjustments (COLAs) that by statute are not to be fully funded.

These COLA payments are funded on a pay-as-you-go basis, and the workers' compensation actuaries have indicated that future premium payments will be sufficient to pay these claims as they come due.

The remaining claims liabilities of \$12.91 billion are fully funded by long-term investments, net of obligations under securities lending agreements.

Changes in the balances of workers' compensation claims liabilities during fiscal years 2013 and 2014 were as follows (expressed in thousands):

| Workers' Compensation Fund | Balances Beginning of Fiscal Year | Incurred Claims and Changes in Estimates | Claim Payments | Balances End of Fiscal Year |
|----------------------------|---|--|-------------------|-----------------------------------|
| 2013 | \$ 22,596,350 | 3,150,517 | (2,119,307) | \$ 23,627,560 |
| 2014 | \$ 23,627,560 | 2,953,508 | (2,143,534) | \$ 24,437,534 |

Risk Management

The Risk Management Fund administers tort and sundry claims filed against Washington state agencies, except the University of Washington and the Department of Transportation Ferries Division. The Fund reports a tort liability when it becomes probable that a loss has occurred and the amount of that loss can be reasonably estimated. Liabilities include an actuarially determined amount for tort claims that have been incurred but not reported. It also includes an actuarial estimate of loss adjustment expenses for tort defense.

Because actual liabilities depend on such complex factors as inflation, changes in legal doctrines, and damage awards, it should be recognized that future loss emergence will likely deviate, perhaps materially, from the actuarial estimates. Liabilities are re-evaluated annually to take into consideration recently settled claims, the frequency of claims, and other economic or social factors.

The state is a defendant in a significant number of lawsuits pertaining to general and automobile liability matters.

As of June 30, 2014, outstanding and actuarially determined claims against the state and its agencies, with the exception of the University of Washington, including actuarially projected defense costs were \$550.0 million for which the state has recorded a liability. The state is restricted by law from accumulating funds in the Self Insurance Liability Program in excess of 50 percent of total outstanding and actuarially determined liabilities.

At June 30, 2014, the Risk Management Fund held \$67.3 million in cash and pooled investments designated for payment of these claims under the state's Self Insurance Liability Program.

Changes in the balances of risk management claims liabilities during fiscal years 2013 and 2014 were as follows (expressed in thousands):

| Risk Management Fund | Balances Beginning of Fiscal Year | Incurred Claims and Changes in Estimates | Claim Payments | Tort Defense Payments | Balances End of Fiscal Year |
|----------------------|---|--|-------------------|-----------------------------|-----------------------------------|
| 2013 | \$ 813,373 | (187,481) | (65,548) | (17,635) | \$ 542,709 |
| 2014 | \$ 542,709 | 74,760 | (48,488) | (18,993) | \$ 549,988 |

Health Insurance

The Health Insurance Fund establishes a liability when it becomes probable that a loss has occurred and the amount of that loss can be reasonably estimated. Liabilities include an actuarially determined amount for claims that have been incurred but not reported. Because actual claims liabilities depend on various complex factors, the process used in computing claims liabilities does not always result in an exact amount.

Claims liabilities are re-evaluated periodically to take into consideration recently settled claims, the frequency of claims, and other economic and social factors.

At June 30, 2014, health insurance claims liabilities totaling \$70.2 million are fully funded with cash and investments, net of obligations under securities lending agreements.

Changes in the balances of health insurance claims liabilities during fiscal years 2013 and 2014 were as follows (expressed in thousands):

| Health Insurance Fund | Balances Beginning of Fiscal Year | Incurred Claims and Changes in Estimates | Claim Payments | Balances End of Fiscal Year |
|-----------------------|---|--|-------------------|-----------------------------------|
| 2013 | \$ 68,907 | 816,965 | (825,999) | \$ 59,873 |
| 2014 | \$ 59,873 | 856,230 | (845,854) | \$ 70,249 |

F. POLLUTION REMEDIATION

The state reports pollution remediation obligations in accordance with GASB Statement No. 49. The liability reported involves estimates of financial responsibility and amounts recoverable as well as remediation costs.

The liability could change over time as new information becomes available and as a result of changes in remediation costs, technology, and regulations governing remediation efforts. Additionally, the responsibilities and liabilities discussed in this disclosure are intended to refer to obligations solely in the accounting context. This disclosure does not constitute an admission of any legal responsibility or liability. Further, it does not establish or affect the rights or obligations of any person under the law, nor does this disclosure impose upon the state any new mandatory duties or obligations.

The state and its agencies are participating as potentially responsible parties in numerous pollution remediation projects under the provisions of the federal Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA, generally referred to as Superfund) and the state Model Toxics Control Act.

There are 28 projects in progress for which the state has recorded a liability of \$49.6 million.

The state has also voluntarily agreed to conduct certain remediation activities to the extent of funding paid to the state by third parties for such purposes. At June 30, 2014, the state has recorded a liability of \$115.2 million for remaining project commitments.

Overall, the state has recorded a pollution remediation liability of \$164.8 million, measured at its estimated amount, using the expected cash flow technique. The overall estimate is based on professional judgment, experience, and historical cost data. For some projects, the state can reasonably estimate the range of expected outlays early in the process because the site situation is common or similar to other sites with which the state has experience. In other cases, the estimates are limited to an amount specified in a settlement agreement, consent decree, or contract for remediation services.

The pollution remediation activity at some sites for which the state would otherwise have a reportable obligation is at a point where certain costs are not reasonably estimable. For example, a site assessment, remedial investigation, or feasibility study is in progress and the cleanup methodology has not yet been determined; consequently, associated future costs cannot be estimated.

The state's reported liability does not include remediation costs for future activities where costs are not yet reasonably estimable.

G. LONG-TERM LIABILITY ACTIVITY

Long-term liability activity at June 30, 2014, is reported by the state of Washington within governmental activities and business-type activities, as applicable. Long-term liability activity for governmental activities for fiscal year 2014 is as follows (expressed in thousands):

| | Beginning Balance | | | Ending Balance | Amounts Due Within | |
|--|----------------------|--------------|--------------|-------------------|-----------------------|--|
| Governmental Activities: | July 1, 2013 * | Additions | Reductions | June 30, 2014 | One Year | |
| Long-Term Debt: | | | | | | |
| GO Bonds Payable: | | | | | | |
| General obligation (GO) bonds | \$ 17,603,895 | \$ 1,789,745 | \$ 996,265 | \$ 18,397,375 | \$ 813,595 | |

| Installment contracts | 2,317 | - | 132 | 2,185 | - | |
| Leases | 10,154 | 4,490 | 6,118 | 8,526 | 2,730 | |
| Compensated absences | 569,344 | 350,013 | 369,940 | 549,417 | 64,766 | |
| Unfunded pension obligations | 340,441 | 58,456 | - | 398,897 | - | |
| Other postemployment benefits obligations | 1,468,125 | 252,420 | - | 1,720,545 | - | |
| Pollution remediation obligations | 171,816 | 21,901 | 28,878 | 164,839 | - | |
| Unclaimed property refunds | 106,667 | - | 5,888 | 100,779 | 1 | |
| Other | 387,827 | 83,113 | 18,720 | 452,220 | | |
| Total Other Liabilities | 4,407,814 | 886,430 | 564,017 | 4,730,227 | 407,176 | |
| Total Long-Term Debt | \$ 24,684,792 | \$ 3,392,666 | \$ 2,082,898 | \$ 25,994,560 | \$ 1,303,646 | |

^{*} Beginning balances reflect the Department of Transportation prior period adjustment of \$244.4 million to other governmental long-term obligations to record a land bank agreement with Sound Transit, along with the University of Washington prior period adjustment of \$67.3 million to properly report their Internal Lending Program.

For governmental activities, certificates of participation are being repaid approximately 19 percent from the General Fund, 34 percent from the Higher Education Special Revenue Fund, and the balance from various governmental funds. The compensated absences liability will be liquidated approximately 43 percent by the General Fund, 35 percent by the Higher Education Special Revenue Fund, and the balance by various other governmental funds. The claims and judgments liability will be liquidated approximately 72 percent by the Risk Management Fund (an internal service fund), 9 percent by the Higher Education Special Revenue Fund, and the balance by various other governmental funds. The other

postemployment benefits obligations liability will be liquidated approximately 46 percent by the General Fund, 32 percent by the Higher Education Special Revenue Fund, and the balance by various other governmental funds. The pollution remediation liability will be liquidated approximately 78 percent by the Wildlife and Natural Resources Fund, a nonmajor governmental fund, and the balance by various other governmental funds. The unclaimed property refunds will be liquidated against future unclaimed property deposited to the General Fund. Leases, installment contract obligations, and other liabilities will be repaid from various other governmental funds.

Long-term liability activity for business-type activities for fiscal year 2014 is as follows (expressed in thousands):

| | | ginning alance | | | | | | Ending Balance | - | mounts ue Within |
|---|----------------|-------------------|-----------|-----------|-----|----------|---------------|-------------------|----------|---------------------|
| Business-Type Activities | July 1, 2013 * | | Additions | | Red | ductions | June 30, 2014 | | One Year | |

^{*} Beginning balances reflect the University of Washington prior period adjustment of \$67.3 million to properly report their Internal Lending Program.

Note 8

No Commitment Debt

The Washington State Housing Finance Commission, Washington Higher Education Facilities Authority, Washington Health Care Facilities Authority, and Washington Economic Development Finance Authority (financing authorities) were created by the Legislature. For financial reporting purposes, they are discretely presented as component units. These financing authorities issue bonds for the purpose of making loans

to qualified borrowers for capital acquisitions, construction, and related improvements.

These bonds do not constitute either a legal or moral obligation of the state or these financing authorities, nor does the state or these financing authorities pledge their full faith and credit for the payment of such bonds.

Debt service on the bonds is payable solely from payments made by the borrowers pursuant to loan agreements. Due to their no commitment nature, the bonds issued by these financing authorities are excluded from the state's financial statements.

The schedule below presents the June 30, 2014, balances for the "No Commitment" debt of the state's financing authorities (expressed in thousands):

| Financing Authorities | Prin | cipal Balance |
|---|------|---------------|
| Washington State Housing Finance Commission | \$ | 3,411,461 |
| Washington Higher Education Facilities Authority | | 766,485 |
| Washington Health Care Facilities Authority | | 5,452,000 |
| Washington Economic Development Finance Authority | | 702,442 |
| Total No Commitment Debt | \$ | 10,332,388 |

Note 9

Governmental Fund Balances

A. GOVERNMENTAL FUND BALANCES

The state's governmental fund balances are reported according to the relative constraints that control how amounts can be spent. Net position restricted as a result of enabling legislation totaled \$9.3 million. Classifications include nonspendable, restricted, committed, and assigned, which are further described in Note 1.D.9.

A summary of governmental fund balances at June 30, 2014, is as follows (expressed in thousands):

| Fund Balances | | General | _ | ner Education | | Higher Education ndowment | | Nonmajor vernmental Funds | | Total |
|-------------------------------------|----------|---------|----|---------------|----|---------------------------------|----------|---------------------------------|----|-----------|

B. BUDGET STABILIZATION ACCOUNT

In accordance with Article 7, Section 12 of the Washington State Constitution, the state maintains the Budget Stabilization Account ("Rainy Day Fund"). The Budget Stabilization Account is reported in the General Fund.

By June 30 of each fiscal year, an amount equal to 1 percent of the general state revenues for that fiscal year is transferred to the Budget Stabilization Account.

The Budget Stabilization Account balance can only be used as follows: (a) If the Governor declares a state of emergency resulting from a catastrophic event that necessitates government action to protect life or public safety, then for that fiscal year money may be withdrawn and appropriated from the Budget Stabilization Account, via separate legislation setting forth the nature of the emergency and containing an appropriation limited to the above-authorized purposes as contained in the declaration, by a favorable vote of a majority of the members elected to each House of the Legislature; (b) If

the employment growth forecast for any fiscal year is estimated to be less than 1 percent, then for that fiscal year money may be withdrawn and appropriated from the Budget Stabilization Account by the favorable vote of a majority of the members elected to each house of the Legislature; (c) Any amount may be withdrawn and appropriated from the Budget Stabilization Account at any time by the favorable vote of at least three-fifths of the members of each house of the Legislature.

When the balance in the Budget Stabilization Account, including investment earnings, equals more than 10 percent of the estimated general state revenues in that fiscal year, the Legislature by the favorable vote of a majority of the members elected to each house of the Legislature may withdraw and appropriate the balance to the extent that the balance exceeds 10 percent of the estimated general state revenues. These appropriations may be made solely for deposit to the Education Construction Fund.

At June 30, 2014, the Budget Stabilization Account had restricted fund balance of \$414.6 million.

Note 10

Deficit Net Position

Risk Management Fund

The Risk Management Fund, an internal service fund, had a deficit net position of \$486.2 million at June 30, 2014. The Risk Management Fund is used to administer the Self-Insurance Liability Program (SILP). The SILP was initiated in 1990 and is intended to provide funds for the payment of all tort claims and defense expenses. The program investigates, processes, and adjudicates tort and sundry claims filed against Washington state agencies, with the exception of the University of Washington and the Department of Transportation Ferries Division.

The Risk Management Fund is supported by premium assessments to state agencies. The state is restricted by law from accumulating funds in the SILP in excess of 50 percent of total outstanding and actuarially determined claims. As a consequence, when outstanding and incurred but not reported claims are actuarially determined and accrued, the result is a deficit net position.

The net position in the Risk Management Fund improved in the fiscal year ended June 30, 2014. The actuarial projection of the expected claims liability is based on actual experience for the past five years. The projected liability decreased due to the decrease in the number of claims filed and the relative stability in the severity of the claims.

The following schedule details the change in net position for the Risk Management Fund during the fiscal year ended June 30, 2014 (expressed in thousands):

| Risk Management Fund | Net Position |
|---------------------------|--------------|
| Balance, July 1, 2013 | \$ (486,251) |
| Fiscal year 2014 activity | 86_ |
| Balance, June 30, 2014 | \$ (486,165) |

Note 11

Retirement Plans

A. GENERAL

The state Legislature establishes and amends laws pertaining to the creation and administration of all state public retirement systems.

Basis of Accounting

Pension plans administered by the state are accounted for using the accrual basis of accounting. Under the accrual basis of accounting, employee and employer contributions are recognized in the period in which employee services are performed; investment gains and losses are recognized as incurred; and benefits and refunds are recognized when due and payable in accordance with the terms of the applicable plan.

Investments

The Washington State Investment Board (WSIB) has been authorized by statute as having investment management responsibility for the pension funds. The WSIB manages retirement fund assets to maximize return at a prudent level of risk.

Retirement funds are invested in the Commingled Trust Fund (CTF). Established on July 1, 1992, the CTF is a diversified pool of investments that invests in fixed income, public equity, private equity, real estate, and tangible assets. Investment decisions are made within the framework of a Strategic Asset Allocation Policy and a series of written WSIB-adopted investment policies for the various asset classes in which the WSIB invests.

Further information about the investment of pension funds by the WSIB, their valuation, classifications, concentrations, and maturities can be found in Note 3B.

Department of Retirement Systems. As established in chapter 41.50 of the Revised Code of Washington (RCW), the Department of Retirement Systems (DRS) administers eight retirement systems covering eligible employees of the state and local governments. The Governor appoints the director of the DRS.

The DRS administered systems are comprised of 12 defined benefit pension plans and three defined benefit/defined contribution plans as follows:

• Public Employees' Retirement System (PERS)

Plan 1 - defined benefit

Plan 2 - defined benefit

Plan 3 - defined benefit/defined contribution

• Teachers' Retirement System (TRS)

Plan 1 - defined benefit

Plan 2 - defined benefit

Plan 3 – defined benefit/defined contribution

• School Employees' Retirement System (SERS)

Plan 2 - defined benefit

Plan 3 - defined benefit/defined contribution

 Law Enforcement Officers' and Fire Fighters' Retirement System (LEOFF)

Plan 1 - defined benefit

Plan 2 - defined benefit

• Washington State Patrol Retirement System (WSPRS)

Plan 1 - defined benefit

Plan 2 - defined benefit

Public Safety Employees' Retirement System (PSERS)
 Plan 2 - defined benefit

Judicial Retirement System (JRS)
 Defined benefit plan

• Judges' Retirement Fund (Judges)
Defined benefit plan

Although some assets of the plans are commingled for investment purposes, each plan's assets may be used only for the payment of benefits to the members of that plan in accordance with the terms of the plan.

Administration of the PERS, TRS, SERS, LEOFF, WSPRS, and PSERS systems and plans was funded by an employer rate of 0.18 percent of employee salaries. Administration of the JRS and Judges plans is funded by means of legislative appropriations.

In January 2012, the DRS began collecting contributions from state institutions of higher education for deposit in the Higher Education Retirement Plan (HERP) Supplemental Benefit Fund. The contributions are to begin prefunding the unfunded future obligations related to the supplemental benefits of the HERP. The HERP Supplemental Benefit Fund was not created as a pension trust fund and is reported by the state as an administrative account in the General Fund.

Pursuant to RCW 41.50.770, the state offers its employees and employees of those political subdivisions that elect to participate, a deferred compensation program in accordance with Internal Revenue Code Section 457. The deferred compensation is not available to employees until termination, retirement, disability, death, or unforeseeable financial emergency. This deferred compensation plan is administered by the DRS.

The DRS prepares a stand-alone financial report that is compliant with the requirements of Statement 67 of the Governmental Accounting Standards Board. Copies of the report may be obtained by contacting the Washington State Department of Retirement Systems, PO Box 48380, Olympia, Washington 98504-8380 or online at http://www.drs.wa.gov/administration/annual-report/.

State Board for Volunteer Fire Fighters and Reserve Officers. As established in chapter 41.24 RCW, the State Board for Volunteer Fire Fighters and Reserve Officers administers the Volunteer Fire Fighters' and Reserve Officers' Relief and Pension Fund (VFFRPF), a defined benefit plan. Administration of VFFRPF is funded through legislative appropriation.

Administrative Office of the Courts. As established in chapter 2.14 RCW, the Administrative Office of the Courts administers the Judicial Retirement Account (JRA), a defined contribution plan. Administration of JRA is funded through member fees.

Higher Education. As established in chapter 28B.10 RCW, eligible higher education state employees may participate in higher education retirement plans. These plans are privately administered defined contribution plans with a supplemental defined benefit component.

Plan Disclosures

Participating members and employers, plan descriptions, benefits provided, contribution requirements, and legislative changes related to DRS administered plans follows in Note 11.B. Disclosures required by GASB Statement No. 67 for the plan administered by the State Board for Volunteer Fire Fighters and Reserve Officers follow in Note 11C. Contribution required and paid, funded status, and actuarial assumptions and methods for pension plans included in Notes 11.B and 11.C follow in Notes 11.D through 11.F. Annual pension cost and three year historical trend information for the state's single employer defined benefit plans are presented in Notes 11.G and 11.H, respectively. Information related to changes in actuarial assumptions and methods for Department of Retirement Systems and State Board for Volunteer Fire Fighters and Reserve Officer administered defined benefit plans is provided in Note 11.I. Disclosures related to the HERP Supplemental Defined Benefit Plan are presented in Note 11.J. Information related to defined contribution plans is presented in Note 11.K. Details on plan net position and changes in plan net position of pension plans and other employee benefit funds administered by the state are presented in Note 11.L.

B. PLANS ADMINISTERED BY THE DEPARTMENT OF RETIREMENT SYSTEMS

Membership of each plan administered by the Department of Retirement Systems (DRS) consisted of the following at June 30, 2013, the date of the latest actuarial valuation for all plans:

| Number of Participating Members | | | | | | |
|---------------------------------|---------------------------|--------------------------------|----------------|-------------|---------------|--|
| | Retirees and | Terminated Members | | Active Plan | | |
| | Beneficiaries | Entitled To But Not Yet | Active Plan | Members | | |
| Plans | Receiving Benefits | Receiving Benefits | Members Vested | Nonvested | Total Members | |
| PERS 1 | 51,860 | 1,384 | 5,389 | 264 | 58,897 | |
| PERS 2 | 31,329 | 25,383 | 89,387 | 26,364 | 172,463 | |
| PERS 3 | 2,139 | 4,280 | 12,297 | 17,005 | 35,721 | |
| TRS 1 | 35,912 | 391 | 2,379 | 14 | 38,696 | |
| TRS 2 | 3,445 | 2,330 | 6,062 | 6,009 | 17,846 | |
| TRS 3 | 4,863 | 7,102 | 35,357 | 16,114 | 63,436 | |
| SERS 2 | 5,084 | 5,190 | 13,494 | 8,266 | 32,034 | |
| SERS 3 | 3,995 | 6,398 | 20,282 | 10,253 | 40,928 | |
| LEOFF 1 | 7,729 | 1 | 143 | - | 7,873 | |
| LEOFF 2 | 2,782 | 698 | 14,389 | 2,298 | 20,167 | |
| WSPRS 1 | 964 | 119 | 657 | - | 1,740 | |
| WSPRS 2 | - | 10 | 257 | 152 | 419 | |
| PSERS 2 | 43 | 119 | 2,784 | 1,729 | 4,675 | |
| JRS | 114 | - | - | - | 114 | |
| Judges | 12 | - | - | - | 12 | |
| JRA | 1 | 151 | 5 | - | 157 | |
| Total | 150,272 | 53,556 | 202,882 | 88,468 | 495,178 | |

Following is a summary of the number of government employers participating in DRS administered retirement plans as of June 30, 2014:

| Number of Participating Employers | | | | | |
|-----------------------------------|----------------|------------------|-----------------------------|---------------------------------|-----------------|
| Plans | State Agencies | School Districts | Counties/ Municipalities | Other Political Subdivisions | Total Employers |
| PERS 1 | 128 | 212 | 147 | 147 | 634 |
| PERS 2 | 169 | - | 275 | 490 | 934 |
| PERS 3 | 158 | - | 209 | 306 | 673 |
| TRS 1 | 36 | 228 | - | - | 264 |
| TRS 2 | 22 | 295 | - | - | 317 |
| TRS 3 | 39 | 302 | - | - | 341 |
| SERS 2 | - | 303 | - | - | 303 |
| SERS 3 | - | 300 | - | - | 300 |
| LEOFF 1 | - | - | 36 | 9 | 45 |
| LEOFF 2 | 8 | - | 204 | 157 | 369 |
| WSPRS 1 | 1 | - | - | - | 1 |
| WSPRS 2 | 1 | - | - | - | 1 |
| PSERS 2 | 9 | - | 65 | 1 | 75 |
| JRS | 1 | - | - | - | 1 |
| Judges | 1 | - | - | - | 1 |
| JRA | 5 | - | - | - | 5 |
| Total | 578 | 1,640 | 936 | 1,110 | 4,264 |

Employers can participate in multiple systems and/or plans. The actual total number of participating employers as of June 30, 2014, is 1,318, of which 171 are state agencies.

Public Employees' Retirement System

Plan Description. The Legislature established the Public Employees' Retirement System (PERS) in 1947. PERS retirement benefit provisions are established in chapters 41.34 and 41.40 RCW and may be amended only by the Legislature. Membership in the system includes: elected officials; state employees; employees of the Supreme, Appeals, and Superior Courts (other than judges currently in a judicial retirement system); employees of legislative committees; community and technical colleges, college and university employees not in national higher education retirement programs; judges of district and municipal courts; and employees of local governments. Approximately 49 percent of PERS salaries are accounted for by state employment.

PERS is a cost-sharing, multiple-employer retirement system comprised of three separate plans for membership purposes: Plans 1 and 2 are defined benefit plans and Plan 3 is a combination defined benefit/defined contribution plan. Although members can only be a member of either Plan 2 or Plan 3, the defined benefit portions of Plan 2 and Plan 3 are accounted for in the same pension trust fund. All assets of this Plan 2/3 defined benefit plan may legally be used to pay the defined benefits of any of the Plan 2 or Plan 3 members or beneficiaries, as defined by the terms of the plan. Therefore, Plan 2/3 is considered a single defined benefit plan for reporting purposes. Plan 3 accounts for

the defined contribution portion of benefits for Plan 3 members.

PERS members who joined the system by September 30, 1977, are Plan 1 members. Plan 1 is closed to new entrants. Those who joined on or after October 1, 1977, and by either, February 28, 2002, for state and higher education employees, or August 31, 2002, for local government employees, are Plan 2 members unless they exercised an option to transfer their membership to PERS Plan 3.

PERS participants joining the system on or after March 1, 2002, for state and higher education employees, or September 1, 2002, for local government employees, have the irrevocable option of choosing membership in either PERS Plan 2 or PERS Plan 3. The option must be exercised within 90 days of employment. Employees who fail to choose within 90 days default to PERS Plan 3.

Refer to section K of this note for a description of the defined contribution component of PERS Plan 3.

Benefits Provided. PERS plans provide retirement, disability, and death benefits to eligible members.

PERS Plan 1 members are vested after the completion of five years of eligible service. Plan 1 members are eligible for retirement after 30 years of service, or at the age of 60

with five years of service, or at the age of 55 with 25 years of service. The monthly benefit is 2 percent of the average final compensation (AFC) per year of service capped at 60 percent.

PERS Plan 1 members retiring from inactive status prior to the age of 65 may receive actuarially reduced benefits. Plan 1 members may elect to receive an optional cost of living allowance (COLA) that provides an automatic annual adjustment based on the Consumer Price Index. The adjustment is capped at 3 percent annually. To offset the cost of this annual adjustment, the benefit is reduced.

PERS Plan 1 provides duty and non-duty disability benefits. Duty disability retirement benefits for disablement prior to the age of 60 consist of a temporary life annuity. The benefit amount is \$350 a month or two-thirds of the monthly AFC, whichever is less. The benefit is payable as long as the member remains disabled or until the member attains the age of 60 at which time the benefit is converted to the member's service retirement amount.

A member with five years of covered employment is eligible for non-duty disability retirement. Prior to the age of 55, the benefit amount is 2 percent of the AFC for each year of service. This is reduced by 2 percent for each year that the member's age is less than 55. The total benefit is limited to 60 percent of the AFC. Plan 1 members may elect to receive an optional COLA amount based on the Consumer Price Index, capped at 3 percent annually. To offset the cost of this annual adjustment, the benefit is reduced.

PERS Plan 2 members are vested after completing five years of eligible service. Plan 2 members are eligible for normal retirement at the age of 65 with five years of service. The monthly benefit is 2 percent of the AFC per year of service. There is no cap on years of service credit and a COLA is granted based on the Consumer Price Index, capped at 3 percent annually.

PERS Plan 2 members have the option to retire early with reduced benefits.

The defined benefit portion of PERS Plan 3 provides members a monthly benefit that is 1 percent of the AFC per year of service. There is no cap on years of service credit. Plan 3 provides the same COLA as Plan 2.

Effective June 7, 2006, PERS Plan 3 members are vested in the defined benefit portion of their plan after 10 years of service; or after five years of service, if 12 months of that service are earned after age 44; or after five service credit years earned in PERS Plan 2 by June 1, 2003. Plan 3 members are immediately vested in the defined contribution portion of their plan.

PERS Plan 3 members have the option to retire early with reduced benefits.

PERS Plan 2 and Plan 3 provide disability benefits. There is no minimum amount of service credit required for eligibility. The Plan 2 monthly benefit amount is 2 percent of the AFC per year of service. For Plan 3, the monthly benefit amount is 1 percent of the AFC per year of service. There is no cap on years of service credit, and a COLA is granted based on the Consumer Price Index, capped at 3 percent annually.

PERS members meeting specific eligibility requirements have options available to enhance their retirement benefits. Some of these options are available to their survivors, with reduced benefits.

A one-time, duty-related death benefit is provided to the estate (or duly designated nominee) of a PERS member who dies as a result of injuries sustained in the course of employment, or if the death resulted from an occupational disease or infection that arose out of the member's covered employment, if found eligible by the director of the Department of Labor and Industries.

From January 1, 2007, through December 31, 2007, judicial members of PERS were given the choice to elect participation in the Judicial Benefit Multiplier (JBM) Program enacted in 2006. Justices and judges in PERS Plan 1 and Plan 2 were able to make an irrevocable election to pay increased contributions that would fund a retirement benefit with a 3.5 percent multiplier, capped at 75 percent of AFC. Judges in PERS Plan 3 could elect a 1.6 percent of pay per year of service benefit, capped at 37.5 percent of AFC.

Newly elected or appointed justices and judges who chose to become PERS members on or after January 1, 2007, or who had not previously opted into PERS membership, were required to participate in the JBM Program.

Material changes, if any, in PERS benefit provisions for the fiscal year ended June 30, 2014, are listed at the end of this section.

Contributions. PERS defined benefit retirement benefits are financed from a combination of investment earnings and employer and employee contributions.

Each biennium, the state Pension Funding Council adopts Plan 1 employer contribution rates, Plan 2 employer and employee contribution rates, and Plan 3 employer contribution rates. Contribution requirements are established and amended by state statute.

Employee contributions to the PERS Plan 1 and Plan 2 defined benefit plans accrue interest at a rate specified by

the director of DRS. During fiscal year 2014, the rate was 5.5 percent compounded quarterly. Members in PERS Plan 1 and Plan 2 can elect to withdraw total employee defined benefit contributions and interest thereon, in lieu of any retirement benefit, upon separation from PERS-covered employment.

As a result of the implementation of the Judicial Benefit Multiplier (JBM) Program in January 2007, a second tier of employer and employee rates was developed to fund, along with investment earnings, the increased retirement benefits of those justices and judges who participate in the program.

Required contribution rates for fiscal year 2014 are presented at the end of this section.

Teachers' Retirement System

Plan Description. The Legislature established the Teachers' Retirement System (TRS) in 1938. TRS retirement benefit provisions are established in chapters 41.32 and 41.34 RCW and may be amended only by the Legislature. Eligibility for membership requires service as a certificated public school employee working in an instructional, administrative, or supervisory capacity. TRS is comprised principally of non-state agency employees.

TRS is a cost-sharing, multiple-employer retirement system comprised of three separate plans for membership purposes: Plans 1 and 2 are defined benefit plans and Plan 3 is a defined benefit plan with a defined contribution component. Although members can only be a member of either Plan 2 or Plan 3, the defined benefit portions of Plan 2 and Plan 3 are accounted for in the same pension trust fund. All assets of this Plan 2/3 defined benefit plan may legally be used to pay the defined benefits of any of the Plan 2 or Plan 3 members or beneficiaries, as defined by the terms of the plan. Therefore, Plan 2/3 is considered a single defined benefit plan for reporting purposes. Plan 3 accounts for the defined contribution portion of benefits for Plan 3 members.

TRS members who joined the system by September 30, 1977, are a Plan 1 member. Plan 1 is closed to new entrants. Those who joined on or after October 1, 1977, and by June 30, 1996, are Plan 2 members unless they exercised an option to transfer their membership to Plan 3. TRS members joining the system on or after July 1, 1996 are members of TRS Plan 3.

Legislation passed in 2007 gives TRS members hired on or after July 1, 2007, 90 days to make an irrevocable choice to become a member of TRS Plan 2 or Plan 3. At the end of 90 days, any member who has not made a choice becomes a member of Plan 3.

Refer to section K of this note for a description of the defined contribution component of TRS Plan 3.

Benefits Provided. TRS plans provide retirement, disability, and death benefits to eligible members.

TRS Plan 1 members are vested after the completion of five years of eligible service. Plan 1 members are eligible for retirement at any age after 30 years of service, or at the age of 60 with five years of service, or at the age of 55 with 25 years of service. The monthly benefit is 2 percent of the average final compensation (AFC) for each year of service credit, up to a maximum of 60 percent.

TRS Plan 1 members may elect to receive an optional cost of living allowance (COLA) amount based on the Consumer Price Index, capped at 3 percent annually. To offset the cost of this annual adjustment, the benefit is reduced.

TRS Plan 1 members on temporary disability receive a monthly payment of \$180 payable for up to two years, for the same occurrence. After five years of service, members on a disability retirement receive a benefit based on their salary and service to date of disability.

TRS Plan 2 retirement benefits are vested after completing five years of eligible service. Plan 2 members are eligible for normal retirement at the age of 65 with five years of service. The monthly benefit is 2 percent of the AFC per year of service. A COLA is granted based on the Consumer Price Index, capped at 3 percent annually. TRS Plan 2 members have the option to retire early with reduced benefits.

The defined benefit portion of TRS Plan 3 provides members a monthly benefit that is 1 percent of the AFC per year of service. Plan 3 provides the same COLA as Plan 2.

TRS Plan 3 members are vested in the defined benefit portion of their plan after 10 years of service; or after five years of service, if 12 months of that service are earned after age 44; or after five service credit years earned in TRS Plan 2 by July 1, 1996. Plan 3 members are immediately vested in the defined contribution portion of their plan. TRS Plan 3 members have the option to retire early with reduced benefits.

TRS Plan 2 and Plan 3 provide disability benefits. There is no minimum amount of service credit required for eligibility. The Plan 2 monthly benefit amount is 2 percent of the AFC per year of service. For Plan 3, the monthly benefit amount is 1 percent of the AFC per year of service. A COLA is granted based on the Consumer Price Index, capped at 3 percent annually.

TRS members meeting specific eligibility requirements, have options available to enhance their retirement benefits. Some of these options are available to their survivors, with reduced benefits.

A one-time, duty-related death benefit is provided to the estate (or duly designated nominee) of a TRS member who dies in the line of service, if found eligible by the director of the Department of Labor and Industries.

From January 1, 2007, through December 31, 2007, judicial members of TRS were given the choice to elect participation in the Judicial Benefit Multiplier (JBM) Program enacted in 2006. Justices and judges in TRS Plan 1 were able to make an irrevocable election to pay increased contributions that would fund a retirement benefit with a 3.5 percent multiplier. The benefit is capped at 75 percent of AFC.

Newly elected or appointed justices and judges who chose to become TRS members on or after January 1, 2007, were required to participate in the JBM Program.

Material changes, if any, in TRS benefit provisions for the fiscal year ended June 30, 2014, are listed at the end of this section.

Contributions. TRS defined benefit retirement benefits are financed from a combination of investment earnings and employer and employee contributions.

Each biennium, the state Pension Funding Council adopts Plan 1 employer contribution rates, Plan 2 employer and employee contribution rates, and Plan 3 employer contribution rates. The methods used to determine the contribution requirements are established under state statute.

Employee contributions to the TRS Plan 1 and Plan 2 defined benefit plans accrue interest at a rate specified by the director of DRS. During fiscal year 2014, the rate was 5.5 percent compounded quarterly. Members in TRS Plan 1 and Plan 2 can elect to withdraw total employee contributions and interest thereon upon separation from TRS-covered employment.

As a result of the implementation of the Judicial Benefit Multiplier (JBM) Program in January 2007, a second tier of employee rates was developed to fund the increased retirement benefits of those judges who participate in the program.

Required contribution rates for fiscal year 2014 are presented at the end of this section

School Employees' Retirement System

Plan Description. The Legislature established the School Employees' Retirement System (SERS) effective

in 2000. SERS retirement benefit provisions are established in chapters 41.34 and 41.35 RCW and may be amended only by the Legislature. Membership in the system includes classified employees of school districts and educational service districts. SERS is comprised principally of non-state agency employees.

SERS is a cost-sharing multiple-employer retirement system comprised of two separate plans for membership purposes: Plan 2 is a defined benefit plan and Plan 3 is a defined benefit plan with a defined contribution component. Although members can only be a member of either Plan 2 or Plan 3, the defined benefit portions of Plan 2 and Plan 3 are accounted for in the same pension trust fund. All assets of this Plan 2/3 defined benefit plan may legally be used to pay the defined benefits of any of the Plan 2 or Plan 3 members or beneficiaries, as defined by the terms of the plan. Therefore, Plan 2/3 is considered a single defined benefit plan for reporting purposes. Plan 3 accounts for the defined contribution portion of benefits for Plan 3 members.

As of September 1, 2000, the membership of classified school employees in PERS Plan 2 was transferred to SERS Plan 2. Those who joined on or after October 1, 1977, and by August 31, 2000, are SERS Plan 2 members unless they exercised an option to transfer their membership to Plan 3.

Until June 30, 2007, SERS members joining the system on or after September 1, 2000, became members of SERS Plan 3. Legislation passed in 2007 gives SERS members hired on or after July 1, 2007, 90 days to make an irrevocable choice to become a member of either SERS Plan 2 or Plan 3. At the end of the 90 days, any member who has not made a choice becomes a member of Plan 3.

Refer to section K of this note for a description of the defined contribution component of SERS Plan 3.

Benefits Provided. SERS plans provide retirement, disability, and death benefits to eligible members.

SERS Plan 2 members are vested after completing five years of eligible service. Plan 2 members are eligible for normal retirement at the age of 65 with five years of service. The monthly benefit is 2 percent of the average final compensation (AFC) per year of service. A cost of living allowance (COLA) is granted based on the Consumer Price Index, capped at 3 percent annually.

SERS Plan 2 members have the option to retire early with reduced benefits.

Effective June 7, 2006, SERS Plan 3 members are vested in the defined benefit portion of their plan after 10 years of service; or after five years of service, if 12 months of that service are earned after age 44; or after five service credit years earned in PERS Plan 2 by September 1, 2000. Plan 3 members are immediately vested in the defined contribution portion of their plan.

The defined benefit portion of SERS Plan 3 provides members a monthly benefit that is 1 percent of the AFC per year of service. Plan 3 provides the same COLA as Plan 2.

SERS Plan 3 members have the option to retire early with reduced benefits.

SERS Plan 2 and Plan 3 provide disability benefits. There is no minimum amount of service credit required for eligibility. The Plan 2 monthly benefit amount is 2 percent of the AFC per year of service. For Plan 3, the monthly benefit amount is 1 percent of the AFC per year of service. A COLA is granted based on the Consumer Price Index, capped at 3 percent annually.

SERS members meeting specific eligibility requirements have options available to enhance their retirement benefits. Some of these options are available to their survivors, with reduced benefits.

A one-time, duty-related death benefit is provided to the estate (or duly designated nominee) of a SERS member who dies in the line of service, if found eligible by the director of the Department of Labor and Industries.

Material changes, if any, in SERS benefit provisions for the fiscal year ended June 30, 2014, are listed at the end of this section.

Contributions. SERS defined benefit retirement benefits are financed from a combination of investment earnings and employer and employee contributions.

Each biennium, the state Pension Funding Council adopts Plan 2 employer and employee contribution rates and Plan 3 employer contribution rates. The methods used to determine the contribution requirements are established under state statute.

Employee contributions to the SERS Plan 2 defined benefit plan accrue interest at a rate specified by the director of DRS. During fiscal year 2014, the rate was 5.5 percent compounded quarterly. Members in SERS Plan 2 can elect to withdraw total employee contributions and interest thereon upon separation from SERS-covered employment.

Required contribution rates for fiscal year 2014 are presented at the end of this section.

Law Enforcement Officers' and Fire Fighters' Retirement System

Plan Description. The Law Enforcement Officers' and Fire Fighters' Retirement System (LEOFF) was established in 1970 by the Legislature. LEOFF retirement benefit provisions are established in chapter 41.26 RCW and may be amended only by the Legislature. Membership includes all full-time, fully compensated, local law enforcement commissioned officers, firefighters, and as of July 24, 2005, emergency medical technicians. LEOFF membership is comprised primarily of non-state employees, with Department of Fish and Wildlife enforcement officers who were first included effective July 27, 2003, being an exception.

LEOFF is a cost-sharing, multiple-employer retirement system comprised of two separate defined benefit plans. LEOFF members who joined the system by September 30, 1977, are Plan 1 members. Plan 1 is closed to new entrants. Those who joined on or after October 1, 1977, are Plan 2 members.

Effective July 1, 2003, the LEOFF Plan 2 Retirement Board was established by Initiative 790 to provide governance of LEOFF Plan 2. The board's duties include adopting contribution rates and recommending policy changes to the Legislature.

Benefits Provided. LEOFF plans provide retirement, disability, and death benefits to eligible members.

LEOFF Plan 1 members are vested after the completion of five years of eligible service. Plan 1 members are eligible for retirement with five years of service at the age of 50. The benefit per year of service calculated as a percent of final average salary (FAS) is as follows:

| Percent of FAS |
|----------------|
| 2.0% |
| 1.5% |
| 1.0% |
| |

A cost of living allowance (COLA) is granted based on the Consumer Price Index.

LEOFF Plan 1 disability benefit is 50 percent of the FAS plus 5 percent for each child up to a maximum of 60 percent. Upon recovery from disability before the age of 50, a member is restored to service with full credit for service while disabled. Upon recovery after the age of 50, the benefit continues at the greater of the member's disability benefit or service retirement benefit.

LEOFF Plan 1 death benefits for survivors of Plan 1 members on active duty consist of the following: (1) If eligible spouse, 50 percent of the FAS plus 5 percent of FAS for each eligible surviving child, with a limitation on

the combined benefit of 60 percent of the FAS; or (2) If no eligible spouse, eligible children receive 30 percent of FAS for the first child plus 10 percent for each additional child, subject to a 60 percent limitation of FAS, divided equally.

A one-time, duty-related death benefit is provided to the estate (or duly designated nominee) of a LEOFF Plan 1 member who dies in the line of service, if found eligible by the director of the Department of Labor and Industries.

LEOFF Plan 2 members are vested after the completion of five years of eligible service. Plan 2 members are eligible for retirement at the age of 53 with five years of service, or at age 50 with 20 years of service. Plan 2 members receive a benefit of 2 percent of the FAS per year of service. Members who retire prior to the age of 53 receive reduced benefits. A COLA is granted based on the Consumer Price Index, capped at 3 percent annually.

LEOFF Plan 2 provides disability benefits. There is no minimum amount of service credit required for eligibility. The Plan 2 monthly benefit amount is 2 percent of the FAS for each year of service. Benefits are reduced to reflect the choice of a survivor option and for each year that the member's age is less than 53, unless the disability is duty-related.

Members of LEOFF Plan 2 who leave service because of a line of duty disability are eligible for additional benefits. A one-time, duty-related death benefit is provided to the estate (or duly designated nominee) of a LEOFF Plan 2 member who dies in the line of service, if found eligible by the director of the Department of Labor and Industries.

Benefits to eligible surviving spouses and dependent children of LEOFF Plan 2 members killed in the course of employment include the payment of eligible health care insurance premiums.

LEOFF members meeting specific eligibility requirements have options available to enhance their retirement benefits. Some of these options are available to their survivors, generally with reduced benefits.

Material changes, if any, in LEOFF benefit provisions for the fiscal year ended June 30, 2014, are listed at the end of this section.

Contributions. LEOFF retirement benefits are financed from a combination of investment earnings, employer and employee contributions, and a special funding situation in which the state pays through legislative appropriations.

Employer and employee contribution rates are developed by the Office of the State Actuary to fully fund the plans. Starting on July 1, 2000, Plan 1 employers and employees are not required to contribute as long as the plan remains fully funded. Plan 2 employers and employees are required to pay at the level adopted by the LEOFF Plan 2 Retirement Board. The methods used to determine the contribution requirements are established under state statute.

Employee contributions to the LEOFF Plan 1 and Plan 2 defined benefit plans accrue interest at a rate specified by the director of DRS. During fiscal year 2014, the rate was 5.5 percent compounded quarterly. Members in LEOFF Plan 1 and Plan 2 can elect to withdraw total employee contributions and interest earnings upon separation from LEOFF-covered employment.

The Legislature, by means of a special funding arrangement, appropriates money from the state General Fund to supplement the current service liability and fund the prior service costs of Plan 2 in accordance with the recommendations of the Pension Funding Council and the LEOFF Plan 2 Retirement Board.

Beginning in 2011, when state General Fund revenues increase by at least 5 percent over the prior biennium's revenues, the State Treasurer will transfer, subject to legislative appropriation, specific amounts into a Local Public Safety Enhancement Account. Half of this transfer will be proportionately distributed to all jurisdictions with LEOFF Plan 2 members. The other half will be transferred to a LEOFF Retirement System Benefits Improvement Account to fund benefit enhancements for LEOFF Plan 2 members.

However, this special funding situation is not mandated by the State Constitution and this funding requirement could be returned to the employers by a change of statute. For fiscal year 2014, the state contributed \$55.6 million to LEOFF Plan 2.

Required contribution rates for fiscal year 2014 are presented at the end of this section.

Washington State Patrol Retirement System

Plan Description. The Washington State Patrol Retirement System (WSPRS) was established by the Legislature in 1947. WSPRS benefits are established in chapter 43.43 RCW and may be amended only by the Legislature. Any commissioned employee of the Washington State Patrol is eligible to participate.

WSPRS is a single-employer defined benefit retirement system. WSPRS members who joined the system by December 31, 2002, are Plan 1 members. Plan 1 is closed to new entrants. Those who joined on or after January 1, 2003, are Plan 2 members. For financial reporting and

investment purposes, however, both plans are accounted for in the same pension fund.

Effective June 7, 2012, those WSPRS members who have service credit within PERS Plan 2 have options to transfer their service credit earned as commercial vehicle enforcement officers or as communications officers into the WSPRS, provided the member pays the full actuarial cost of the transfer.

At retirement, these members also have the option of selecting an actuarially reduced benefit in order to provide for post-retirement survivor benefits.

Benefits Provided. WSPRS provides retirement and death benefits to eligible members.

There is no vesting requirement for active WSPRS members. Inactive WSPRS members are vested after the completion of five years of eligible service. Members are eligible for retirement at the age of 55 with five years of service, or after 25 years of service, and must retire at age 65. This mandatory requirement does not apply to the Chief of the Washington State Patrol.

The monthly benefit is 2 percent of the average final salary (AFS) per year of service, capped at 75 percent. A cost of living allowance is granted based on the Consumer Price Index, capped at 3 percent annually.

WSPRS Plan 1 death benefits for survivors of Plan 1 members on active duty consist of the following: (1) If eligible spouse, 50 percent of the AFS, plus 5 percent of the AFS for each eligible surviving child, with a limitation on the combined benefit of 60 percent of the AFS; or (2) If no eligible spouse, 30 percent of AFS for the first child plus 10 percent for each additional child, subject to a 60 percent limitation of AFS, or (3) If no spouse or eligible children, beneficiary gets refund of contributions and interest.

At retirement, WSPRS Plan 2 members have the option of selecting an actuarially reduced benefit in order to provide for post-retirement survivor benefits.

WSPRS members meeting specific eligibility requirements have options available to enhance their retirement benefits. Some of these options are available to their survivors, generally with reduced benefits.

WSPRS provides no disability benefits. Disability benefits may be available from the Washington State Patrol. If disability benefits are received, the member may be eligible to acquire service credit for the period of disability.

A one-time, duty-related death benefit is provided to the estate (or duly designated nominee) of a WSPRS member

who dies as a result of injuries or illness sustained in the course of employment, if found eligible by the director of the Department of Labor and Industries.

Benefits to eligible surviving spouses and dependent children of WSPRS members killed in the course of employment include the payment of ongoing eligible health care insurance premiums.

Compensation for members of WSPRS Plans 1 and 2 who become totally disabled in the line of duty includes any payments for premiums for employer-provided medical insurance.

Material changes, if any, in WSPRS benefit provisions for the fiscal year ended June 30, 2014, are listed at the end of this section.

Contributions. WSPRS retirement benefits are financed from a combination of investment earnings and employer and employee contributions.

Each biennium, the state Pension Funding Council adopts the employee and the state contribution rates, subject to revision by the Legislature. The preliminary employee and the state contribution rates are developed by the Office of the State Actuary to fully fund the plan.

The methods used to determine the contribution requirements are established under state statute.

Employee contributions to WSPRS accrue interest at a rate specified by the director of DRS. During fiscal year 2014, the rate was 5.5 percent annually, compounded monthly. Members in WSPRS can elect to withdraw total employee contributions and interest earnings thereon upon separation from WSPRS-covered employment.

Required contribution rates for fiscal year 2014 are presented at the end of this section.

Public Safety Employees' Retirement System

Plan Description. The Public Safety Employees' Retirement System (PSERS) was created by the 2004 Legislature and became effective July 1, 2006. PSERS retirement benefit provisions are established by chapter 41.37 RCW and may be amended only by the Legislature. PSERS membership includes full-time employees meeting specific eligibility criteria that are employed by Department of Corrections, Department of Natural Resources, Gambling Commission, Liquor Control Board, Parks and Recreation Commission, Washington State Patrol, Washington state counties, corrections departments of Washington state cities except for Seattle, Tacoma, and Spokane, or correctional entities formed by PSERS employers under the Interlocal Cooperation Act.

PSERS is a cost-sharing, multiple-employer retirement system comprised of a single defined benefit plan, PSERS Plan 2.

Benefits Provided. PSERS provides retirement, disability, and death benefits to eligible members.

PSERS members are vested after an employee completes five years of eligible service. PSERS members may retire with a monthly benefit of 2 percent of the average final compensation (AFC) at the age of 65 with five years of service, or at the age of 60 with at least 10 years of PSERS service credit, or at age 53 with 20 years of service. A cost of living allowance (COLA) is granted based on the Consumer Price Index, capped at 3 percent annually. PSERS members who retire prior to the age of 60 receive reduced benefits.

PSERS Plan 2 provides disability benefits. There is no minimum amount of service credit required for eligibility. The monthly benefit amount is 2 percent of the AFC for each year of service. A COLA is granted based on the Consumer Price Index, capped at 3 percent annually.

PSERS members meeting specific eligibility requirements have options available to enhance their retirement benefits. Some of these options are available to their survivors, generally with reduced benefits.

A one-time, duty-related death benefit is provided to the estate (or duly designated nominee) of a PSERS member who dies as a result of injuries or illness sustained in the course of employment, if found eligible by the director of the Department of Labor and Industries.

Material changes, if any, in PSERS benefit provisions for the fiscal year ended June 30, 2014, are listed at the end of this section.

Contributions. PSERS defined benefit retirement benefits are financed from a combination of investment earnings and employer and employee contributions.

Each biennium, the state Pension Funding Council adopts Plan 2 employer and employee contribution rates. The employer and employee contribution rates for Plan 2 are developed by the Office of the State Actuary to fully fund Plan 2.

The methods used to determine the contribution requirements are established under state statute.

Employee contributions to the plan accrue interest at a rate specified by the director of DRS. During fiscal year 2014, the rate was 5.5 percent compounded quarterly.

Members in PSERS Plan 2 can elect to withdraw total employee contributions and interest thereon upon separation from PSERS-covered employment.

Required contribution rates for fiscal year 2014 are presented at the end of this section.

Judges' Retirement Fund

Plan Description. The Judges' Retirement Fund was created by the Legislature on March 22, 1937, pursuant to chapter 2.12 RCW, to provide retirement benefits to judges elected or appointed to the Supreme Court, Court of Appeals, and Superior Courts of the state of Washington. Judges' retirement benefit provisions are established in chapter 2.12 RCW and may be amended only by the Legislature.

Judges' Retirement Fund is a single-employer, defined benefit retirement system. There are currently no active members in this plan.

Benefits Provided. Judges' Retirement Fund provides retirement benefits to judges elected or appointed to the Supreme Court, Court of Appeals, and Superior Courts of the state of Washington. The system was closed to new entrants on August 8, 1971, with new judges joining the Judicial Retirement System.

Material changes, if any, in benefit provisions for Judges for the fiscal year ended June 30, 2014, are listed at the end of this section.

Contributions. There are no active members remaining in the Judges' Retirement Fund. Past contributions were made based on rates set in statute. By statute, employees were required to contribute 6.5 percent of covered payroll with an equal amount contributed by the state.

Retirement benefits are financed on a pay-as-you-go basis from a combination of investment earnings and employer contributions. Each biennium, the Legislature, through appropriations from the state General Fund, contributes amounts sufficient to meet benefit payment requirements. For fiscal year 2014, no such appropriations or contributions were made.

Judicial Retirement System

Plan Description. The Judicial Retirement System (JRS) was established by the Legislature in 1971. JRS retirement benefit provisions are established in chapter 2.10 RCW and may be amended only by the Legislature. Membership includes judges elected or appointed to the Supreme Court, Court of Appeals, and Superior Courts on or after August 9, 1971.

JRS is a single-employer, defined benefit retirement system. There are no active members remaining in the Judicial Retirement System.

Benefits Provided. JRS provides retirement, disability, and death benefits to eligible members.

JRS members are eligible for retirement at the age of 60 with 15 years of service, or at the age of 60 after 12 years of service (if the member left office involuntarily) with at least 15 years after beginning judicial service. The system was closed to new entrants on July 1, 1988, with new judges joining PERS.

The benefit per year of service calculated as a percent of final average salary (FAS) is shown in the table below. This benefit is capped at 75 percent of FAS, exclusive of cost-of-living increases.

| Years of Service | Percent of FAS |
|------------------|----------------|
| 15+ | 3.5% |
| 10-14 | 3.0% |

Death and disability benefits are also provided. Eligibility for death benefits while on active duty requires 10 or more years of service. A monthly spousal benefit is provided which is equal to 50 percent of the benefit that the member would have received if retired. If the member is retired, the surviving spouse receives the greater of 50 percent of the member's retirement benefit or 25 percent of the FAS. For members with 10 or more years of service, a disability benefit of 50 percent of FAS is provided.

Material changes, if any, in JRS benefit provisions for the fiscal year ended June 30, 2014, are listed at the end of this section.

Contributions. JRS retirement benefits are financed on a pay-as-you-go basis from a combination of investment earnings, employer contributions, and employee contributions.

Past contributions were made based on rates set in statute. By statute, employees were required to contribute 7.5 percent of covered payroll with an equal amount contributed by the state.

Employee contributions to the plan accrue interest at a rate specified by the director of DRS. During fiscal year 2014, the rate on employee contributions was 5.5 percent compounded quarterly. JRS members who are vested in the plan may not elect to withdraw their contributions upon termination.

The state guarantees the solvency of the Judicial Retirement System on a pay-as-you-go basis. Each biennium, the Legislature, through appropriations from the state General Fund, contributes amounts sufficient to meet benefit payment requirements. For fiscal year 2014, the state contributed \$10.6 million.

Required contribution rates for fiscal year 2014 are presented at the end of this section.

Material Legislative Changes to DRS Administered Pension Plans

Material legislative changes to DRS administered pension plans for the fiscal year ended June 30, 2014, included:

| System/Plan Affected | Effective Date | Description of the changes |
|-----------------------|----------------|---|
| LEOFF Plan 2 | 6/12/2014 | The expiration date on the statutory provision in the LEOFF definition of fire fighter that includes emergency medical technicians (EMTs) is eliminated. This correction allows EMTs continued eligibility for membership in LEOFF. |
| LEOFF Plan 2 | 6/12/2014 | Members of LEOFF Plan 2 may purchase an optional actuarially equivalent life annuity from the LEOFF Plan 2 Fund at the time of retirement. |
| TRS 3, PERS 3, SERS 3 | 6/12/2014 | Currently, a TRS Plan 3 member has the option to change his or her contribution rate each year during the month of January. This bill would amend RCW 41.34.040 to remove this annual option, effective after January of 2015. While this statutory option applies to Plan 3 members of PERS and SERS as well, it has never been implemented in those plans. This modification is deemed necessary by the Internal Revenue Service in order to ensure the Plans 3 retain favorable tax qualification. |
| LEOFF Plan 2 | 7/28/2013 | Allows catastrophically disabled LEOFF Plan 2 members to be reimbursed for premiums of medical insurance other than that which is provided by the employer, the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA), or Medicare A and/or B. The reimbursement would only be allowed for payments made after June 30, 2013, and would not exceed the amount reimbursed for premiums authorized by COBRA. |

Required Contribution Rates

Required contribution rates (expressed as a percentage of current year covered payroll) for all retirement plans administered by DRS at the close of fiscal year 2014, were as follows:

| Denvised Contribution Deter | | Employer | | | Employee | |
|----------------------------------|--------|----------|----------|--------|----------|-----------|
| Required Contribution Rates | Plan 1 | Plan 2 | Plan 3 | Plan 1 | Plan 2 | Plan 3 |

^{**} Plan 3 defined benefit portion only.

^{***} Variable from 5% to 15% based on rate selected by the member.

^{****} Minimum rate.

C. PLAN ADMINISTERED BY THE STATE BOARD FOR VOLUNTEER FIRE FIGHTERS AND RESERVE OFFICERS

Plan Administration. The Volunteer Fire Fighters' Relief Act was created by the Legislature in 1935 and the pension portion of the act was added in 1945. As established in chapter 41.24 RCW, the Volunteer Fire Fighters' and Reserve Officers' Relief and Pension Fund (VFFRPF) is a cost-sharing, multiple-employer defined benefit plan and is administered by the State Board for Volunteer Fire Fighters and Reserve Officers. The board is appointed by the Governor and is comprised of five members of fire departments covered by chapter 41.24 RCW. Administration costs of the VFFRPF are funded through legislative appropriation.

As of June 30, 2014, there were 500 municipalities contributing to the plan. Additionally, the state, a non-employer contributing entity, contributes 40 percent of the fire insurance premium tax.

Plan Members: Membership in the VFFRPF requires volunteer firefighter service with a fire department of an electing municipality of Washington state, emergency work as an emergency medical technician with an emergency medical service district, or work as a commissioned reserve law enforcement officer.

At June 30, 2013 (the date of the latest valuation), VFFRPF membership consisted of the following:

| Plan Membership | |
|---|--------|
| Inactive plan members or beneficiaries currently receiving benefits | 4,117 |
| Inactive plan members entitled to but not yet receiving benefits | 6,123 |
| Active plan members | 10,230 |
| Total membership | 20,470 |

Benefits: VFFRPF retirement benefits are established in chapter 41.24 RCW and may be amended only by the Legislature. VFFRPF also provides death and active duty disability benefits to all members.

Since retirement benefits cover volunteer service, benefits are paid based on years of service not salary. Employers consist of fire departments, emergency medical service districts and law enforcement agencies. After 25 years of active membership, members having reached the age of 65 and who have paid their annual retirement fee for 25 years are entitled to receive a monthly benefit of \$50 plus \$10 per year of service. The maximum monthly benefit is \$300. Reduced pensions are

available for members under the age of 65 or with less than 25 years of service.

Members are vested after ten years of service. VFFRPF members earn no interest on contributions and may elect to withdraw their contributions upon termination.

Death and active duty disability benefits are provided at no cost to the member. Death benefits in the line of duty consist of a lump sum of \$214 thousand. Funeral and burial expenses are also paid in a lump sum of \$2 thousand for members on active duty. Members receiving disability benefits at the time of death shall be paid \$500.

Effective June 7, 2012, at any time prior to retirement or at the time of retirement, a member of the VFFRPF may purchase retirement pension coverage for years of eligible service prior to the member's enrollment in the system or for years of service credit lost due to the withdrawal of the member's pension fee contributions. A member choosing to purchase such retirement pension coverage must contribute to the system equal to the actuarial value of the resulting benefit increase.

There were no material changes in VFFRPF benefit provisions for the fiscal year ended June 30, 2014.

Contributions. VFFRPF retirement benefits are financed from a combination of investment earnings, member contributions, municipality contributions, and state contributions. In accordance with chapter 41.24 RCW, the state contribution is set at 40 percent of the fire insurance premium tax. For fiscal year 2014, the fire insurance premium tax contribution was \$6.4 million.

The municipality rate for emergency medical service districts (EMSD) and law enforcement agencies are set each year by the State Board for Volunteer Fire Fighters and Reserve Officers, based on the actual cost of participation as determined by the Office of the State Actuary. All other contribution rates are set by the Legislature. Municipalities may opt to pay the member's fee on their behalf.

The contribution rates set for 2014 are the following:

| | | EMSD & |
|------------------|--------------|-------------------------|
| | Firefighters | Reserve Officers |
| Member fee | \$30.00 | \$30.00 |
| Municipality fee | 30.00 | 90.00 |
| Total fee | \$60.00 | \$120.00 |

Investments. The Washington State Investment Board (WSIB) has been authorized by statute as having investment management responsibility for the pension funds. The WSIB manages retirement fund assets to maximize return at a prudent level of risk.

Retirement funds are invested in the Commingled Trust Fund (CTF). Established on July 1, 1992, the CTF is a diversified pool of investments that invests in fixed income, public equity, private equity, real estate, and tangible assets. Investment decisions are made within the framework of a Strategic Asset Allocation Policy and a series of written WSIB-adopted investment policies for the various asset classes in which the WSIB invests.

Further information about the investment of pension funds by the WSIB, their valuation, classifications, concentrations, and maturities can be found in Note 3B.

The Office of the State Treasurer (OST) manages a small portion of the assets for the VFFRPF. By statute, balances in the accounts in the state treasury and in the custody of the treasurer may be pooled for banking and investment purposes.

The overall objective of the OST investment policy is to construct, from eligible investments noted below, an investment portfolio that is optimal or efficient. An optimal or efficient portfolio is one that provides the greatest expected return for a given expected level of risk, or the lowest expected risk for a given expected return. Eligible investments are only those securities and deposits authorized by statute.

Further information about the investment of pension funds by the OST, their valuation, classifications, concentrations, and maturities can be found in Note 3.F.

Rate of return. For the year ended June 30, 2014, the annual money-weighted rate of return on VFFRPF investments, net of pension plan investment expense, was 16.72 percent. This money-weighted rate of return expresses investment performance, net of pension plan investment expense, and reflects both the size and timing of external cash flows.

Pension liability. The components of the net pension liability of the participating VFFRPF municipalities at June 30, 2014, were as follows:

| Pension Liability (in thousands) | |
|--|-------------|
| Total Pension Liability | \$ 186,527 |
| Plan Fiduciary Net Position | (204,195) |
| Participating Employers Net Pension Liability(Asset) | \$ (17,668) |
| Plan fiduciary net position as a percentage of the total pension liability | 109.47% |

Actuarial assumptions. The total pension liability was determined by an actuarial valuation as of June 30, 2013, and rolled forward to June 30, 2014, using the following

actuarial assumptions, applied to all prior periods included in the measurement:

| Inflation | 2.75% |
|---------------------------|-------|
| Salary increases | N/A |
| Investment rate of return | 7.00% |

Mortality rates were based on the RP-2000 Combined Healthy Table and Combined Disabled Table published by the Society of Actuaries. The Office of the State Actuary applied offsets to the base table and recognized future improvements in mortality by projecting the mortality rates using 100 percent Scale BB. Mortality rates are applied on a generational basis, meaning members are assumed to receive additional mortality improvements in each future year, throughout their lifetime.

The actuarial assumptions used in the June 30, 2013, valuation were based on the results of the 2007-2012 Experience Studies. Additional assumptions for subsequent events and law changes are current as of the 2013 actuarial valuation report.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which a best estimate of expected future rates of return (expected returns, net of pension plan investment expense, but including inflation) are developed for each major asset class by the WSIB. Those expected returns make up one component of WSIB's Capital Market Assumptions (CMAs). The CMAs contain the following three pieces of information for each class of assets the WSIB currently invests in:

- Expected annual return.
- Standard deviation of the annual return.
- Correlations between the annual returns of each asset class with every other asset class.

WSIB uses the CMAs and their target asset allocation to simulate future investment returns over various time horizons.

The long-term expected rate of return of 7.50 percent approximately equals the median of the simulated investment returns over a fifty-year time horizon, increased slightly to remove WSIB's implicit and small short-term downward adjustment due to assumed mean reversion. WSIB's implicit short-term adjustment, while small and appropriate over a ten to fifteen year period, becomes amplified over a fifty-year measurement period.

Best estimates of arithmetic real rates of return for each major asset class included in the pension plan's target asset allocation as of June 30, 2014, are summarized in the following table:

| Rates of Return | | | | | | |
|-----------------|---|--|--|--|--|--|
| Asset Class | Long-Term Expected Real Rate of Return | | | | | |
| Fixed Income | 0.08% | | | | | |
| Tangible Assets | 4.10% | | | | | |
| Real Estate | 5.30% | | | | | |
| Global Equity | 6.05% | | | | | |
| Private Equity | 9.05% | | | | | |

The inflation component used to create the above table is 2.70 percent, and represents WSIB's most recent long-term estimate of broad economic inflation.

As the VFFRPF has assets managed by both WSIB and OST, the long-term expected rate of return of 7.00% represents an approximate weighted-average of the assets managed by WSIB (7.50% expected return) and the assets managed by OST (4.00% expected return). In consultation with OST, OSA selected a 4.00% long-term investment rate of return on assets managed by OST. Based upon the investment portfolio, this assumption was calculated as 100 basis points above OSA's current assumption for total inflation of 3.00%.

Discount rate. The discount rate used to measure the total pension liability was 7.0 percent. To determine the discount rate, an asset sufficiency test was completed to test whether the pension plan's fiduciary net position was sufficient to make all projected future benefit payments

of current plan members. Consistent with current law, the completed asset sufficiency test included an assumed 7.0 percent long-term discount rate to determine funding liabilities for calculating future contribution rate requirements. Consistent with the long-term expected rate of return, a 7.0 percent future investment rate of return on invested assets was assumed for the test. Contributions from plan members, municipalities, and the state will be made at the current contribution rate. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members.

Sensitivity of the net pension liability to changes in the discount rate. The following presents the net pension liability of the employers calculated using the discount rate of 7 percent, as well as what the municipalities' net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower (6 percent) or 1 percentage point higher (8 percent) than the current rate.

| Municipalities' Net Pension Liability(Asset) (in thousands) | | | | | |
|---|----------|--|--|--|--|
| 1% Decrease | 8,632 | | | | |
| Current Discount Rate | (17,668) | | | | |
| 1% Increase | (38,820) | | | | |

D. STATE CONTRIBUTIONS REQUIRED AND PAID

The following table presents the state of Washington's required contributions (dollars in millions) to cost-sharing plans in accordance with the funding policy. All contributions required by the funding method were paid.

| Plans | 2014 | 2013 | 2012 |
|---------------|----------|----------|----------|
| PERS Plan 1 | \$ 208.1 | \$ 125.6 | \$ 124.0 |
| PERS Plan 2/3 | 203.7 | 182.9 | 182.8 |
| TRS Plan 1 | 6.3 | 3.7 | 3.1 |
| TRS Plan 2/3 | 1.1 | 1.2 | 1.1 |
| PSERS Plan 2 | 8.2 | 7.5 | 7.4 |
| LEOFF Plan 2 | 55.6 | 54.2 | 52.8 |
| VFFRPF | 6.4 | 6.0 | 5.6 |

There are no long-term contracts for contributions for any of the retirement plans administered by the state.

E. FUNDED STATUS

The funded status in accordance with the funding policy of each plan as of June 30, 2013, the most recent actuarial valuation date, is as follows (dollars in millions):

| Plans | Actuarial Value of Assets (a) | Actuarial Accrued Liability (AAL) Entry Age (b) | Unfunded AAL (UAAL) (b-a) | Funded Ratio (a/b) | Covered Payroll | UAAL as a Percentage of Covered Payroll ((b-a)/c) |
|-----------------|-------------------------------------|---|---------------------------------|-----------------------|-----------------|--|
| PERS Plan 1 | \$ 8,053.1 | \$ 12,873.9 | \$ 4,820.8 | 63% | \$ 317.8 | 1517% |
| PERS Plan 2/3* | 24,334.6 | 26,539.5 | 2,204.9 | 92% | 8,339.2 | 26% |
| TRS Plan 1 | 6,717.1 | 9,429.3 | 2,712.1 | 71% | 183.2 | 1481% |
| TRS Plan 2/3* | 8,406.1 | 8,793.7 | 387.6 | 96% | 4,222.9 | 9% |
| SERS Plan 2/3* | 3,334.6 | 3,581.4 | 246.7 | 93% | 1,514.2 | 16% |
| LEOFF Plan 1 | 5,516.4 | 4,408.6 | (1,107.9) | 125% | 14.8 | 0% |
| LEOFF Plan 2* | 7,862.3 | 7,219.5 | (642.8) | 109% | 1,596.8 | 0% |
| WSPRS Plan 1/2* | 1,009.4 | 987.0 | (22.3) | 102% | 80.1 | 0% |
| PSERS Plan 2* | 224.2 | 217.6 | (6.6) | 103% | 253.1 | 0% |
| JRS | 3.9 | 108.2 | 104.3 | 4% | N/A | N/A |
| Judges | 1.4 | 3.5 | 2.1 | 40% | N/A | N/A |
| VFFRPF | 182.5 | 183.6 | 1.1 | 99% | N/A | N/A |

N/A indicates data not applicable.

Note: Figures may not total due to rounding. Percentages are calculated using unrounded totals.

Source: Washington State Office of the State Actuary

^{*} These plans use the aggregate actuarial cost method which does not identify or separately amortize unfunded actuarial liabilities. For this reason, the information shown above has been prepared using the entry age actuarial cost method and is intended to serve as a surrogate for the funded status and funding progress of these plans.

F. ACTUARIAL ASSUMPTIONS AND METHODS

Defined Benefit Pension Plans Administered by the State

The information was determined as part of the actuarial valuations in accordance with the funding policy at the dates indicated below. Additional information as of the latest valuation follows:

N/A indicates data not applicable.

⁽⁵⁾ Asset Valuation Method - eight year smoothed fair value: The actuarial value of assets is calculated under an adjusted market value method by starting with the market value of assets. For subsequent years, the actuarial value of assets is determined by adjusting the market value of assets to reflect the difference between the actual investment return and the expected investment return during each of the last eight years or, if fewer, the completed years since adoption, at the following rates per year (annual recognition). The annual gain/loss for VFFRPF and LEOFF Plan 2 are centered around a 7.0 percent and 7.5 percent expected rate of return, respectively, instead of 7.8 percent.

| Annual Gain/Loss | | | Annual Gain/Loss | | |
|------------------|-----------|-------------|------------------|-----------|-------------|
| Rate | Smoothing | Annual | Rate | Smoothing | Annual |
| of Return | Period | Recognition | of Return | Period | Recognition |
| 14.9% and Up | 8 years | 12.50% | 5.9-6.9% | 2 years | 50.00% |
| 13.9-14.9% | 7 years | 14.29% | 4.9-5.9% | 3 years | 33.33% |
| 12.9-13.9% | 6 years | 16.67% | 3.9-4.9% | 4 years | 25.00% |
| 11.9-12.9% | 5 years | 20.00% | 2.9-3.9% | 5 years | 20.00% |
| 10.9-11.9% | 4 years | 25.00% | 1.9-2.9% | 6 years | 16.67% |
| 9.9-10.9% | 3 years | 33.33% | 0.9-1.9% | 7 years | 14.29% |
| 8.9-9.9% | 2 years | 50.00% | 0.9% and lower | 8 years | 12.50% |
| 6.9-8.9% | 1 year | 100.00% | | | |

⁽¹⁾ PERS and TRS Plans 1 use a variation of the entry age normal (EAN) cost method, whereas LEOFF Plan 1 uses a variation of the frozen initial liability (FIL)

 $^{^{(2)}}$ The aggregate cost method does not identify or separately amortize unfunded actuarial accrued liabilities.

 $^{^{\}left(3\right) }$ Pay as you go basis for funding.

 $^{^{\}rm (4)}$ Level percent of system payroll, including system growth.

| | | maximum 3% | maximum 3% | maximum 3% | maximum 3% | |

⁽⁶⁾ The PERS Plan 1 and TRS Plan 1 COLA: Qualifying retirees receive an increase in their monthly benefit once a year. The COLA on minimum benefit levels is calculated as the last unrounded minimum COLA amount increased by 3 percent, rounded to the nearest penny. These are some historical monthly COLA amounts per year of service:

| Date | COLA Type | Amount |
|----------|-----------|--------|
| 7/1/2009 | Uniform | \$1.83 |
| 7/1/2010 | Uniform | \$1.88 |
| 7/1/2011 | Minimum | \$1.94 |
| 7/1/2012 | Minimum | \$2.00 |
| 7/1/2013 | Minimum | \$2.06 |
| 7/1/2014 | Minimum | \$2.12 |

 $^{^{(7)}}$ VFFRPF uses the Entry Age Funding Method for Pensions, and the Aggregate Funding Method for the Relief Costs.

 $^{^{(8)}}$ The Legislature prescribes the assumed rate of investment return for all plans except JRS, Judges, and VFFRPF.

G. ANNUAL PENSION COST AND OTHER RELATED INFORMATION

Current year annual pension cost, net pension obligation (NPO) and related information for the current year for the state's single employer defined benefit plans are as follows (dollars in millions):

| Annual Pension Cost and Net Pension Obligation | WSPRS | JRS | Judges |
|--|----------|--------|--------|
| Annual required contribution | \$7.3 | \$22.5 | \$0.5 |
| Interest on NPO | (1.6) | 2.8 | 0.0 |
| Adjustment to annual required contribution | 2.5 | (15.1) | (0.0) |
| Annual pension cost | 8.2 | 10.2 | 0.5 |
| Less: Contributions made | 6.6 | 10.6 | 0.0 |
| Increase (decrease) in NPO | 1.6 | (0.4) | 0.5 |
| NPO at beginning of year | (20.0) | 70.1 | 0.1 |
| NPO at end of year | \$(18.4) | \$69.7 | \$0.6 |

H. THREE YEAR HISTORICAL TREND INFORMATION

The following table presents three-year trend information for the state's single employer defined benefit plans (dollars in millions):

| Single Employer Plans | 2014 | 2013 | 2012 |
|-----------------------|----------|----------|----------|
| WSPRS | | | |
| Annual pension cost | \$8.2 | \$3.3 | \$3.6 |
| % of APC contributed | 80.5 | 197.0 | 180.6 |
| NPO | \$(18.4) | \$(20.0) | \$(16.8) |
| JRS | | | |
| Annual pension cost | \$10.2 | \$9.2 | \$10.5 |
| % of APC contributed | 103.9 | 109.8 | 77.1 |
| NPO | \$69.7 | \$70.1 | \$71.0 |
| Judges | | | |
| Annual pension cost | \$0.5 | \$0.5 | \$0.4 |
| % of APC contributed | 0.0 | 0.0 | 0.0 |
| NPO | \$0.6 | \$0.1 | \$(0.4) |

There are no long-term contracts for contributions for any of the retirement plans administered by the state.

I. CHANGES IN ACTUARIAL ASSUMPTIONS, METHODS, AND BENEFIT PROVISIONS

The assumed return on investment earnings decreased from 7.9 percent to 7.8 percent for all plans except LEOFF Plan 2, JRS, Judges and VFFRPF, which stayed at the current percentages.

Several changes were made to demographic assumption in fiscal year 2014. The demographic change with the largest impact was changing scales for the mortality improvement assumption.

The assumed administrative factors were changed to be consistent with those used by the Department of Retirement Systems.

There were no material method changes for fiscal year 2014.

There were no changes in benefit provisions for the fiscal year 2014 reporting period.

J. HIGHER EDUCATION RETIREMENT PLAN SUPPLEMENTAL DEFINED BENEFIT PLAN

The higher education defined contribution retirement plans have a supplemental payment component, which guarantees a minimum retirement benefit based upon a one-time calculation at each employee's retirement date. The supplemental component is financed on a pay-asyou-go basis. State institutions of higher education make direct payments to qualifying retirees when the retirement benefits provided by the fund sponsors do not meet the benefit goals.

An actuarial valuation of the supplemental component of the Higher Education Retirement plans was done at the end of fiscal year 2013. The previous valuation was performed in 2011.

The Unfunded Actuarial Accrued Liability (UAL) calculated as of June 30, 2013, and 2011, was \$460.8 million and \$357.4 million, respectively, and is amortized over an 11 year period. The Annual Required Contribution (ARC) of \$63.8 million includes amortization of the UAL (\$44.5 million) and normal cost or current cost (\$18.1 million).

The UAL and ARC were established using the entry age normal cost method. The actuarial assumptions included an investment rate of return of 4.3 to 7.5 percent and projected salary increases ranging from 2 to 4 percent. Approximately \$1.76 billion and \$1.91 billion of payroll were covered under these plans during 2013 and 2011, respectively.

Beginning in January 2012, higher education employers were required to make contributions to the Higher Education Retirement Plan Supplemental Benefit Fund to begin prefunding the net pension obligation related to the supplemental benefits of the higher education retirement plans. The Higher Education Retirement Plan Supplemental Benefit Fund is administered by the Department of Retirement Systems and invested by the Washington State Investment Board. The contribution rate for fiscal year 2014 was 0.5 percent of pay for employees covered by higher education retirement plans. The Higher Education Retirement Plan Supplemental Benefit Fund was not created as a pension trust fund and is reported by the state as an administrative account in the General Fund.

The following table reflects the activity in the Net Pension Obligation (NPO) for the years ended June 30 (expressed in millions):

| Net Pension Obligation | 2014 | 2013 | 2012 |
|-------------------------------|---------|---------|---------|
| Annual required contribution | \$63.8 | \$63.8 | \$49.8 |
| Payments to beneficiaries | (5.6) | (4.9) | (4.1) |
| Increase (decrease) in NPO | 58.2 | 58.9 | 45.7 |
| NPO at beginning of year | 270.3 | 211.4 | 165.7 |
| NPO at end of year | \$328.5 | \$270.3 | \$211.4 |
| | | | 1 |

K. DEFINED CONTRIBUTION PLANS

Public Employees' Retirement System Plan 3

The Public Employees' Retirement System (PERS) Plan 3 is a combination defined benefit/defined contribution plan administered by the state through the Department of Retirement Systems (DRS). Refer to section B of this note for PERS Plan descriptions.

PERS Plan 3 has a dual benefit structure. Employer contributions finance a defined benefit component, and member contributions finance a defined contribution component. As established by chapter 41.34 RCW, employee contribution rates to the defined contribution component range from 5 to 15 percent of salaries, based on member choice. Members who do not choose a contribution rate default to a 5 percent rate. There are currently no requirements for employer contributions to the defined contribution component of PERS Plan 3.

PERS Plan 3 defined contribution retirement benefits are dependent upon the results of investment activities. Members may elect to self-direct the investment of their contributions. Any expenses incurred in conjunction with self-directed investments are paid by members. Absent a member's self-direction, PERS Plan 3 contributions are invested in the retirement strategy fund that assumes the member will retire at age 65.

Members in PERS Plan 3 can elect to withdraw total employee contributions adjusted by earnings and losses from investments of those contributions upon separation from PERS-covered employment.

For fiscal year 2014, covered payroll was \$1.61 billion, employee contributions required and made were \$105.2 million, and plan refunds paid out were \$83.4 million.

Teachers' Retirement System Plan 3

The Teachers' Retirement System (TRS) Plan 3 is a combination defined benefit/defined contribution plan administered by the state through the Department of Retirement Systems (DRS). Refer to section B of this note for TRS Plan descriptions.

TRS Plan 3 has a dual benefit structure. Employer contributions finance a defined benefit component, and member contributions finance a defined contribution component. As established by chapter 41.34 RCW, employee contribution rates to the defined contribution component range from 5 to 15 percent of salaries, based on member choice. Members who do not choose a contribution rate default to a 5 percent rate. There are currently no requirements for employer contributions to the defined contribution component of TRS Plan 3.

TRS Plan 3 defined contribution retirement benefits are dependent upon the results of investment activities. Members may elect to self-direct the investment of their contributions. Any expenses incurred in conjunction with self-directed investments are paid by members. Absent a member's self-direction, TRS Plan 3 investments are made in the retirement strategy fund that assumes the member will retire at age 65.

TRS Plan 3 defined contribution benefits are financed from employee contributions and investment earnings.

Members in TRS Plan 3 can elect to withdraw total employee contributions adjusted by earnings and losses from investments of those contributions upon separation from TRS-covered employment.

For fiscal year 2014, covered payroll was \$3.60 billion, employee contributions required and made were \$273.7 million and plan refunds paid out were \$238.7 million.

School Employees' Retirement System Plan 3

The School Employees' Retirement System (SERS) Plan 3 is a combination defined benefit/defined contribution plan administered by the state through the Department of Retirement Systems (DRS). Refer to section B of this note for SERS Plan descriptions.

SERS Plan 3 has a dual benefit structure. Employer contributions finance a defined benefit component, and member contributions finance a defined contribution component. As established by chapter 41.34 RCW, employee contribution rates to the defined contribution component range from 5 to 15 percent of salaries, based on member choice. Members who do not choose a contribution rate default to a 5 percent rate. There are currently no requirements for employer contributions to the defined contribution component of SERS Plan 3.

SERS Plan 3 defined contribution retirement benefits are dependent upon the results of investment activities. Members may elect to self-direct the investment of their contributions. Any expenses incurred in conjunction with self-directed investments are paid by members. Absent a member's self-direction, SERS Plan 3 investments are made in the retirement strategy fund that assumes the member will retire at age 65.

Members in SERS Plan 3 can elect to withdraw total employee contributions adjusted by earnings and losses from investments of those contributions upon separation from SERS-covered employment.

For fiscal year 2014, covered payroll was \$928.5 million, employee contributions required and made were \$60.8 million and plan refunds paid out were \$74.7 million.

Judicial Retirement Account

The Judicial Retirement Account (JRA) Plan was established by the Legislature in 1988 to provide supplemental retirement benefits. It is a defined contribution plan administered by the state Administrative Office of the Courts (AOC), under the direction of the Board for Judicial Administration. Membership includes judges elected or appointed to the Supreme Court, Court of Appeals, and Superior Courts, and who are members of PERS for their services as a judge. Vesting is full and immediate. At June 30, 2014, there were five active members and 152 inactive members in JRA. The state, through the AOC, is the sole participating employer.

From January 1, 2007, through December 31, 2007, any judicial members of the Public Employees' Retirement System (PERS) and the Teachers' Retirement System (TRS) eligible to participate in JRA were able to make a one-time irrevocable election to discontinue future contributions to JRA, in lieu of prospective contributions to the Judicial Benefit Multiplier (JBM) Program. Beginning January 1, 2007, any newly elected or appointed Supreme Court justice, Court of Appeals judge, or Superior Court judge could no longer participate in JRA and would be enrolled in the JBM Program (enacted in 2006).

JRA Plan members are required to contribute 2.5 percent of covered salary. The state, as employer, contributes an equal amount on a monthly basis. The employer and employee obligations to contribute are established per chapter 2.14 RCW. Plan provisions and contribution requirements are established in state statute and may be amended only by the Legislature.

A JRA member who separates from judicial service for any reason is entitled to receive a lump-sum distribution of the accumulated contributions. The administrator of JRA may adopt rules establishing other payment options. If a member dies, the amount of accumulated contributions standing to the member's credit at the time of the member's death is to be paid to the member's estate, or such person or persons, trust or organization as the member has nominated by written designation.

For fiscal year 2014, covered payroll was \$991 thousand and the contribution requirement was \$50 thousand. Actual employer and employee contributions were \$25 thousand and \$25 thousand respectively. Plan benefits paid out for fiscal year 2014 totaled \$668 thousand.

The Administrator of JRA has entered an agreement with DRS for accounting and reporting services, and the Washington State Investment Board (WSIB) for investment services. Under this agreement, DRS is

responsible for all record keeping, accounting, and reporting of member accounts and the WSIB is granted the full power to establish investment policy, develop participant investment options and manage the investment funds for the JRA Plan, consistent with the provisions of RCW 2.14.080 and 43.84.150.

Higher Education Retirement Plans

The Higher Education Retirement Plans are privately administered defined contribution plans with a supplemental defined benefit plan component. The state and regional universities, the state college, the state community and technical colleges and the Student Achievement Council each participate in a plan. As authorized by chapter 28B.10 RCW, the plans cover faculty and other positions as designated by each participating employer.

Contributions to the plans are invested in annuity contracts or mutual fund accounts offered by one or more fund sponsors. Benefits from fund sponsors are available upon separation or retirement at the member's option. Employees have, at all times, a 100 percent vested interest in their accumulations.

RCW 28B.10.400, et. seq. assigns the authority to establish and amend benefit provisions to the board of regents of the state universities, the boards of trustees of the regional universities and the state college, the state board for community colleges, and the Student Achievement Council.

Employee contribution rates, based on age, range from 5 to 10 percent of salary. The employers match the employee contributions. The employer and employee obligations to contribute are established per chapter 28B.10 RCW.

For fiscal year 2014, covered payroll was \$2.18 billion. Employer and employee contributions were \$182.5 and \$182.5 million respectively, for a total of \$365.0 million. These contribution amounts represent approximately 8.38 and 8.38 percent of covered payroll for employers and employees, respectively.

L. PLAN NET POSITION AND CHANGES IN PLAN NET POSITION

The Combining Statement of Plan Net Position that follows presents the principal components of receivables, investments, and liabilities. The Combining Statement of Changes in Plan Net Position presents the additions and deductions to plan net position.

Note 12

Other Postemployment Benefits

In addition to pension benefits as described in Note 11, the state, through the Health Care Authority (HCA), administers an agent multiple-employer defined benefit other postemployment benefit (OPEB) plan.

Plan Description and Contributions Information

Per RCW 41.05.065, the Public Employees' Benefits Board (PEBB) created within the HCA, is authorized to design benefits and determine the terms and conditions of employee and retired employee participation and coverage, including establishment of eligibility criteria for both active and retired employees. PEBB programs include medical, dental, life and long-term disability.

The relationship between the PEBB OPEB plan and its member employers and their employees and retirees is not formalized in a contract or plan document. Rather, the benefits are provided in accordance with a substantive plan. A substantive plan is one in which the plan terms are understood by the employers and plan members. This understanding is based on communications between the HCA, employers and plan members, and the historical pattern of practice with regard to the sharing of benefit costs.

Employers participating in the PEBB plan include the state (which includes general government agencies and higher education institutions), 60 of the state's K-12 schools and educational service districts (ESDs), and 221 political subdivisions and tribal governments. Additionally, the PEBB plan is available to the retirees of the remaining 237 K-12 schools and ESDs. As of June 2014, membership in the PEBB plan consisted of the following:

| | Active Employees | Retirees ⁽¹⁾ | Total |
|-------------------------|---------------------|-------------------------|---------|
| State | 108,291 | 29,674 | 137,965 |
| K-12 schools | | | |
| and ESDs ⁽²⁾ | 2,138 | 31,642 | 33,780 |
| Political | | | |
| subdivisions | 12,079 | 1,547 | 13,626 |
| Total | 122,508 | 62,863 | 185,371 |

⁽¹⁾ Retirees include retired employees, surviving spouses, and terminated members entitled to a benefit.

For fiscal year 2014, the estimated monthly cost for PEBB benefits for active employees (average across all plans and tiers) is as follows:

| Required Premium ⁽³⁾ | |
|--|---------------|
| Medical | \$ 930 |
| Dental | 81 |
| Life | 4 |
| Long-term disability | 2 |
| Total | \$1,017 |
| Employer contribution Employee contribution | \$ 880 137 |
| Total | \$1,017 |
| (3) Per 2014 Index Rate Model 3. | |

The PEBB retiree OPEB plan is available to employees who elect to continue coverage and pay the administratively established premiums at the time they retire under the provisions of the retirement system to which they belong. Retirees' access to the PEBB plan depends on the retirement eligibility of their respective retirement system. PEBB members are covered in the following retirement systems: PERS, PSERS, TRS, SERS, WSPRS, and Higher Education.

Per RCW 41.05.022, retirees who are not yet eligible for Medicare benefits may continue participation in the state's non-Medicare community-rated health insurance risk pool on a self-pay basis. Retirees in the non-Medicare risk pool receive an implicit subsidy. The implicit subsidy exists because retired members pay a premium based on a claims experience for active employees and other non-Medicare retirees. The subsidy is valued using the difference between the age-based claims costs and the premium. In calendar year 2013, the average weighted implicit subsidy was valued at \$294 per member per month, and in calendar year 2014, the average weighted implicit subsidy is projected to be \$291 per member per month.

Retirees who are enrolled in both Parts A and B of Medicare may participate in the state's Medicare community-rated health insurance risk pool. Medicare retirees receive an explicit subsidy in the form of reduced premiums. Annually, the HCA administrator recommends an amount for the next calendar year's explicit subsidy for inclusion in the Governor's budget. In calendar year 2013, the explicit subsidy was up to \$150 per member per month, and it remained up to \$150 per member per month in calendar year 2014.

Administrative costs as well as implicit and explicit subsidies are funded by required contributions from participating employers. The subsidies provide monetary assistance for medical benefits.

Contributions are set each biennium as part of the budget process. In fiscal year 2014, the cost of the subsidies was approximately 5.9 percent of the cost of

⁽²⁾ In fiscal year 2014, there were 101,445 full-time equivalent active employees in the 237 K-12 schools and ESDs that elected to limit participation in PEBB only to their retirees.

benefits for active employees. The benefits are funded on a pay-as-you-go basis.

Each participating employer in the plan is required to disclose additional information with regard to funding policy, the employer's annual OPEB costs and contributions made, the funded status and funding progress of the employer's individual plan, and actuarial methods and assumptions used.

For information on the results of an actuarial valuation of the employer provided subsidies associated with the PEBB plan, refer to:

http://osa.leg.wa.gov/Actuarial_services/OPEB/OPEB.htm.

Summary of Significant Accounting Policies

The PEBB OPEB plan is funded on a pay-as-you-go basis and is reported by the state as an agency fund using the accrual basis. It has no investments. The PEBB OPEB plan does not issue a publically available financial report.

Annual OPEB Cost and Net OPEB Obligation

The state's (general government agencies and higher education institutions) annual other postemployment benefit (OPEB) cost (expense) is calculated based on the annual required contribution (ARC) of the state as the employer, an amount actuarially determined in accordance with the parameters of GASB Statement No. 45.

The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed 30 years.

The following tables show the components of the state's annual OPEB cost for fiscal year 2014 and changes in the state's Net OPEB Obligation (NOO) (expressed in thousands). All contributions required by the funding method were paid.

| Annual required contribution | \$ | 353,842 |
|---|----|-----------|
| Interest on net OPEB obligation | | 64,551 |
| Amortization of net OPEB obligation | | (59,951) |
| Annual OPEB cost (expense) | | 358,442 |
| Contributions made | | (77,650) |
| Increase in net OPEB obligation | | 280,792 |
| Net OPEB obligation - beginning of year | : | 1,613,775 |
| Net OPEB obligation - end of year* | \$ | 1,894,567 |
| *estimated | | |

The state's annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB

obligation for fiscal years 2014, 2013, and 2012 were as follows (dollars expressed in thousands):

| | 2014 | 2013 | 2012 |
|-----------------------------------|-------------|-------------|-------------|
| Annual OPEB cost | \$ 358,442 | \$347,033 | \$330,286 |
| % of annual OPEB cost contributed | 21.7% | 19.9% | 23.8% |
| Net OPEB obligation | \$1,894,567 | \$1,613,775 | \$1,279,381 |

Funded Status and Funding Progress

The funded status of the plan as of January 1, 2013, the latest date for which information is available, was as follows (expressed in thousands):

| Actuarial accrued liability (AAL) | \$3,706,856 |
|---|-------------|
| Actuarial value of plan assets | - |
| Unfunded actuarial accrued liability (UAAL) | \$3,706,856 |
| Funded ratio (actuarial value of plan assets/AAL) | 0.0% |
| Covered payroll (active plan members) | \$5,786,960 |
| UAAL as a percentage of covered payroll | 64.1% |

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trends.

Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress, presented as required supplementary information following the notes to the financial statements, presents multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

Actuarial Methods and Assumptions

Projections of benefits for financial reporting purposes are based on the terms of the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

Significant methods and assumptions were as follows:

Actuarial valuation date January 1, 2013

Actuarial cost method Projected Unit Credit (PUC)

Amortization method Closed, level percentage of projected payroll amortization method

Remaining amortization period 30 years for each new layer of NOO

Asset valuation method N/A - no assets

Actuarial assumptions:

Investment rate of return 4.0% Projected salary increases 3.75%

Health care inflation rate 8.0% initial rate, 5.0% ultimate rate in 2093

Inflation rate 3.0

Note 13

Commitments and Contingencies

A. CAPITAL COMMITMENTS

Outstanding commitments related to state infrastructure and facility construction, improvement, and/or renovation totaled \$2.72 billion at June 30, 2014.

B. ENCUMBRANCES

Encumbrances, which represent commitments related to unperformed contracts for goods or services, are included in restricted, committed or assigned fund balance, as appropriate. Operating encumbrances lapse at the end of the applicable appropriation. Capital outlay encumbrances lapse at the end of the biennium unless reappropriated by the Legislature in the ensuing biennium. Encumbrances outstanding against continuing appropriations at the end of fiscal year 2014 are (in thousands):

| General Fund | \$ 1,629 |
|---------------------------------------|----------|
| Higher Education Special Revenue Fund | 169 |
| Nonmajor Governmental Funds | 21,040 |

C. SUMMARY OF SIGNIFICANT LITIGATION

Pending Litigation

The state and its agencies are parties to numerous routine legal proceedings that normally occur in governmental operations. In addition, at any given point, there may be numerous lawsuits involving the implementation, reduction, or elimination of specific state programs that could significantly impact

expenditures, revenues, and potentially have future budgetary impact. This summary considers significant litigation not covered by tort insurance. Tort case liabilities are disclosed in Note 7.E, Claims and Judgments, Risk Management.

The state is the defendant in a number of cases alleging inadequate funding of state programs or services. Claims include: funding inadequacies and inequities in basic education; inadequate funding for care of foster children, the disabled, and elderly; and inadequate funding for the provision of, daily personal care, medical and mental health services to children, the elderly, and the disabled. Collective claims in these programmatic and service cases exceed \$142 million exclusive of the basic education case, which will be substantial but is difficult to quantify at this juncture. In addition, adverse rulings in some of these cases could result in significant future costs.

The state is also a defendant in a number of cases contesting: the denial of health care benefits to seasonal and part-time state employees, the methodologies used to calculate reimbursement rates to certain health care providers, and the scope of covered care. Claims in this category exceed \$150 million.

The Department of Revenue routinely has claims for refunds in various stages of administrative and legal review. Cases involving claims for refunds currently total approximately \$33 million, though an adverse ruling could result in additional claims being brought by similarly situated taxpayers. In addition, the state is defending cases challenging the constitutionality of certain taxes that fund discrete state programs.

The state is a defendant in a number of lawsuits related to: habitat restoration and environmental clean-up arising out of highway/roadway construction and maintenance, and historic mining activity. While estimates are not available for all lawsuits, claims for damages equate to approximately \$155 million per annum.

The state is a defendant in a number of lawsuits by employees and other entities alleging various infractions of law or contract. These suits claim back pay, damages, or future entitlements in excess of \$172 million.

The state is contesting these lawsuits and the outcomes are uncertain at this time.

Tobacco Settlement

In November 1998, Washington joined 45 other states in a Master Settlement Agreement (MSA) with the nation's largest tobacco manufacturers to provide restitution for monies spent under health care programs for the treatment of smoking-related illnesses. Washington's annual payment under the settlement was approximately \$127.6 million in fiscal year 2014. Beginning in 2008, Washington received the first of ten "strategic contribution payments" under the MSA. This payment is subject to the same offsets, reductions, and adjustments as are applicable to the annual base payment. The 2014 strategic contribution payment was approximately \$37.1 million.

In 2006, 2007, 2008, and 2009, determinations were made that disadvantages experienced by manufacturers as a result of participating in the MSA were a "significant factor" contributing to market share losses by those manufacturers. These determinations related to sales data for the years 2003, 2004, 2005, and 2006. Washington faces a potential "nonparticipating manufacturer (NPM) adjustment" in its share of between \$0 and \$137 million for the year 2004, \$0 and \$131 million for the year 2006.

In addition, the states and the participating manufacturers have entered into an agreement under which the states will not contest that the disadvantages experienced by manufacturers as a result of participating in the MSA were a significant factor contributing to market share losses for the years 2007 through 2012. Washington faces a potential NPM adjustment that puts at risk Washington's entire MSA payment. For example, the potential NPM adjustment for the year 2007 is between \$0 and \$123 million, and for the year 2008, it is between \$0 and \$173 million.

With respect to 2003 sales data, Washington and 37 other states each filed court actions seeking declarations that they had diligently enforced their escrow statutes – a defense to the adjustment claim. Thirty-six of the 37 states are participating in a single national arbitration of the NPM adjustment dispute.

The arbitration panel issued a decision in Washington's favor, unanimously concluding that Washington proved that it diligently enforced the qualifying statute during calendar year 2003 and, therefore, for that calendar year is not subject to an NPM adjustment under the MSA. Of the 15 states that went to an arbitration hearing, only nine were found to have diligently enforced. As a result of that decision, in fiscal year 2014, Washington received approximately \$14 million more than it would have otherwise received due to the release of amounts placed in the MSA Disputed Payment Account (DPA) related to the 2003 calendar More importantly, if Washington had not vear. prevailed in the arbitration, its fiscal year 2014 payment would have been reduced by approximately \$100 million due to the application of the NPM adjustment.

Finally, the panel's decision addresses only the 2003 calendar year. Washington and other states are engaged in negotiations with participating manufacturers regarding potential arbitration proceedings involving the 2004 calendar year.

D. FEDERAL ASSISTANCE

The state has received federal financial assistance for specific purposes that are generally subject to review or audit by the grantor agencies.

Entitlement to this assistance is generally conditional upon compliance with the terms and conditions of grant agreements and applicable federal regulations, including the expenditure of assistance for allowable purposes. Any disallowance resulting from a review or audit may become a liability of the state.

The state estimates and recognizes claims and judgments liabilities for disallowances when determined by the grantor agency or for probable disallowances based on experience pertaining to these grants; however, these recognized liabilities and any unrecognized disallowances are considered immaterial to the state's overall financial condition.

E. ARBITRAGE REBATE

Rebatable arbitrage is defined by the Internal Revenue Service Code Section 148 as earnings on investments purchased from the gross proceeds of a bond issue that are in excess of the amount that would have been earned if the investments were invested at a yield equal to the yield on the bond issue.

The rebatable arbitrage must be paid to the federal government. The state estimates that rebatable arbitrage liability, if any, will be immaterial to its overall financial condition.

F. FINANCIAL GUARANTEES

School District Credit Enhancement Program

In accordance with Chapter 39.98 RCW (School District Credit Enhancement Program), the state has guaranteed outstanding voter-approved general obligation bonds of school districts within the state in the amount of \$8.98 billion at June 30, 2014. The guarantees extend through the life of the bonds, with a final maturity date of the longest series in 2043.

In the event that a school district has insufficient funds to make a required debt service payment on a guaranteed bond, the state is required to transfer sufficient funds to make the payment. School districts for which the state has made all or part of a debt service payment shall reimburse the state treasurer for all money drawn on their behalf, as well as interest and penalties. The state has not paid debt service on any school debt since the inception of the program in 2000.

G. OTHER COMMITMENTS AND CONTINGENCIES

Local Option Capital Asset Lending Program

On September 1, 1998, the state lease-purchase program was extended to local governments seeking low cost financing of essential equipment and in the year 2000 for real estate. The Local Option Capital Assets Lending (LOCAL) program allows local

governments to pool their financing requests together with Washington state agencies in Certificates of Participation (COPs). Refer to Note 7.B for the state's COP disclosure.

These COPs do not constitute a debt or pledge of the full faith and credit of the state; rather, local governments pledge their full faith and credit in a general obligation pledge.

In the event that any local government fails to make any payment, the state is obligated to withhold an amount sufficient to make such payment from the local government's share, if any, of state revenues or other amounts authorized or required by law to be distributed by the state to such local government, if otherwise legally permissible.

Upon failure of any local government to make a payment, the state is further obligated, to the extent of legally available appropriated funds to make such payment on behalf of such local government. The local government remains obligated to make all COP payments and reimburse the state for any conditional payments.

As of June 30, 2014, outstanding certificates of participation notes totaled \$84.4 million for 159 local governments participating in LOCAL. The state estimates that the LOCAL program liability, if any, will be immaterial to its overall financial condition.

Note 14

Subsequent Events

A. BOND ISSUES

In July 2014, the state issued:

- \$420.5 million in motor vehicle fuel tax general obligation refunding bonds for the purpose of refunding certain motor vehicle fuel tax general obligation bonds of the state.
- \$420.1 million in general obligation refunding bonds for the purpose of refunding certain various purpose general obligation bonds of the state.
- \$228.0 million in general obligation bonds for various state capital projects.
- \$85.9 million in taxable general obligation bonds for capital projects and loan programs for lowincome housing and various energy efficiency and renewable energy projects.

In October 2014, the state issued:

- \$301.8 million in motor vehicle fuel tax general obligation refunding bonds for the purpose of refunding certain motor vehicle fuel tax general obligation bonds of the state.
- \$616.0 million in general obligation refunding bonds for the purpose of refunding certain various purpose general obligation bonds of the state.

Later in the calendar year, Washington State University is planning to issue approximately \$15.0 million in refunding bonds and approximately \$75.0 million in general revenue bonds to construct a digital classroom building, pay for public safety projects and renovate a building.

B. CERTIFICATES OF PARTICIPATION

In August 2014, the state issued \$64.0 million in Certificates of Participation.

C. OTHER DEBT

In October 2014, the University of Washington plans to issue up to \$36.0 million in short term commercial paper to buy out the lease of the Cobb Building.

D. GENERAL ELECTION

There is a measure on the state's November 4, 2014, general election ballot that addresses K-12 education. This measure, if passed, could impact the state fiscally.

Election results are not final or official until certified. By law December 4, 2014, is the last day for the Office of the Secretary of State to certify General Election returns.

Information is posted as available on the Secretary of State's website at: http://www.sos.wa.gov.

BUDGETARY INFORMATION

Notes to Required Supplementary Information

GENERAL BUDGETARY POLICIES AND PROCEDURES

The Governor is required to submit a budget to the Legislature no later than December 20 of the year preceding odd-numbered year sessions of the Legislature.

The budget is a proposal for expenditures in the ensuing biennial period based upon anticipated revenues from the sources and rates existing by law at the time of submission of the budget. The Governor may additionally submit, as an appendix to the budget, a proposal for expenditures in the ensuing biennium from revenue sources derived from proposed changes in existing statutes.

The appropriated budget and any necessary supplemental budgets are legally required to be adopted through the passage of appropriation bills by the Legislature and approved by the Governor. Operating appropriations are generally made at the fund/account and agency level; however, in a few cases, appropriations are made at the fund/account and agency/program level. Operating appropriations cover either the entire biennium or a single fiscal year within the biennium. Capital appropriations are biennial and are generally made at the fund/account, agency, and project level.

The legal level of budgetary control is at the fund/account, agency, and appropriation level, with administrative controls established at lower levels of detail in certain instances. The accompanying budgetary schedule is not presented at the legal level of budgetary control. This is due to the large number of appropriations within individual agencies that would make such a presentation in the accompanying financial schedule extremely cumbersome. Section 2400.121 of the GASB Codification of Governmental Accounting and Financial Reporting Standards provides for the preparation of a separate report in these extreme cases.

For the state of Washington, a separate report has been prepared for the 2013-15 biennium to illustrate legal budgetary compliance. Appropriated budget versus actual expenditures, and estimated versus actual revenues and other financing sources (uses) for appropriated funds/accounts at agency and appropriation level are presented in the Budget-to-Actual Detail Report for governmental funds. A copy of this report is available at the Office of Financial Management, PO Box 43113, Olympia, Washington 98504-3113.

Legislative appropriations are strict legal limits on expenditures, and over-expenditures are prohibited. All appropriated and certain nonappropriated funds/accounts are further controlled by the executive branch through the allotment process. This process allocates the expenditure plan into monthly allotments by program, source of funds, and object of expenditure. State law does not preclude the over- expenditure of allotments.

Proprietary funds/accounts can earn revenues and incur expenses (i.e., depreciation or cost of goods sold) not covered by the allotment process. Budget estimates are generally made outside the allotment process according to prepared business plans. These proprietary fund/account business plan estimates are adjusted only at the beginning of each fiscal year.

Additional fiscal control is exercised through various means. OFM is authorized to estimate revenue and make expenditure allotments based on availability of unanticipated receipts, mainly federal government grant increases made during a fiscal year.

Operating encumbrances lapse at the end of the applicable appropriation. Capital outlay encumbrances lapse at the end of the biennium unless reappropriated by the Legislature in the ensuing biennium. Encumbrances outstanding against continuing appropriations at fiscal year-end are reported as restricted, committed, or assigned fund balance.

Budgetary Reporting vs. GAAP Reporting

Governmental funds are budgeted materially in conformance with GAAP. However, the presentation in the accompanying budgetary schedules is different in certain respects from the corresponding Statements of Revenues, Expenditures, and Changes in Fund Balance (governmental operating statement). accompanying budgetary schedules, budget and actual expenditures are reported only for appropriated activities. Expenditures are classified based on whether the appropriation is from the operating or capital budget. Expenditures funded by operating budget appropriations are reported as current expenditures classified by the function of the agency receiving the appropriation. Expenditures funded by capital budget appropriations are reported as capital outlays.

However, in the governmental operating statements, all governmental funds are included and expenditures are classified according to what was actually purchased. Capital outlays are capital asset acquisitions such as land, buildings, and equipment. Debt service expenditures are principal and interest payments. Current expenditures are all other governmental fund expenditures classified based on the function of the agency making the expenditures.

Certain governmental activities are excluded from the budgetary schedules because they are not appropriated. These activities include activities designated as nonappropriated by the Legislature. Nonappropriated activities can represent a portion of a fund such as the Higher Education Special Revenue Fund or all of a fund such as the Higher Education Endowment and Tobacco Settlement Securitization Bond Debt Service Funds. Additionally, certain items including federal surplus food commodities, electronic food stamp benefits, and

resources collected and distributed to other governments are also excluded because they are not appropriated.

Further, certain expenditures are appropriated as operating transfers. These transfers are reported as operating transfers on the budgetary schedules and as expenditures on the governmental operating statements.

In the General Fund, Budgetary Fund Balance equals unassigned fund balance as reported on the Governmental Funds Balance Sheet. In all other funds except Wildlife and Natural Resources, Budgetary Fund Balance equals total fund balance less nonspendable fund balance as reported on the Governmental Funds Balance Sheet. The Budgetary Fund Balance in the Wildlife and Natural Resources fund is further reduced by a portion of restricted fund balance that is not available for budgeting.

The Annual Required Contribution (ARC) changes each year with the experience of the plans. Factors influencing the experience include changes in funding methods, assumptions, plan provisions, and economic and demographic experience gains and losses. The methods used to derive the ARC for this reporting disclosure are different from the methods used to derive the actual contributions required by law. These differences include the use of different actuarial valuations (actual contributions may be based on an earlier valuation), and different actuarial cost methods. For these reasons the actual contributions will not match the ARCs. Starting in 2009, the ARC for PERS and TRS Plans 1 was calculated using the Entry Age Normal cost method with a rolling 10-year amortization (excluding the temporary rate ceilings). Starting in 2011, the calculation of the ARC reflects the underlying actuarial cost method (excluding minimum contribution rates).

 $Note: Figures \ may \ not \ total \ due \ to \ rounding. \ Percentages \ are \ calculated \ using \ unrounded \ totals.$

Volunteer Fire Fighters' and Reserve Officers' Relief and Pension Fund Notes to Required Supplementary Information

The Office of the State Actuary (OSA) calculates the Actuarially Determined Contributions (ADC) based on the results of an actuarial valuation consistent with funding policy defined under Chapter 41.24 RCW and adopted policies made by the State Board for Volunteer Fire Fighters and Reserve Officers. Consistent with the

Board's contribution rate adoption process, the results of an actuarial valuation determine the ADC two years after the valuation date. For example, the actuarial valuation with a June 30, 2013 valuation date, completed in the Fall of 2014, determines the ADC for the period ending June 30, 2015.

INFRASTRUCTURE ASSETS REPORTED USING THE MODIFIED APPROACH

Condition Assessment

The state of Washington reports certain networks of infrastructure assets under the modified approach of the Governmental Accounting Standards Board Statement No. 34. Expenditures to maintain and preserve these assets are budgeted, recorded, and reported in lieu of depreciation expense. The state must meet the following requirements to report networks of assets under the modified approach:

- Maintain an up-to-date inventory of eligible infrastructure assets in an asset management system.
- Disclose the condition level established by administrative or executive policy, or by legislative

action at which assets are to be preserved or maintained.

- Perform condition assessments of eligible assets and summarize the results using a measurement scale.
- Document that assets are being preserved approximately at or above the disclosed condition level.
- Annually estimate the cost to maintain and preserve the assets at the established condition level.

Assets accounted for under the modified approach include the state's network of highway pavements, bridges, and rest areas. In fiscal year 2014, the state was responsible to maintain and preserve 20,692 pavement lane miles, 3,286 bridges and tunnels, and 48 rest areas.

PAVEMENT CONDITION

The Washington State Department of Transportation (WSDOT) performs highway pavement assessments over a two year cycle utilizing three measurements to develop a scaled condition assessment: Pavement Structural Condition (PSC), International Roughness Index (IRI), and rutting.

The WSDOT uses the following rating scale for PSC:

| Category | PSC Range | Description |
|-----------|-----------|---|
| Very Good | 80 – 100 | Little or no distress. Example: Flexible pavement with 5 percent of wheel track length having "hairline" severity alligator cracking will have a PSC of 80. |
| Good | 60 – 79 | Early stage deterioration. Example: Flexible pavement with 15 percent of wheel track length having "hairline" alligator cracking will have a PSC of 70. |
| Fair | 40 – 59 | This is the threshold value for rehabilitation. Example: Flexible pavement with 25 percent of wheel track length having "hairline" alligator cracking will have a PSC of 50. |
| Poor | 20 – 39 | Structural deterioration. Example: Flexible pavement with 25 percent of wheel track length having "medium (spalled)" severity alligator cracking will have a PSC of 30. |
| Very Poor | 0 – 19 | Advanced structural deterioration. Example: Flexible pavement with 40 percent of wheel track length having "medium (spalled)" severity alligator cracking will have a PSC of 10. May require extensive repair and thicker overlays. |

The IRI scale is measured in inches per mile. The WSDOT assesses pavements with a ride performance measure less than 221 inches per mile to be in fair or better condition.

Rutting is measured in inches with a measurement of 0.58 inches or less assessed at a condition of fair or better.

PSC, IRI, and rutting are combined to rate a section of pavement which is assigned the lowest condition of any of the three indices.

The WSDOT's policy is to maintain 90 percent of pavements at a condition level of fair or better. The following table shows the combined conditions and the ratings for each index:

| Category | PSC | IRI | Rutting |
|-----------|----------|-----------|-------------|
| Very Good | 80 – 100 | < 96 | < 0.24 |
| Good | 60 – 79 | 96 – 170 | 0.24 - 0.41 |
| Fair | 40 – 59 | 171 – 220 | 0.42 - 0.58 |
| Poor | 20 – 39 | 221 – 320 | 0.59 - 0.74 |
| Very Poor | 0 – 19 | > 320 | > 0.74 |

The following table shows pavement condition ratings for state highways:

| Pavements | | | | | | | |
|---|-------------------------------------|-------|-------------------|--|--|--|--|
| Percentage in Fair or Better Condition* | | | | | | | |
| | Two Year Cycle Ending Calendar Year | | | | | | |
| | | | Average of Last | | | | |
| 2013 | <u>2011</u> | 2009 | Three Assessments | | | | |
| 92.8% | 91.2% | 92.7% | 92.2% | | | | |

^{*} The methodology for 2013 has changed from being based solely on number of lane miles to being based on lane miles weighted by vehicle miles traveled. Vehicle miles traveled are key data for highway planning and management, and a common measure of roadway use.

The following table reflects the state's estimated and actual expenditures necessary to preserve state highways at the established condition level:

| Pavements Preservation and Maintenance - Planned to Actual - Fiscal Year (expressed in thousands) | | | | | | | | | | |
|---|----|-------------|----|-------------|----|---------|----|-------------|----|-------------|
| | | <u>2014</u> | | <u>2013</u> | | 2012 | | <u>2011</u> | | <u>2010</u> |
| Planned | \$ | 122,868 | \$ | 137,779 | \$ | 148,811 | \$ | 122,203 | \$ | 168,204 |
| Actual | | 143,598 | | 108,972 | | 148,366 | | 117,811 | | 159,441 |
| Variance | \$ | (20,730) | \$ | 28,807 | \$ | 445 | \$ | 4,392 | \$ | 8,763 |
| | | (16.9%) | | 20.9% | | 0.3% | | 3.6% | | 5.2% |

Actual expenditures may vary from planned amounts for a variety of reasons which include, but are not limited to, management's decision to accelerate, defer, or reduce preservation or maintenance activity in response to economic forecasts and other factors.

For more information about pavements, refer to the WSDOT's website at: http://www.wsdot.wa.gov/Business/MaterialsLab/Pavements/default.htm.

BRIDGE CONDITION

The WSDOT performs sample condition assessments on state owned bridges in excess of 20 feet in length each year with all bridges inspected over a two year cycle. Underwater bridge components are inspected at least once every five years in accordance with Federal Highway Administration (FHWA) requirements.

The WSDOT uses a performance measure which classifies a bridge as good, fair, or poor using the National Bridge Inspection Standards (NBIS) codes for bridge superstructure, substructure, and deck. The following categories for condition rating are based on the structural sufficiency standards established in FHWA's "Recording and Coding Guide for the Structural Inventory and Appraisal of the Nation's Bridges."

| Category | National Bridge Inventory Code | Description |
|----------------|-----------------------------------|--|
| Good | 6, 7, or 8 | A range from no problems noted to some minor deterioration of structural elements. |
| Fair | 5 | All primary structural elements are sound but may have deficiencies such as minor section loss, deterioration, cracking, spalling, or scour. |
| Poor 4 or less | | Advanced deficiencies such as section loss, deterioration, cracking, spalling, scour, or seriously affected primary structural components. |

The WSDOT's policy is to maintain 95 percent of bridges at a condition level of fair or better. The following table shows condition ratings for state bridges:

| Bridges | | | | | | | |
|---|-----------------------------------|-------|-------------------|--|--|--|--|
| Percentage in Fair or Better Condition* | | | | | | | |
| | Two Year Cycle Ending Fiscal Year | | | | | | |
| | | | Average of Last | | | | |
| <u>2013</u> | <u>2011</u> | 2009 | Three Assessments | | | | |
| 91.4% | 95.4% | 97.7% | 94.8% | | | | |

^{*} The methodology for 2013 has changed from number of bridges to square footage of the bridge deck. This change aligns with federal reporting requirements.

The following table reflects the state's estimated and actual expenditures necessary to preserve the bridges at the established condition level:

| Bridges Preservation and Maintenance - Planned to Actual - Fiscal Year (expressed in thousands) | | | | | | | | | | |
|---|----|-------------|----|--------|----|--------|----|-------------|----|--------|
| | | <u>2014</u> | | 2013 | | 2012 | | <u>2011</u> | | 2010 |
| Planned | \$ | 92,192 | \$ | 98,519 | \$ | 66,510 | \$ | 46,708 | \$ | 54,490 |
| Actual | | 87,271 | | 87,306 | | 61,026 | | 43,709 | | 44,436 |
| Variance | \$ | 4,921 | \$ | 11,213 | \$ | 5,484 | \$ | 2,999 | \$ | 10,054 |
| | | 5.3% | | 11.4% | | 8.2% | | 6.4% | | 18.5% |

Actual expenditures may vary from planned amounts for a variety of reasons which include, but are not limited to, management's decision to accelerate, defer, or reduce preservation or maintenance activity in response to economic forecasts and other factors.

For more information about bridges, refer to the WSDOT's website at: http://www.wsdot.wa.gov/Bridge/Structures/.

SAFETY REST AREA CONDITION

The WSDOT performs safety rest area condition assessments every two years. Sites and buildings are divided into functional components that are assessed with a numerical rating of one to five. The rating is based on guidelines and parameters established by the WSDOT Capital Facilities Program and weighted by the criticality of the functional component.

The WSDOT's policy is to maintain 95 percent of safety rest areas in a condition of fair or better. The following table shows condition ratings for safety rest areas:

| Safety Rest Areas | | | | | | |
|--|-------------------------------------|-------------|-------------------|--|--|--|
| Percentage in Fair or Better Condition | | | | | | |
| | Two Year Cycle Ending Calendar Year | | | | | |
| | | | Average of Last | | | |
| <u>2013</u> | <u>2011</u> | <u>2009</u> | Three Assessments | | | |
| 100.0% | 100.0% | 97.6% | 99.2% | | | |

The following table reflects the state's estimated and actual expenditures necessary to preserve the safety rest areas at the established condition level:

| Safety Rest Areas Preservation and Maintenance - Planned to Actual - Fiscal Year (expressed in thousands) | | | | | | | | | | |
|---|----|--------|----|--------|----|--------|----|--------|----|--------|
| | | 2014 | | 2013 | | 2012 | | 2011 | | 2010 |
| Planned | \$ | 7,488 | \$ | 6,607 | \$ | 6,278 | \$ | 6,259 | \$ | 5,815 |
| Actual | | 7,591 | | 6,676 | | 6,467 | | 6,514 | | 5,925 |
| Variance | \$ | (103) | \$ | (69) | \$ | (189) | \$ | (255) | \$ | (110) |
| | | (1.4%) | | (1.0%) | | (3.0%) | | (4.1%) | | (1.9%) |

Actual expenditures may vary from planned amounts for a variety of reasons which include, but are not limited to, management's decision to accelerate, defer, or reduce preservation or maintenance activity in response to economic forecasts and other factors.

Nonmajor Funds Combining Financial Statements

Nonmajor

Governmental Funds

The Nonmajor Governmental Funds fall into the four categories as described below:

Special Revenue Funds

Special Revenue Funds account for the proceeds of specific revenue sources (other than trusts for individuals, private organizations, or other governments, or for major capital projects) that are restricted or committed to expenditures for specified purposes.

Debt Service Funds

Debt Service Funds account for the accumulation of resources that are restricted or committed to expenditures for, and the payment of, principal and interest on the state's bonds issued in support of governmental activities.

Capital Projects Funds

Capital Projects Funds account for financial resources that are restricted or committed to expenditures for the acquisition, construction, or improvement of major state-owned capital facilities (other than highway infrastructure or those financed by proprietary funds).

Permanent Funds

Permanent Funds account for resources that are legally restricted to the extent that only earnings, and not principal, may be used for the benefit of the state or its citizenry. The Common School Permanent Fund, the state's only Nonmajor Permanent Fund, accounts for the principal derived from the sale of timber. Interest earned is used for the benefit of common schools.

Nonmajor

Special Revenue Funds

Special Revenue Funds account for the proceeds of specific revenue sources (other than trusts for individuals, private organizations, or other governments, or for major capital projects) that are restricted or committed to expenditures for specified purposes. The Nonmajor Special Revenue Funds are described below:

Motor Vehicle Fund

The Motor Vehicle Fund accounts for highway activities of the Washington State Patrol; operations of the state ferry system; completion and preservation of the interstate system; other transportation improvements; and maintenance of non-interstate highways and bridges.

Multimodal Transportation Fund

The Multimodal Transportation Fund accounts for activities relating to drivers' licensing; driver improvement and financial responsibility; maintenance of driving records, charges for transportation services; and other highway and non-highway operations and capital improvements.

Central Administrative & Regulatory Fund

The Central Administrative and Regulatory Fund accounts for the operating expenditures of certain administrative and regulatory agencies.

Human Services Fund

The Human Services Fund accounts for activities related to safe and reliable drinking water; life sciences research; housing for persons and families with special housing needs; community awareness and support, and the collection of tobacco settlement monies.

Wildlife and Natural Resources Fund

The Wildlife and Natural Resources Fund accounts for the protection, management and remediation programs of the state's wildlife, habitats, and natural resources, including forests, water, and parks.

Local Construction & Loan Fund

The Local Construction and Loan Fund accounts for construction and loan programs for local public works projects.

Nonmajor

Debt Service Funds

Debt Service Funds account for the accumulation of resources that are restricted or committed to expenditures for, and the payment of, principal and interest on the state's bonds issued in support of governmental activities. Debt Service Funds are described below:

General Obligation Bond Fund

The General Obligation Bond Fund accounts for the accumulation of resources for, and the payment of, non-transportation related general obligation bond principal and interest.

Transportation General Obligation Bond Fund

The Transportation General Obligation Bond Fund accounts for the accumulation of resources for, and

the payment of, general obligation transportation bond principal and interest.

Tobacco Settlement Securitization Bond Fund

The Tobacco Settlement Securitization Bond Fund accounts for the accumulation of resources for, and the payment of, principal and interest on bonds issued by the Tobacco Settlement Authority, a blended component unit of the state.

Transportation Revenue Bond Fund

The Transportation Revenue Bond Fund accounts for the accumulation of resources for, and the payment of, revenue transportation bond principal and interest.

Capital Projects Funds

Capital Projects Funds account for financial resources that are restricted or committed to expenditures for the acquisition, construction, or improvement of major state-owned capital facilities (other than highway infrastructure or those financed by proprietary funds). The Capital Projects Funds are as follows:

State Facilities Fund

The State Facilities Fund accounts for the acquisition, construction, and remodeling of state buildings.

Higher Education Facilities Fund

The Higher Education Facilities Fund accounts for the acquisition, construction, and remodeling of higher education facilities.

Enterprise Funds

Enterprise Funds account for any activity for which a fee is charged to external users for goods or services. If an activity's principal revenue source meets any one of the following criteria, it is required to be reported as an enterprise fund: (1) an activity financed with debt that is secured solely by pledge of the net revenues from fees and charges for the activity; (2) laws or regulations which require that the activity's costs of providing services, including capital costs, be recovered with fees and charges, rather than with taxes or similar revenues; or (3) pricing policies which establish fees and charges designed to recover the activity's costs, including capital costs. The Nonmajor Enterprise Funds are as follows:

Lottery Fund

The Lottery Fund accounts for lottery ticket revenues, administrative and operating expenses of the Lottery Commission, and the distribution of revenue.

Institutional Fund

The Institutional Fund accounts for the enterprise activities carried out through vocational/education programs at state institutions.

Other Activities

The Other Activities Fund accounts for the operation of the pollution liability insurance program, the judicial information system, the local Certificate of Participation (COP) financing program, the local government audit program, and the Secretary of State's corporate public records program.

Internal Service Funds

Internal Service Funds account for state activities that provide goods and services to other state departments or agencies on a cost-reimbursement basis. The Internal Service Funds are described below:

General Services Fund

The General Services Fund accounts for the cost of providing the following services to state agencies: (1) legal services; (2) state Certificate of Participation (COP) financing program; (3) facilities, equipment and related services; (4) printing; (5) audits of state agencies; (6) administration of the state civil service law and labor relations; (7) administrative hearings; and (8) archives and records management.

Data Processing Revolving Fund

The Data Processing Revolving Fund accounts for the distribution of the full cost of data processing and data communication services to other state agencies, and for the payment of other costs incidental to the acquisition, operation, and administration of acquired data processing services, supplies, and equipment.

Higher Education Revolving Fund

The Higher Education Revolving Fund accounts for stores, data processing, printing and duplication, motor pool, and other support service activities at colleges and universities.

Risk Management Fund

The Risk Management Fund administers tort and sundry claims filed against Washington state agencies, except for the University of Washington and the Washington State Department of Transportation Ferries Division.

Health Insurance Fund

The Health Insurance Fund accounts for premiums collected and payments for employees' insurance benefits.

Fiduciary Funds

Fiduciary Funds account for assets held in a trustee or agent capacity for outside parties, including individuals, private organizations, and other governments.

AGENCY FUNDS

Agency Funds account for resources held by the state in a custodial capacity for other governments, private organizations, or individuals. The Agency Funds are described below:

Suspense Fund

The Suspense Fund accounts for receipts where final disposition is pending.

Local Government Distributions Fund

The Local Government Distributions Fund accounts for the receipt and allocation of taxes and fees imposed by local governments.

Pooled Investments Fund

The Pooled Investments Fund is used to administer the pooling and investing of surplus state funds, and the accumulation and allocation of interest earned among the various accounts and funds from which such investments and investment deposits were made. These balances are distributed to the owner funds at June 30.

Retiree Health Insurance Fund

The Retiree Health Insurance Fund accounts for premiums collected and payments for retiree insurance benefits.

Other Agency Fund

The Other Agency Fund accounts for (1) assets held for employees, foster children, inmates, patients, and residents of state institutions; (2) the local government share of contracted timber sales; and (3) monies held under other custodial responsibilities of the state.

Nonmajor

Component Units

Discrete component units are entities which are legally separate from the state but which are financially accountable to the state. The nonmajor component units are described below:

Washington State Housing Finance Commission

The Washington State Housing Finance Commission makes funds available to help provide housing throughout the state, and to finance or refinance nursing homes and capital facilities owned and operated by nonprofit corporations.

Washington Health Care Facilities Authority

The Washington Health Care Facilities Authority makes funds available to qualified, nonprofit health care facilities in the state.

Washington Higher Education Facilities Authority

The Washington Higher Education Facilities Authority provides funding to qualified, nonprofit higher education institutions in the state.

Washington Economic Development Finance Authority

The Washington Economic Development Finance Authority makes funds available to qualified, small and medium-sized businesses in the state for qualifying manufacturing and processing facilities and projects.

STATISTICAL SECTION

This page intentionally left blank.

Statistical Section

This section of the state of Washington's comprehensive annual financial report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the state's overall financial health.

Financial Trends 246-257

These schedules contain trend information to help the reader understand how the state's financial performance and fiscal health has changed over time.

These schedules contain information to help the reader assess the state's most significant revenue sources: Retail sales tax and business and occupation tax.

These schedules present information to help the reader assess the affordability of the state's current levels of outstanding debt, and the state's ability to issue additional debt in the future.

These schedules offer demographic and economic indicators to help the reader understand the environment in which the state's financial activities take place.

These schedules offer operating data to help the reader understand how the information in the state's financial report relates to the services it provides and the activities it performs.

Schedule 1 - Net Position by Component

Last Ten Fiscal Years (expressed in millions) (accrual basis of accounting)

| | 2014 | 2013 | 2012 | 2011 | 2010 |

⁽¹⁾ Intergovernmental grants is zero beginning in 2006 due to reclassification to the appropriate governmental activity.

Figures may not total due to rounding.

⁽²⁾ Health insurance programs is zero beginning in 2007 due to fund reclassifications.

⁽³⁾ Liquor control and Washington's lottery were separated from other business-type activities in 2009.

⁽⁴⁾ The Liquor control distribution and sale of spirits ceased with the passage of Initative 1183. The remaining activities of Liquor control for enforcement and regulation of alcohol and tobacco sales were reclassified to a governmental activity.

 $^{^{(5)}}$ The Convention and Trade Center was transferred to another government in 2011.

 $^{^{(6)}}$ Guaranteed education tuition program was separated from other business-type activities in 2013.

DEBT CAPACITY

Schedule 11 - Legal Debt Margin Information

Last Ten Fiscal Years (expressed in millions)

| | 2014 | 2013 | 2012 | 2011 | 2010 |
|---|--------------|--------------|--------------|--------------|--------------|
| Legal Debt Limitation Calculation (1) | | | | | |
| Three year mean, general state revenues | \$ 13,245 | \$ 12,533 | \$ 12,080 | \$ 12,176 | \$ 12,518 |
| Times: Percentage of three year mean, general state revenue | 9% | 9% | 9% | 9% | 9% |
| Equals: Debt service limitation | \$ 1,192 | \$ 1,128 | \$ 1,087 | \$ 1,096 | \$ 1,127 |
| Debt service limitation | \$ 1,192 | \$ 1,128 | \$ 1,087 | \$ 1,096 | \$ 1,127 |
| Less: Projected maximum annual debt service of outstanding bonds as of June 30 | 1,125 | 1,056 | 1,031 | 995 | 971 |
| Equals: Debt service capacity | \$ 67 | \$ 72 | \$ 56 | \$ 101 | \$ 156 |
| Remaining state general obligation debt capacity (3) | \$ 977 | \$ 1,142 | \$ 874 | \$ 1,425 | \$ 2,267 |
| Plus: Debt outstanding, bonds issued & projected sales subject to debt service limitation as of June 30 | 11,208 | 10,730 | 10,708 | 10,470 | 10,163 |
| Equals: Maximum debt authorization subject to limitation | \$ 12,185 | \$ 11,872 | \$ 11,582 | \$ 11,895 | \$ 12,430 |
| Debt service capacity as a percentage of total debt service limitation | 5.6% | 6.4% | 5.2% | 9.2% | 13.8% |
| Remaining debt capacity as a percentage of maximum debt authorized | 8.0% | 9.6% | 7.5% | 12.0% | 18.2% |

⁽¹⁾ The legal debt limitation limits the amount of state debt that may be incurred by restricting the amount of general state revenues which may be allocated to pay principal and interest on debt subject to these limitations.

Source: Office of the State Treasurer, Certification of the Debt Limitation of the State of Washington

⁽²⁾ Prior to 2010, the level of debt incurred by the state was constrained by two different calculations - one constitutional and one statutory. Effective for 2010, the statutory debt limit was modified to be the same as the constitutional debt limit.

⁽³⁾ The remaining debt capacity each year is the calculated present value of the debt service capacity utilizing a yearly interest rate assumption. Interest rate assumption for 2014 is 4.6 percent.

| Percent change | N/A | 0.7% | 0.7% | 0.7% | 0.8% | 0.9% | 1.0% | 1.0% | 1.0% | 0.9% |

⁽¹⁾ Washington State population estimates are as of April 1 each year. Population estimates for 2009 through 2005 have been revised to reflect intercensal estimates. Intercensal estimates are estimates of population between official census dates. Intercensal estimates are more accurate than postcensal estimates because they are bracketed on both sides by decennial or state-certified special census counts. Estimates for 2010 have been replaced with the 2010 U.S. Census Bureau count. Estimates for 2011 through 2014 are postcensal estimates developed by the Washington State Office of Financial Management.

Figures may not total due to rounding.

N/A indicates data not available.

Sources:

Washington State Office of Financial Management

U.S. Census Bureau, Population Division

 $^{^{(2)}}$ United States population intercensal estimates are as of July 1 of each year.

Notes: A Full-Time Equivalent (FTE) is one full calendar year of paid employment, or the equivalent of 2,088 hours (the number of available work hours in a year). It is not the number of employees on the payroll, nor is it the number of positions in state government. It is a computed average number of state employees based upon cumulative FTE staff months during one fiscal year or cumulative hours paid during one fiscal year. Figures include budgeted operating and capital FTEs and FTEs for nonbudgeted higher education funds.

| Number of state owned liquor stores | - | - | - | 166 | 164 |
| Number of contracted liquor stores | - | - | - | 162 | 159 |

⁽¹⁾ As a result of the 2011 legislation to consolidate central service functions of state government, the Department of General Administration became part of the newly created Washington State Department of Enterprise Services on October 1, 2011.

Sources:

Washington State Department of Revenue, Tax Statistics Washington State Department of Enterprise Services Washington State Liquor Control Board

⁽²⁾ The number of leases for office space only includes leases that the Department of Enterprise Services has acquired. The number of leases does not include leases done under a delegation of authority by another state agency, and does not include space that may include multiple uses, such as warehouse and office, office and classrooms, etc.

⁽³⁾ In fiscal year 2010, five small buildings on the Wheeler site were demolished to make way for construction of a new office building.

⁽⁴⁾ With the passage of Initiative 1183, which privatized the distribution and retail sale of liquor, the Washington State Liquor Control Board closed its state liquor stores and ceased liquor distribution operations on June 1, 2012.

Washington State Department of Social and Health Services

Washington State Health Care Authority

Washington State Department of Corrections

Washington State Department of Health

Washington State Department of Labor and Industries

⁽²⁾ Facitilities include: Eastern State Hospital, Western State Hospital, and Child Study and Treatment Center. Beginning January 2008, the mental health state facilities count no longer includes the Program for Assisted Living Skills (PALS) as it became funded by community dollars, and was subsequently closed in February 2011.

⁽³⁾ The average daily census is based on the count of individuals in residence at midnight.

⁽⁴⁾ The increased number of community outpatient mental health facilities in fiscal year 2010 is due to funding shifts and legislation.

⁽⁵⁾ The community outpatient mental health program, clients served data excludes involuntary clients, stabilization services and mental health residential services. Reporting for excluded services varies across the state. The number of clients served in community outpatient mental health programs during previous fiscal years may change in future report iterations due to reporting lags and data corrections.

⁽⁶⁾ Data reflects state fiscal year average, total participating households.

⁽⁷⁾ The medical assistance programs transferred from the Department of Social and Health Services to the Health Care Authority in July 2011. Due to reporting lags, the Health Care Authority periodically revises its data for periods up to five years.

⁽⁸⁾ In 2011, McNeil Island Corrections Center closed. In 2010, Ahtanum View Corrections Center and Pine Lodge Corrections Center for Women closed.

⁽⁹⁾ Offenders in confinement include offenders in prison, work release, and in-state rented beds.

⁽¹⁰⁾ Includes certified, licensed, and registered health professionals. Emergency medical technicians were not included in the counts for years prior to 2007.

⁽¹⁾ K-12 enrollment figures are preliminary for academic year 2013-14. Enrollment is based on a full-time equivalent student, which is defined as

- Kindergarten: 4 classroom hours per day for 90 days or 2 classroom hours per day for 180 days.
- Grades 1 through 3: 4 classroom hours per day for 180 days.
- Grades 4 through 12: 5 classroom hours per day for 180 days.
- Undergraduate student: 15 credit hours per term.
- Graduate student: 10 credit hours per term.
- (2) The increase in skills center summer students beginning in 2009-10 is due to reporting and funding changes.
- (3) The youth reengagement program, beginning in academic year 2011-12, was created to provide educational opportunities for youth ages 16-21, who have dropped out of high school or are not accumulating sufficient credits to reasonably complete a high school diploma in a public school before the age of twenty one.
- (4) Beginning with the 2010-2011 academic year, high school graduates are calculated using an adjusted (four-year) cohort method that tracks students expected to graduate high school within a four year period of time. Total high school graduates consist of students who received high school diplomas, graduated with Associates degrees, and graduated under Individualized Education Plans (IEPs). Prior to 2010-11, high school graduates were calculated using the traditional estimated (four-year) on-time cohort method which was based on students enrolled within a single school year.
- (5) Enrollment figures include all non-Running Start students, which may include students under the age of 18. Beginning in academic year 2006-07, figures also include students enrolled in baccalaureate partnership programs.
- (6) Baccalaureate degrees awarded by community and technical colleges, beginning in academic year 2008-09.
- (7) Student achievement points are the number of intermediate steps achieved by students that are shown to be predictors of the degree or certificate outcome. Student achievement points are essential to the Student Achievement Initiative (SAI) within the community and technical college system. The initiative was implemented in 2007 to increase educational attainment in Washington state, therefore data is not available for prior academic years. In 2012, following a year-long review, the State Board approved revisions to SAI based upon the first six years of implementation. The revisions included additional points awarded for student retention and critical transitions for students starting less than college-ready, and for second year achievement. 2013-14 reflects SAI revised points.
- (8) Public Universities include all 4-year public institutions and branch campuses. In 2006, the Spokane campus of Washington State University (WSU) was combined with the Pullman campus. In 2013 the WSU Spokane campus was reported separately.
